Why Nations Fail Daron Acemoglu, James A. Robinson, 2013-09-17 Brilliant and engagingly written Why Nations Fail answers the question that has stumped the experts for centuries Why are some nations rich and others poor divided by wealth and poverty health and sickness food and famine Is it culture the weather geography Perhaps ignorance of what the right policies are Simply no None of these factors is either definitive or destiny Otherwise how to explain why Botswana has become one of the fastest growing countries in the world while other African nations such as Zimbabwe the Congo and Sierra Leone are mired in poverty and violence Daron Acemoglu and James Robinson conclusively show that it is man made political and economic institutions that underlie economic success or lack of it Korea to take just one of their fascinating examples is a remarkably homogeneous nation yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest The south forged a society that created incentives rewarded innovation and allowed everyone to participate in economic opportunities The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people Sadly the people of the north have endured decades of famine political repression and very different economic institutions with no end in sight The differences between the Koreas is due to the politics that created these completely different institutional trajectories Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire the Mayan city states medieval Venice the Soviet Union Latin America England Europe the United States and Africa to build a new theory of political economy with great relevance for the big questions of today including China has built an authoritarian growth machine Will it continue to grow at such high speed and overwhelm the West Are America s best days behind it Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority What is the most effective way to help move billions of people from the rut of poverty to prosperity More philanthropy from the wealthy nations of the West Or learning the hard won lessons of Acemoglu and Robinson s breakthrough ideas on the interplay between inclusive political and economic institutions Why Nations Fail will change the way you look at and understand the world

Catholic School Leadership Anthony J. Dosen, Barbara S. Rieckhoff, 2016-01-01 The administration of Pre K 12 Catholic schools becomes more challenging each year Catholic school leaders not only have the daunting task of leading a successful learning organization but also to serve as the school community s spiritual leader and the vigilant steward who keeps the budget balanced the building clean and maintaining a healthy enrollment in the school Each of these tasks can be a full time job yet the Catholic school principal takes on these tasks day after day year after year so that teachers may teach as Jesus did The goal of this book is to provide both beginning and seasoned Catholic school leaders with some insights that might help them to meet these challenges with a sense of confidence The words in this text provide research based approaches for dealing with issues of practice especially those tasks that are not ordinarily taught in educational leadership programs This text helps to make sense of the pastoral side of Catholic education in terms of structures mission identity curriculum and relationships with the principal s varied constituencies It also provides some insights into enrollment management issues finances and development and the day in day out care of the organization and its home the school building As a Catholic school leader each must remember that the Catholic school is not just another educational option The Catholic school has a rich history and an important mission Historically education of the young goes back to the monastic and cathedral schools of the Middle Ages In the United States Catholic schools developed as a response to anti Catholic bias that was rampant during the nineteenth century Catholic schools developed to move their immigrant and first generation American youth from the Catholic ghetto to successful careers and lives in the American mainstream However most importantly Catholic schools have brought Christ to generations of youngsters It remains the continuing call of the Catholic school to be a center of Evangelization a place where Gospel values live in the lives of faculty students and parents This text attempts to integrate the unique challenges of the

instructional leader of the institution with the historical and theological underpinnings of contemporary Catholic education
