The Water Engine José Antonio Alías García,2019-09-30 The water engine is an invention unfortunately invented many times Hydrogen from water is very abundant renewable and can be used in both energy poor and rich countries Crude oil and natural gas are limited energy resources But there are many people who think that certain promising technologies have been suppressed by various political or economic powers usually with the purpose of protecting their investments and interests and at the already more absurd extremes of the conspiracy illogical for sinister motivations of much greater scope In this new work the versatile composer and writer Van Jaag accompanies us on an exciting journey through the history of this unknown invention and its invented inventors

Operating Problems Diesel Engine Users' Association,1952

*Technical Problems Associated with Diesel Fuels in Interstate Coach Operation* W. A. Duvall,1954 The quality and availability of diesel fuel has so nearly kept pace with the development of the diesel engine in interstate coach service that one would almost be inclined to say that there were no problems When one thinks back to the

early years of the diesel engine in this type of service it is impossible not to feel that the progress in the development of the two cycle engine and the evolution of specifications leading to present day fuels indicate that the development of the two must be closely related Stuck valves broken and burned pistons and stuck and broken rings were some of the early problems most closely related to fuel Of course it is impossible to separate lubrication problems from the fuel in this type of failure In fact it is impossible to say that they were not sometimes related to the mechanical failures that so often occurred during the same period and which because of their nature could not be separated or definitely identified as being caused purely by one thing or another In any case the interstate coach services did elect to stay with the diesel engine through these early years in spite of the problems attendant upon a nonmilitary operation in the midst of a major war During those years the oil suppliers always managed to supply the needs of these companies not only for diesel fuel but for gasoline as well they supplied the best quality fuel that was at their command while keeping in mind of course that winning the war was the primary objective
