WIFI Connect at connect.coverstar.com:

The Coverstar WIFI Touchpad™ (if installed) is designed to automatically send alerts via text or Email, using your home Wi-Fi network. In order for the touchpad to perform as intended, the touchpad unit must be installed in accordance with Coverstar's instructions, be connected to a home power source, and a home WIFI network must be set up and functioning correctly, with a continuous WIFI signal to the pool area. Setup and maintenance of these items is the sole responsibility of the homeowner and failure to do so will prevent the Coverstar WIFI Touchpad™ from performing as intended.

Please note that some home WIFI routers may be out-of-date and may require updated security protocols in order to function correctly. The Coverstar WIFI Touchpad™ utilizes 802.11b/g technology and supports open, WPA-PSK (TKIP) and WPA2-PSK authentication technologies. A WPS protocol can be used to establish an easy and secure wireless setup on supporting WPS enabled routers. Alerts can be received using any phone with email and SMS text capability.
