The Politics and Art of John L. Stoddard Michaelene Cox, 2015-01-16 This book is a historical and critical assessment of contributions by American writer and lecturer John Lawson Stoddard (1850-1931). It is the first scholarly effort to provide visual and literary analyses of his illustrated travel works and political writings. It claims that Stoddard was a principle engine behind movements toward transforming tourism into a growing consumer culture, democratizing liberal arts education, and fueling anti-WWI campaigns. By the late 1870s, John Lawson Stoddard had played a major role in transforming the aristocratic Grand Tour into a mass cultural phenomenon. His photographs and accompanying public lectures on distant places and peoples caught the attention of decision makers in the U.S. government, but perhaps more importantly, his images and text were imprinted in the minds of millions of audience members. This book suggests how critical approaches borrowed from the interdisciplinary literature of visual culture are helpful in assessing the imagery and identity of a nineteenth-century American travel lecturer and author. It uncovers buried aspects of the personal and public life of Stoddard and reveals his significant contributions to American political and social history.

Forget Photography Andrew Dewdney, 2021-10-19 Why we must forget photography and reject the frame of reality it prescribes and delineates The central paradox this book explores is that at the moment of photography's replacement by the algorithm and data flow photographic cultures proliferate as never before The afterlife of photography residual as it may technically be maintains a powerful cultural and representational hold on reality which is important to understand in relationship to the new conditions Forgetting photography is a strategy to reveal the redundant historicity of the photographic constellation and the cultural immobility of its epicenter It attempts to liberate the image from these historic shackles forged by art history and photographic theory More important perhaps forgetting photography also entails rejecting the frame of reality it prescribes and delineates and in doing so opens up other relationships between bodies times events materials memory representation and the image Forgetting photography attempts to develop a systematic method for revealing the limits and prescriptions of thinking with photography which no amount of revisionism of post photographic theory can get beyond The world urgently needs to unthink photography and go beyond it in order to understand the present constitution of the image as well as the reality or world it shows Forgetting photography will require a different way of organizing knowledge about the visual in culture that involves crossing different knowledges of visual culture technologies and mediums It will also involve thinking differently about routine and creative labor and its knowledge practices within the institutions and organization of visual reproduction
