Student Exploration: Photosynthesis Lab

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: carbon dioxide, chlorophyll, glucose, limiting factor, nanometer, photosynthesis, wavelength

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

- To survive, what gas do we need to breathe in?
- Where is this gas produced?

Oxygen

Plants

Gizmo Warm-up

During **photosynthesis**, plants use the energy of light to produce **glucose** ($C_6H_{12}O_6$) from **carbon dioxide** (CO_2), and water (H_2O). Glucose is a simple sugar that plants use for energy and as a building block for larger molecules.

A by-product of photosynthesis is oxygen. Plants use some of the oxygen they produce, but most of it is released. In the *Photosynthesis Lab* Gizmo, you can monitor the rate of photosynthesis by measuring oxygen production.

1. Observe the left pane closely. What do you think the bubbles are?

Those Oxygen Bubbles

2. Select the **BAR CHART** tab. On the graph, notice the **Oxygen production** bar. Move the **Light intensity** slider back and forth. How does light intensity affect oxygen production?

Oxygen production decreases with reduced light intensity.

3. Experiment with the vertical **Temperature** slider (upper left) and the **CO₂ level** slider.

A. How does temperature affect oxygen production?

When Temperature decreases, Oxygen production decreases.

B. How does CO₂ level affect oxygen production?

CO2 decreases Oxygen production decreases

C. How does oxygen production relate to the rate of photosynthesis?

Less Oxygen Production the rate of photosynthesis is slow.

Sci-Book Aaron D. Isabelle,2017-12-06 A Sci Book or Science Notebook serves as an essential companion to the science curriculum supplement STEPS to STEM As students learn key concepts in the seven big ideas in this program Electricity Air Water Plants Earth Matter Light it is a necessary part of the scientific enterprise This is important because STEPS to STEM is a program for young scientists who learn within a community of scientists Helping students to think and act like scientists is a critical feature of this program Students learn that they need to keep a written record if they are to successfully share their discoveries and curiosities with their classmates and with the teacher Teachers should also model writing in science to help instill a sense of purpose and pride in using and maintaining a Sci Book Lastly students documentation can serve as a valuable form of authentic assessment teachers can utilize Sci Books to monitor the learning process and the development of science skills

An Introduction to Photosynthesis Agatha Wilson,2015 The most basic and significant aspect of life process on earth is linked to the process of photosynthesis Photosynthesis is the most researched field amongst the scientific community The present book examines the fundamentals of photosynthesis and its impact on different life forms The book contains important sections analyzing light and photosynthesis the importance of carbon in photosynthesis and discusses other significant topics related to the process of photosynthesis The chapters are well structured and are contributed by experts in the field The readers will gain ample knowledge from the new findings documented in the book

Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02 Technology is ubiquitous and its potential to transform learning is immense The first edition of Using Technology with Classroom Instruction That Works answered some vital questions about 21st century teaching and learning What are the best ways to incorporate technology into the curriculum What kinds of technology will best support particular learning tasks and objectives How does a teacher ensure that technology use will enhance instruction rather than distract from it This revised and updated second edition of that best selling book provides fresh answers to these critical questions taking into account the enormous technological advances that have occurred since the first edition was published including the proliferation of social networks mobile devices and web based multimedia tools It also builds on the up to date research and instructional planning framework featured in the new edition of Classroom Instruction That Works outlining the most appropriate technology applications and resources for all nine

categories of effective instructional strategies Setting objectives and providing feedback Reinforcing effort and providing recognition Cooperative learning Cues questions and advance organizers Nonlinguistic representations Summarizing and note taking Assigning homework and providing practice Identifying similarities and differences Generating and testing hypotheses Each strategy focused chapter features examples across grade levels and subject areas and drawn from real life lesson plans and projects of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students The authors also recommend dozens of word processing applications spreadsheet generators educational games data collection tools and online resources that can help make lessons more fun more challenging and most of all more effective

