Allison-Engined P-51 Mustang Martyn Chorlton,2012-09-20 While the introduction of the Merlin engine did improve the Mustang s performance and produce the bubble canopied fighters with which we associate the name credit must be given to the Allison engined variants that preceded it From its inception in early 1940 the Mustang s development was extraordinarily rapid such was the need for a fighter at the time and the confidence in its design By early January 1942 the Mustang was in service with the RAF flying low level armed reconnaissance operations over Northern France Despite later Merlin variants arriving in theatre this remained a hunting ground for the Allison Mustangs through to D Day and beyond a remarkable service length In American hands the Allison engined Mustangs performed as dive bombers and fighters serving with distinction in North Africa and the Far East

P-51B Mustang James William "Bill" Marshall,Lowell F. Ford,2020-07-09 During World War II the United States Army Air Corps was led by a cadre of officers who believed implicitly that military aviation particularly fast heavy bombers at high altitude would be able to destroy strategic enemy targets during daylight with minimal losses However by 1942 the Flying Fortress was proving vulnerable to Luftwaffe fighters This title charts the United States Army Air Force s struggle to develop a Long Range Escort which would enable them to achieve the Combined Bomber Objectives and gain mastery of the skies over the Third Reich The commitment of the USAAF to the Mediterranean and European theatres saw an increasingly desperate need to find a fighter escort which reached crisis point in 1943 as losses suffered in the Tidal Wave offensive and Schweinfurt Regensburg Munster raids emphasised the mounting strength of the Luftwaffe The USAAF leaders increasingly accepted the probability of bomber losses and the deployment of the P 51B Mustang solved the problem of Germany s layered defence strategy as Luftwaffe fighters had been avoiding the P 47 Thunderbolt and P 38 Lightning escort fighters by concentrating their attacks beyond the range of the Thunderbolt and Lightning The P 51B duly emerged as the The Bastard Stepchild that the USAAF Material Division did not want becoming the key Long Range Escort fighter alongside the P 38 and P 47 that defeated the Luftwaffe prior to D Day As well as the P 51B s history this title explores the technical improvements made to each of these fighters as well as the operational leadership and technical development of the Luftwaffe they fought against

Me 262 vs P-51 Mustang Robert Forsyth,2019-12-26 Arguably two of the finest fighters built during the course of World War II the Me 262 and P 51 Mustang heralded new dawns in aircraft performance Making its operational debut in the summer of 1944 and powered by the Jumo 004 jet engine the Me 262 outclassed Allied planes in terms of speed and firepower ratio offering a formidable punch with four 30 mm MK 108 nose mounted cannons However in the P 51 fitted with the Rolls Royce Packard Merlin engine and drop tanks the USAAF finally had a fighter that had the legs to escort its heavy bombers deep into Reich airspace and back If flown to its strengths the P 51 was more than capable of taking on the feared Me 262 on an equal footing despite the differences in power and top speed Indeed the Mustang proved to be the Luftwaffe fighter arm s nemesis When the P 51D sortied over Germany from the summer of 1944 onwards it shredded through the ill trained and depleted Gruppen of the Luftwaffe s defence wings This book examines the two fighters in detail exploring their history and development and containing accurate descriptions of the combats between the P 51 Mustang and the Me 262 in what were some of the most bitter and large scale aerial actions fought over Europe in 1944 45

P-51B/C Mustang Chris Bucholtz,2022-02-17 This new volume straps the reader into the cockpit of the P 51B C as the Mustang equipped fighter groups of the Mighty Eighth Air Force attempt to defend massed heavy bomber formations from deadly Luftwaffe fighters charged with defending the Third Reich Luftwaffe Reichsmarschall Hermann G ring admitted that the appearance of long range Mustangs over Berlin spelled the end of the Jagdwaffe s ability to defeat American daylight bombing But the Mustang was far more than an escort it was a deadly hunter that could out perform nearly every German fighter when it was introduced into combat Entering combat in Europe in December 1943 P 51Bs and P 51Cs had advantages over German Bf 109s and Fw 190s in respect to the altitude they could reach their rate of climb and top speed Initially tapped for close bomber escort Mustangs were quickly turned loose to range ahead of the bomber stream in order to challenge German fighters before they could assemble to engage the bombers en masse Thanks to the Mustang s superior performance USAAF pilots effectively blunted the Luftwaffe s tried and tested tactic for destroying B 17s and B 24s Boldness and aggression in aerial combat meant that P 51B C pilots inflicted a rapidly mounting toll on their German counterparts in the West during the early months of 1944 contributing mightily to Allied air superiority over northern France on D Day This volume packed full of first hand accounts expertly recreates the combat conditions and flying realities for Mustang pilots including headline aces such as Don Blakeslee and Don Gentile as well as lesser known aviators It is heavily illustrated with photographs artwork and innovative and colourful 3D ribbon diagrams which will provide a realistic overview of the most dynamic dogfights in aviation history

Mustang Aces of the Eighth Air Force Jerry Scutts,2012-11-20 Unquestionably the best American fighter of World War 2 the North American P 51 Mustang served in large numbers with the USAAF s Eighth Air Force from late 1943 until VE Day and was the mount of most aces in theatre Charged with the responsibility of escorting huge formations of B 17 Flying Fortress and B 24 Liberator bombers on daylight raids deep into Germany the P 51 pilots of the various fighter groups within the Mighty Eighth went head to head with the cream of the Luftwaffe s fighter squadrons for control of the skies over the Third Reich Aircraft of the Aces 1 19 and 24 are also available in a single volume as Aces of the Mighty Eighth

North American P-51 Mustang Malcolm Lowe, 2009-12-15 The P 51 Mustang is one of the greatest warplanes of all time Developed as a private venture it was seized upon by the British as the answer to their shortage of fighter aircraft in the early months of World War Two Early Allison engined Mustangs lacked performance at high altitude but the great promise of the airframe was clear and when fitted with the Rolls Royce Merlin the Mustang became one of the best pistoned engined fighters ever built Not only was its performance on a par with the best British and German fighters of the era but it was the first single engined fighter with range sufficient to accompany bombers from Great Britain to Berlin and back This new history of the Mustang tells the full story of its development technical features and operational history and also looks at its long post war career as warbird and racer Malcolm Lowe also dispels many of the myths that have grown up around the Mustang
