grew out of the April 2008 biennial conference of U S Army Research Psychologists held in Bethesda Maryland This meeting was to be my last as Consultant to the Surgeon General for Research Psychology and I thought it would be a good idea to publish proceedings which had not been done before As Consultant I d often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living In addition to our core group of 71Fs at the Bethesda 2008 meeting we had several brand new members and a number of distinguished retirees the grey beards of the 71F clan Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels with no sign of easing and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health well being and performance of Soldiers and their families **Fox and**
