Market Leader, 2011 **Asian Competitors: Marketing For Competitiveness In The Age Of Digital Consumers**
Philip Kotler, Hermanwan Kartajaya, Den Huan Hooi, 2019-03-15 Today's dynamic and uncertain environment has contributed to the changing nature of markets. In order for companies to keep up, they will need to embark on new wave marketing to ride the wave of opportunities provided by the changes in the environment such as the digital revolution. This is critical all over the world, but none more so than in Asia. Asia is not only the world's biggest market but also the fastest growing. It is therefore essential for marketers to understand the dynamics of Asian companies and what they have to offer to the wider world. This book analyzes competitive companies from 18 Asian countries that have successfully practiced new wave marketing and in so doing provide invaluable lessons that others may find useful. Comprehensive case studies are used not only to describe how some of Asia's best companies compete but also to analyze the concepts of new wave marketing; their actions are based on this. This book is unique in its depth and breadth of cases from companies in the ASEAN region to North East Asia including Mongolia and SAARC. The authors of this book, Professor Philip Kotler (arguably the Father of Modern Marketing), Hermawan Kartajaya from Indonesia and Hooi Den Huan from Singapore, are all experts in their field and have previously produced other bestsellers. This book, with its focus on real-life examples of competitive Asian companies in the age of digitalization, complements the principles and theoretical frameworks of new wave marketing that are detailed in its sister book. Together, these books provide a comprehensive picture of the changing Asian marketing landscape. Market Leader

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World renowned economist Klaus Schwab Founder and Executive Chairman of the World Economic Forum explains that we have an opportunity to shape the fourth industrial revolution which will fundamentally alter how we live and work Schwab argues that this revolution is different in scale scope and complexity from any that have come before Characterized by a range of new technologies that are fusing the physical digital and biological worlds the developments are affecting all disciplines economies industries and governments and even challenging ideas about what it means to be human Artificial intelligence is already all around us from supercomputers drones and virtual assistants to 3D printing DNA sequencing smart thermostats wear able sensors and microchips smaller than a grain of sand But this is just the beginning nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development Imagine smart factories in which global systems of manufacturing are coordinated virtually or implantable mobile phones made of biosynthetic materials The fourth industrial revolution says Schwab is more significant and its ramifications more profound than in any prior period of human history He outlines the key technologies driving this revolution and discusses the major impacts expected on government business civil society and individuals Schwab also offers bold ideas on how to harness these changes and shape a better future one in which technology empowers people rather than replaces them progress serves society rather than disrupts it and in which innovators respect moral and ethical boundaries rather than cross them We all have the opportunity to contribute to developing new frameworks that advance progress
