- The MATLAB section quizzes at the end of each chapter use programs available for download as the archive `matcode.zip`. This archive has programs of general purpose programs for solving probability problems as well as specific `.m` files associated with examples or quizzes in the text. Also available is a manual `probm matlab.pdf` describing the general purpose `.m` files in `matcode.zip`.
- We have made a substantial effort to check the solution to every quiz. Nevertheless, there is a nonzero probability (in fact, a probability close to unity) that errors will be found. If you find errors or have suggestions or comments, please send email to
