Is Assessment Fair? May 28 2022 Fairness in educational assessment has become a major talking point and allegations that assessments are unfair are commonplace on social media and in the press. But what does fairness mean in practice and how can we evaluate it? This book offers a timely and necessary investigation, exploring the concept through the lenses of: measurement theory, social justice, the law and philosophy in order to put forward a template for fairness in educational assessment. Drawing on international examples from the UK, US, Australia and South East Asia, this book offers a commentary on fairness that is highly relevant to the changing context of assessment today. If you have a professional or academic interest in educational assessment, are an education policymaker or are just interested in working to make assessment fair, then this book is for you!

Debates in Geography Education Oct 13 2023 *Debates in Geography Education* encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject's expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to 'global learning'; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own research and writing. *Debates in Geography Education* is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their

practice, and Education Studies students considering in-depth subject teaching. **The Coalition Effect, 2010–2015** Feb 17 2024 The essential verdict on Britain's first coalition government since the Second World War delivered by an unrivalled team of experts.

Improving Foreign Language Teaching Apr 26 2022 Improving Foreign Language Teaching provides teachers and teacher trainers with a research-based structure for the effective teaching and assessment of second languages. As well as outlining a model for teacher development, the book identifies and exemplifies eight key principles for effective language learning, which can be used to guide curriculum design and decisions about classroom pedagogy. Improving Foreign Language Teaching also presents practical activities, related materials, and guidance on how student progress can be monitored and recorded. Based on the research of the authors and other international experts, together with the work of a consortium established by the authors and teachers in a range of secondary schools, the book focusses on the development of language skills and communicative competence. It also proposes an assessment system which better reflects how learners progress in language learning than current models. Taking as its starting point the challenge of a curriculum in flux and complex pedagogical approaches, this book offers clear research-informed guidance for effective planning, teaching and learning. It will be essential reading for all those concerned with the improvement of language learning and teaching in the secondary classroom.

Apprenticeships Aug 19 2021 The apprenticeship programme can play a key role in resolving some of this county's most pressing issues. It can help us to create a more skilled workforce, to increase employment and to generate sustainable economic growth. For these reasons, the Government has, quite rightly, made apprenticeships a priority and has devoted significant resources to help them thrive. But money does not guarantee success. This wide-ranging, evidence-based report carefully lays out the areas where the current model could better serve apprentices, their employers, or, in many cases, both. The Committee recommends that the Government takes a more active approach in the future and constantly reviews the profit levels of training providers as an indicator of potential risks to efficiency. The Committee heard evidence of excessive profits at the public's expense, of a Government paying out too much money far too easily and of a lack of genuine value for money being provided by apprenticeship schemes. This is unacceptable

An Introduction to the World of Work Jun 09 2023 Introduction to the World of Work Synopsis We have subdivided the modules into personal and business since this seems a logical approach. Educationalists suggest an inductive approach to education is the best one where we go from the experience of the students to the underlying principles and therefore we have put in the personal modules first. The objective of all the modules is both to help people within schools or colleges to be faced with realistic choices which can be answered if

necessary in the classroom but also to provide material which can be used by young people working on their own. Young people need to have transferable skills and some of these can be obtained by looking at the ways in which businesses approach them. It is therefore worthwhile trying to build up a portfolio of ways in which businesses have these approaches and to see which ones are effective and why, also which ones are totally misplaced.

GCSE Geography Edexcel B Jun 16 2021 A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Sustainable Tertiary Education in Asia Mar 14 2021 This edited volume offers a comprehensive reference point to an interdisciplinary and trans-boundary analysis of the sustainability of Asian tertiary education systems. The four sections of the volume –Collaborations, Transformations, Global-Local Tensions, and Future Developments—reflect the current conditions, ongoing changes, and new directions of the universities’ transformative contribution to the 2030 UN Agenda and its Sustainable Development Goals (SDGs). The chapters in this volume draw on inquiries and experiences from 12 research projects conducted in Asia, featuring cases from South Korea, Kazakhstan, Russia, and China, and include regions such as the Hong Kong Special Administrative Region of China, Ural-Siberian, and the Far Eastern regions of Russia. The collection of the studies presented in this volume offers a general framework for sustainable tertiary education that, with some adaptations, could be applied to other tertiary education systems in the world. The present volume, *Sustainable Tertiary Education in Asia: Policies, Practices, and Developments*, contributes to the research arena of Higher Education Sustainability by fostering a cross-cultural dialog among sustainability stakeholders of tertiary education in Asia and beyond.

