

Student Exploration: Food Chain

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes. Change your text color for your answers.

Define Each Vocabulary Word:

consumer- a living creature that eats organisms from a different population

ecosystem-a geographic area where plants, animals, and other organisms, as well as weather and landscape, work together to form a bubble of life

energy pyramid- a graphical representation of the energy found within the trophic levels of an ecosystem

equilibrium-the current functions of the body are able to keep the body at a stable condition

food chain- the sequence of transfers of matter and energy in the form of food from organism to organism

population-a group of individuals of the same species living and interbreeding within a given area

predator- an organism that primarily obtains food by the killing and consuming of other organisms

prey- organisms that predators kill for food

Producer- organisms that make their own food

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

The Food Chain Gizmo shows a **food chain** with hawks, snakes, rabbits, and grass. In this simulation, the hawks eat snakes, the snakes eat rabbits, and the rabbits eat grass.

1. **Producers** are organisms that do not need to eat other organisms to obtain energy.

A. Which organism is a producer in this food chain?	grass
B. Where does the producer get its energy?	The sun

2. **Consumers** must eat other organisms for energy. Which organisms are consumers in this food chain?

Hawks, snakes, and rabbits

Gizmo Warm-up

The SIMULATION pane of the Gizmo shows the current **population**, or number, of each organism in the food chain.

1. What are the current populations of each organism?

Hawks:	42	Snakes:	278	Rabbits:	2566	Grass:	27300
--------	----	---------	-----	----------	------	--------	-------

2. Select the BAR CHART tab, and click **Play** (▶). What do you notice about each population as time goes by?

The population of rabbits and grass increases.

If populations don't change very much over time, the ecosystem is in **equilibrium**.

3. Notice the populations decrease as you go from the bottom of the food chain to the top. Why do you think this is so?

There are more producers than consumers so it balances out.

Strategic Project Management Made Simple Terry Schmidt, 2009-03-16 When Fortune Magazine estimated that 70% of all strategies fail it also noted that most of these strategies were basically sound but could not be executed The central premise of Strategic Project Management Made Simple is that most projects and strategies never get off the ground because of adhoc haphazard and obsolete methods used to turn their ideas into coherent and actionable plans Strategic Project Management Made Simple is the first book to couple a step by step process with an interactive thinking tool that takes a strategic approach to designing projects and action initiatives Strategic Project Management Made Simple builds a solid platform upon four critical questions that are vital for teams to intelligently answer in order to create their own strong strategic foundation These questions are 1 What are we trying to accomplish and why 2 How will we measure success 3 What other conditions must exist 4 How do we get there This fresh approach begins with clearly understanding the what and why of a project comprehending the bigger picture goals that are often given only lip service or cursory reviews The second and third questions clarify success measures and identify the risky assumptions that can later cause pain if not spotted early The how questions what are the activities budgets and schedules comes last in our four question system By contrast most project approaches prematurely concentrate on the how without first adequately addressing the three other questions These four questions guide readers into fleshing out a simple yet sophisticated mental workbench called the Logical Framework a Systems Thinking paradigm that lays out one s own project strategy in an easily accessible interactive 4x4 matrix The inclusion of memorable features and concepts four critical questions LogFrame matrix If then thinking and Implementation Equation make this book unique