Stable Isotope Ecology Brian Fry, 2007-01-15 A solid introduction to stable isotopes that can also be used as an instructive review for more experienced researchers and professionals The book approaches the use of isotopes from the perspective of ecological and biological research but its concepts can be applied within other disciplines A novel step by step spreadsheet modeling approach is also presented for circulating tracers in any ecological system including any favorite system an ecologist might dream up while sitting at a computer The author's humorous and lighthearted style painlessly imparts the principles of isotope ecology The online material contains color illustrations spreadsheet models technical appendices and problems and answers

Sustainable Energy David J. C. MacKay, 2009 **Ecological Climatology** Gordon B. Bonan, 2008-09-18 This book introduces an interdisciplinary framework to understand the interaction between terrestrial ecosystems and climate change It reviews basic meteorological hydrological and ecological concepts to examine the physical chemical and biological processes by which terrestrial ecosystems affect and are affected by climate The textbook is written for advanced undergraduate and graduate students studying ecology environmental science atmospheric science and geography The central argument is that terrestrial ecosystems become important determinants of climate through their cycling of energy water chemical elements and trace gases This coupling between climate and vegetation is explored at spatial scales from plant cells to global vegetation geography and at timescales of near instantaneous to millennia The text also considers how human alterations to land become important for climate change This restructured edition with updated science and references chapter summaries and review questions and over 400 illustrations including many in colour serves as an essential student guide

Maelstrom Peter Watts, 2009-01-06 Second in the Rifters Trilogy Hugo Award winning author Peter Watts *Maelstrom* is a terrifying explosion of cyberpunk noir This is the way the world ends A nuclear strike on a deep sea vent The target was an ancient microbe voracious enough to drive the whole biosphere to extinction and a handful of amphibious humans called rifters who inadvertently released it from three billion years of solitary confinement The resulting tsunami killed millions It's not as though there was a choice saving the world excuses almost any degree of collateral damage Unless of course you miss the target Now North America's west coast lies in ruins Millions of refugees rally around a mythical figure mysteriously risen from the deep sea A world already wobbling towards collapse barely notices the spread of one more blight along its shores And buried in the seething fast forward jungle that used to be called Internet something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest A woman driven by rage and incubating Armageddon Her name is Lenie Clarke She's a rifter She's not nearly as dead as everyone thinks And the whole damn world is collateral damage as far as she's concerned At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied

The Risks of Multiple Breadbasket Failures in the 21st Century Anthony Janetos, Christopher Justice, Molly Jahn, Michael Obersteiner, Joseph Glauber, William Mulhern, 2017-03-06 According to the UN's Food and Agricultural Organization Statistics Division 2016 a relatively small area of the world 23 percent of total

cropland accounts for a large proportion of total global cereal production with most of the area devoted to three major cereal crops maize 70.3 percent wheat 69.3 percent and rice 84.5 percent In a recent study of global hotspots of heat stress due to climate change Teixeira et al 2013 showed areas of Central Asia East Asia South Asia and North America 40-60 degrees N which include the major grain producing areas of the world as being particularly vulnerable The structure of globalized food systems with major constrictions in trade flows and highly concentrated areas of the world's food production creates obvious vulnerabilities Systematic evaluation of the likelihood of disruptive events in relation to each other and their potential impacts has not been done Written by an interdisciplinary team of leading researchers this Pardee Center Research Report describes a science research agenda toward improved probabilistic modeling and prediction of multiple breadbasket failures and the potential consequences for global food systems The authors highlight gaps in the existing empirical foundation and analytical capabilities and offer general approaches to address these gaps They also suggest the need to fuse diverse data sources recent observations and new suites of dynamic models capable of connecting agricultural outcomes to elements of the global food system The goal of these efforts is to provide better information concerning potential systemic risks to breadbaskets in various regions of the world to inform policies and decisions that have the potential for global impacts This reports stems from an international interdisciplinary workshop organized by Knowledge Systems for Sustainability and hosted by the Frederick S Pardee Center for the Study of the Longer Range Future at Boston University with support from Thomson Reuters in November 2014
