Agriculture **What Makes Us Smart** Samuel Gershman,2021-10-19 How a computational framework can account for the successes and failures of human cognition At the heart of human intelligence rests a fundamental puzzle How are we incredibly smart and stupid at the same time No existing machine can match the power and flexibility of human perception language and reasoning Yet we routinely commit errors that reveal the failures of our thought processes What Makes Us Smart makes sense of this paradox by arguing that our cognitive errors are not haphazard Rather they are the inevitable consequences of a brain optimized for efficient inference and decision making within the constraints of time energy and memory in other words data and resource limitations Framing human intelligence in terms of these constraints Samuel Gershman shows how a deeper computational logic underpins the stupid errors of human cognition Embarking on a journey across psychology neuroscience computer science linguistics and economics Gershman presents unifying principles that govern human intelligence First inductive bias any system that makes inferences based on limited data must constrain its hypotheses in some way before observing data Second approximation bias any system that makes inferences and decisions with limited resources must make approximations Applying these principles to a range of computational errors made by humans Gershman demonstrates that intelligent systems designed to meet these constraints yield characteristically human errors Examining how humans make intelligent and maladaptive decisions What Makes Us Smart delves into the successes and failures of cognition **Index; 1958** University of Massachusetts at Amherst,2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Design of Fishways and Other Fish Facilities* Charles H.