Creating Curricula: Aims, Knowledge and Control Jan 04 2023 Knowledge has been a defining focus for the curriculum studies field. In the early part of the 21st century convincing arguments were mounted that knowledge needed to be 'brought back in', both to the curriculum of schools and to the attention of curriculum researchers. This book is a result of these arguments, and what some regarded as a 'crisis' in curriculum study related to the growing emphasis on international comparisons between education systems. The book's most important contribution is to build on seminal work in the sociology and philosophy of education in order to develop new foundations for curriculum study, using the importance of 'transactions' as the context for understanding knowledge in the curriculum. The contributors build on this importance to suggest a rapprochement in the field around the idea of curriculum knowledge as both constructed and real. This book was originally published as a special issue of The Curriculum Journal.

Education for Upward Mobility Dec 23 2021 This book seeks answers to a fundamental question, perhaps one of the most important questions in America today: How can we help children born into poverty transcend their disadvantages and enter the middle class as adults? And in particular, what role can our schools play? There's little doubt that education and opportunity are tightly joined in the twenty-first-century economy. Almost every week brings a new study demonstrating that highly skilled workers are being rewarded with stronger pay and excellent working conditions, while Americans with few skills are struggling mightily. Expanding educational achievement, then, appears to be a clear route to expanding economic opportunity. Yet much of our public discourse ends there. Of course more young Americans need better education in order to succeed. But what kind of education? Is the goal "college for all"? What do we mean by "college"? Do our young people mostly need a strong foundation in academics? What about so-called "non-cognitive" skills? Should technical education make a comeback? Education for Upward Mobility provides fresh perspectives and concrete ideas for policymakers at every level of government; for leaders and policy analysts in education reform organizations in the states and in Washington; for philanthropists and membership associations; and for local superintendents and school board members. It combines the latest research evidence on relevant topics with in-depth explorations of promising practices on the ground, in real places, achieving real successes.

Mapping Corporate Education Reform Jul 18 2021 Mapping Corporate

Education Reform outlines and analyzes the complex relationships between policy actors that define education reform within the current, neoliberal context. Using social network analysis and powerful data visualization tools, the authors identify the problematic roots of these relationships and describe their effects both in the U.S. and abroad. Through a series of case studies, each chapter reveals how powerful actors, from billionaire philanthropists to multinational education corporations, leverage their resources to implement free market mechanisms within public education. By comprehensively connecting the dots of neoliberal education reforms, the authors reveal not only the details of the reforms themselves, but the relationships that enable actors to amass troubling degrees of political power through network governance. A critical analysis of the actors and interests behind education policies, Mapping Corporate Education Reform uncovers the frequently obscured operations of educational governance and offers key insights into education reform at the present moment.

2012 GCSE English results Jun 21 2024 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern

Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

GCE AS Travel and Tourism Double Award for Edexcel May 16 2021 This full colour student book gives candidates all of the mandatory units they need to complete the Double Award. It is exactly matched to the specifications of Edexcel.

MasterClass in History Education Nov 14 2023 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading, research and reflection can support the development of history teaching and learning in the classroom. At the heart of the book is a series of professional enquiries carried out by experienced history teachers, working in a range of contexts. Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection, data analysis and argument. These history teachers also show how they drew on diverse scholarship in history and history education, including many publications by other history teachers. In eight further chapters, other experts, ranging from practitioner-scholars to researchers in diverse fields (such as history, history education, teacher education, teacher research and curriculum theory) reflect on the distinctive insights that these teachers offer and explore connections with their own fields. The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between 'theory' and 'practice'. The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice.

Core and Non-Core Political Ideas are compulsory elements of Components 1 and 2.

Everything for Sale? The Marketisation of UK Higher Education Jul 30 2022 The

marketisation of higher education is a growing worldwide trend. Increasingly, market steering is replacing or supplementing government steering. Tuition fees are being introduced or increased, usually at the expense of state grants to institutions. Grants for student support are being replaced or supplemented by loans. Commercial rankings and league tables to guide student choice are proliferating with institutions devoting increasing resources to marketing, branding and customer service. The UK is a particularly good example of this, not only because it is a country where marketisation has arguably proceeded furthest, but also because of the variations that exist as Scotland, Wales and Northern Ireland increasingly diverge from England. In *Everything for Sale*, Roger Brown argues that the competitive regime that is now applicable to our Higher Education system was the logical, and possibly inevitable, outcome of a process that began with the introduction of full cost fees for overseas students in 1980. Through chapters including: Markets and Non-Markets The Institutional Pattern of Provision The Funding of Research The Funding of Student Education Quality Assurance The Impact of Marketisation: Efficiency, diversity and equity; He shows how the evaluation and funding of research, the funding of student education, quality assurance, and the structure of the system have increasingly been organised on market or quasi-market lines. As well as helping to explain the evolution of British higher education over the past thirty years, the book contains some important messages about the consequences of introducing or extending market competition in universities' core activities of teaching and research. This timely and comprehensive book is essential reading for all academics at University level and anyone involved in Higher Education policy.

