Thank Heaven... Leslie Caron, 2011-04 Spotted by Gene Kelly in Paris when she was just 17 and a member of Roland Petit's legendary ballet company Leslie Caron became an overnight sensation when Kelly brought her to Hollywood to co star with him in *An American in Paris* She recalls the days of all night parties where Judy Garland would try out her songs Gregory Peck smiled at you on the sidewalk the Duke of Windsor turned up to watch the filming and Elizabeth Taylor came to supper The toast of the town Leslie Caron went on to star in a series of famous films which she writes about with endearing candour including such classics as *Lili* *Daddy Long Legs* with Fred Astaire *Gigi* with Maurice Chevalier *Fanny* and *the L Shaped Room* However her story starts in occupied Paris and she describes vividly her family's changing fortunes under the Germans and her early successes as a young ballerina in Paris before her move to Hollywood Never less than frank Caron talks about the many men in her life including her second husband Peter Hall and Warren Beatty with whom she had a two year love affair nor does she shrink from describing her more recent battles with alcoholism and depression and movingly her triumphant recovery and continuing success in television and films including *Damage* and *Chocolat* and her adventures in converting an old warehouse in Burgundy into a lovely auberge With friends that have included Jean Renoir Vincent Minelli and Rudolf Nureyev Leslie Caron's story is rich colourful and entertaining Leslie Caron now lives in Paris

Blink Malcolm Gladwell, 2007-04-03 From the 1 bestselling author of *The Bomber Mafia* the landmark book that has revolutionized the way we understand leadership and decision making In his breakthrough bestseller *The Tipping Point* Malcolm Gladwell redefined how we understand the world around us Now in *Blink* he revolutionizes the way we understand the world within *Blink* is a book about how we think without thinking about choices that seem to be made in an instant in the blink of an eye that actually aren t as simple as they seem Why are some people brilliant decision makers while others are consistently inept Why do some people follow their instincts and win while others end up stumbling into error How do our brains really work in the office in the classroom in the kitchen and in the bedroom And why are the best decisions often those that are impossible to explain to others In *Blink* we meet the psychologist who has learned to predict whether a marriage will last based on a few minutes of observing a couple the tennis coach who knows when a player will double fault before the racket even makes contact with the ball the antiquities experts who recognize a fake at a glance Here too are great failures of blink the election of Warren Harding New Coke and the shooting of Amadou Diallo by police *Blink* reveals that great decision makers aren t those who process the most information or spend the most time deliberating but those who have perfected the art of thin slicing filtering the very few factors that matter from an overwhelming number of variables

Corcoran Gallery of Art Corcoran Gallery of Art, Sarah Cash, Emily Dana Shapiro, Jennifer Carson, 2011 This authoritative catalogue of the Corcoran Gallery of Art s renowned collection of pre 1945 American paintings will greatly enhance scholarly

and public understanding of one of the finest and most important collections of historic American art in the world Composed of more than 600 objects dating from 1740 to 1945 Trust in Numbers Theodore M. Porter,2020-08-18 A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods The usual answer is that quantification is desirable in social investigation as a result of its successes in science Trust in Numbers questions whether such success in the study of stars molecules or cells should be an attractive model for research on human societies and examines why the natural sciences are highly quantitative in the first place Theodore Porter argues that a better understanding of the attractions of quantification in business government and social research brings a fresh perspective to its role in psychology physics and medicine Quantitative rigor is not inherent in science but arises from political and social pressures and objectivity derives its impetus from cultural contexts In a new preface the author sheds light on the current infatuation with quantitative methods particularly at the intersection of science and bureaucracy
