**Interpersonal Interactions and Language Learning**  
Shin Yi Chew, Lee Luan Ng, 2021-04-13 This book takes as its starting point the assumption that interpersonal communication is a crucial aspect of successful language learning. Following an examination of different communicative models, the authors focus on traditional face-to-face (F2F) interactions before going on to compare these with the forms of computer-mediated communication (CMC) enabled by recent developments in educational technology. They also address the question of individual differences, particularly learners' preferred participation styles, and explore how F2F and CMC formats might impact learners differently. This book will be of interest to students and scholars of computer-mediated communication (CMC), computer-assisted language learning (CALL), technology-enhanced language learning (TELL), language acquisition, and language education more broadly.

**The Fundamentals of Management and Their Possible Changes Due to the Impact of the COVID-19 Pandemic**  
Juraj MIŠÚN, Martin NOVYSEDLÁK, Ivana MIŠÚNOVÁ, HUĐÁKOVÁ, 2023-09-14 *From Knowledge Management to Learning Organisation to Innovation*

Fawzy Soliman, 2015-01-12 This book propagates the argument that innovation is heavily influenced by learning, which in turn is driven by knowledge. This means that extensive knowledge as a basis for good knowledge management is necessary for learning that is suitable for innovation. Since previous studies have not paid enough attention to determining which types of knowledge can be suitable or defective, this book serves to fill the void through a number of well-written articles by some of the most renowned and respected names in the fields of knowledge management, learning, and innovation. *From Knowledge Management to Learning Organisation to Innovation* offers readers the chance to further enhance their understanding of the knowledge management and learning practices that are relevant to organizational activities. This volume is also designed to alert the management of all organisations to the risks that they could face if the innovation process is not carefully managed. It is particularly unique because of the assistance it offers to companies in avoiding exposing themselves to unnecessary problems should they not ensure that appropriate knowledge and learning processes have taken place.

With applied examples and a vibrant and engaging design, this text covers all the expected topics in an introductory course: foundations of communication, interpersonal communication, small group communication, and public speaking, plus a special appendix on interviewing. Scenarios begin each chapter with a problem to which students can relate and then solve as they learn about the concepts discussed in each chapter. A concentrated focus on careers in communication is highlighted in a two-page spread near the end of each chapter, bringing home the relevance of communication outside the classroom and helping students learn more about how studying communication can help them throughout their lives. Additional emphasis on topics such as ethics, culture, gender, and technology is found throughout the text.