Edexcel UK Government and Politics for AS/A Level Fifth Edition Jun 28 2022 Exam Board: Edexcel Level: AS/A-level Subject: Politics First Teaching: September 2017 First Exam: June 2018 Trusted author Neil McNaughton brings you his bestselling politics textbook, fully updated and endorsed for the 2017 Edexcel specification. The ICT Teacher's Handbook Aug 11 2023 The ICT Teacher's Handbook is an indispensable guide for all teachers responsible for the teaching and management of ICT in the secondary school, both as a comprehensive introduction for students learning to teach ICT and as a source of ongoing support for busy practising teachers. Illustrated throughout with case studies, key further reading and guidance on where to find and how to choose the best software and resources, the book also features a guide to specifications, software for whole school support and a useful glossary of key terms. Key topics covered include: Organising and delivering the ICT National Curriculum at key stages 3 and 4 and post 16 Teaching and learning with VLEs, IWBs, social networking and mobile technologies Assessment, record keeping and reporting Popular hardware, software and networks External assessment, target setting and tracking Managing technical support and technicians Preparing for promotion and managing an ICT department Strategies for whole school management of ICT Written for trainee and experienced ICT teachers and managers in both English and international schools, The ICT Teacher's Handbook is an authoritative guide designed to support effective teaching and learning, and efficient use of technology in all schools.

Teachers and Academic Partners in Urban Schools Oct 21 2021 'Showing how critical thinking and local democracy can be a spur to very real educational development within schools that are facing severe challenges, this book provides us with one very valuable contemporary resource of hope.' Ian Menter, Professor of Teacher Education, University of Oxford, UK Teachers and Academic Partners in Urban Schools identifies and addresses a major problem for practitioners – teachers, student teachers and teacher educators – working in urban schools burdened by highly restrictive teaching methods and pressures to meet unrealistic benchmarks set by government. In this book, Lori Beckett investigates how to negotiate these tensions and challenges and offers an account of how to

elevate practitioners' professional voice on quality teaching along more democratic lines. The book addresses key issues for teachers in urban schools, such as: fractures in teachers' professional communities; impacts of imposed marketizing policies and forced performative practices on schools; the complexities of teaching and teachers' concerns about practice, as well as teaching practitioners' perception of educational/schools policy. Both academic and teacher partners contribute to the work, showcasing the ways they have engaged with each other in joint work and with local government. Through this, the book supports a professional and politicized dialogue about teaching and teacher education, offering a meaningful account of how to fashion a form of educative schooling for students and families with complex needs. Written by a dynamic and experienced author, this book brings Beckett's experience to bear on a controversial and complex area – addressing the general trend towards increased regulatory policy in education. It is an essential read for anyone interested in a rich analysis of how practitioners can work to reassert their professional voice and regain control of schools and teacher education, and will also appeal to those interested in the larger project of restoring school democracy.

Edexcel Business A Level Year 1 Jan 24 2022 Exam Board: Edexcel Level: AS/A-level Subject: Business First Teaching: September 2015 First Exam: June 2016 Topics are broken down to short, clear chapters, that are all structured in the same way, so students can build their understanding with ease - Covers each syllabus area in the detail you need, with exercises that have enough depth and variety to give full class and homework coverage - Brings the business world into the classroom with real examples used extensively throughout the text, in extra cases and in end-of-chapter exercises - Features to help reinforce student understanding - in every chapter there's Real Business, an Evaluation and Logic Chain, but also the brand new '5 Whys and a How' which will help students tackle exam questions

Education under siege Nov 21 2021 At a time when education is considered crucial to a country's economic success, recent UK governments have insisted their reforms are the only way to make England's system world class. Yet pupils are tested rather than educated, teachers bullied rather than trusted and parents cast as winners or losers in a gamble for school places. Education under siege considers the English education system as it is and as it might be. In a highly accessible style, Peter Mortimore, an author with wide experience of the education sector, both in the UK and abroad, identifies the current system's strengths and weaknesses. He concludes that England has some of the best teachers in the world but one of the most muddled systems. Challenging the government's view that there is no alternative, he proposes radical changes to help all schools become good schools. They include a system of schools receiving a fair balance of pupils who learn easily and those who do not, ensuring a more even spread of effective teachers, as well as banning league tables, outlawing selection, opening up faith schools and integrating private schools into the state system. In the final chapter, he asks readers who share his concerns to demand that the politicians alter course. The book will appeal to parents, education students and teachers, as well as everyone interested in the future education of our children.
