In terms of raw numbers, the amount of world urban dwellers have increased four-fold, skyrocketing from 740 million in 1950 to almost 3.3 billion in 2007. Examines responses to urban problems The book draws on the practical experiences of police officials and the academic insights of researchers from around the world to detail the consequences of urbanization — crime, terrorism, disorder, drugs, traffic crashes — as well as modern responses to those problems. An objective, comprehensive, and accessible examination of today's most crucial problem: preserving the environment in the face of society's insatiable demand for energy. In *Energy at the Crossroads*, Vaclav Smil considers the twenty-first century's crucial question: how to reconcile the modern world's unceasing demand for energy with the absolute necessity to preserve the integrity of the biosphere. With this book he offers a comprehensive, accessible guide to today's complex energy issues—how to think clearly and logically about what is possible and what is desirable in our energy future. After a century of unprecedented production growth, technical innovation, and expanded consumption, the world faces a number of critical energy challenges arising from unequal resource distribution, changing demand patterns, and environmental limitations. The fundamental message of *Energy at the Crossroads* is that our dependence on fossil fuels must be reduced not because of any imminent resource shortages but because the widespread burning of oil, coal, and natural gas damages the biosphere and presents increasing economic and security problems as the world relies on more expensive supplies and Middle Eastern crude oil. Smil begins with an overview of the twentieth century's long-term trends and achievements in energy production. He then discusses energy prices, the real cost of energy, and "energy linkages"—the effect energy issues have on the economy, on quality of life, on the environment, and in wartime. He discusses the pitfalls of forecasting, giving many examples of failed predictions and showing that unexpected events can disprove complex models. And he examines the pros and cons not only of fossil fuels but also of alternative fuels such as hydroenergy, biomass energy, wind power, and solar power. Finally, he considers the future, focusing on what really matters, what works, what is realistic, and which outcomes are most desirable. *Corporate Financial Reporting Analysis* combines comprehensive coverage and a rigorous approach to modern financial reporting with a readable and accessible style. Merging traditional principles of corporate finance and accepted reporting practices with current models enable the reader to develop essential interpretation and analysis skills, while the emphasis on real-world practicality and methodology provides seamless coverage of both GAAP and IFRS requirements for enhanced global relevance. Two decades of classroom testing among INSEAD MBA students has honed this text to provide the clearest, most comprehensive model for financial statement interpretation and analysis; a concise, logically organized pedagogical framework includes problems, discussion questions, and real-world case studies that illustrate applications and current practices, and in-depth examination of key topics clarifies complex concepts and builds professional intuition. With insightful coverage of revenue recognition, inventory accounting, receivables, long-term assets, M&A, income taxes, and other principle topics, this book provides both education and ongoing reference for MBA students. In recent decades, the North American public has pursued an inspirational vision of successful aging—striving through medical technique and individual effort to eradicate the declines, vulnerabilities, and dependencies previously commonly associated with old age. On the face of it, this bold new vision of successful, healthy, and active aging is highly appealing. But it also rests on a deep cultural discomfort with aging and being old. The contributors to *Successful Aging as a Contemporary Obsession* explore how the successful aging movement is playing out across five continents. Their chapters investigate a variety of people, including Catholic nuns in the United States; Hindu ashram dwellers; older American women seeking plastic surgery; aging African-American lesbians and gay men in the District of Columbia; Chicago home health care workers and their aging clients; Mexican men foregoing Viagra; dementia and Alzheimer sufferers in the United States and Brazil; and aging policies in Denmark, Poland, India, China, Japan, and Uganda. This book offers a fresh look at a major cultural and public health movement of our time, questioning what has become for many a taken-for-granted goal—aging in a way that almost denies aging itself. This series has been developed for the Cambridge Lower Secondary Global Perspectives Curriculum Framework (1129). This was the first introductory text to use a truly comparative global approach to teach sociological concepts and ideas. Some texts claim to be global by including global boxes; however, the entire Ferrante text is written from this perspective. Ferrante uses an in-depth examination of life in other countries to help students understand sociological concepts while also providing comparison to the United States. By integrating throughout each chapter the connections to American society, this text gives students a broader understanding of sociological concepts, global interdependence, and societal differences as well as similarities. Integrating historical, biological, archaeological, and applied approaches with ethnographic data from around the world, *Anthropology: A Global Perspective* is founded on four essential themes: the diversity of human societies; the similarities that tie all humans together; the interconnections between the sciences and humanities; and a new theme addressing psychological essentialism. This book explores Korean literature from a broadly global perspective from the mid-9th century to the present, with special emphasis on how it has been influenced by, as well as it has influenced, literatures of other nations. Beginning with the Korean version of the King Midas and his ass's ears tale in the Silla dynasty, it moves on to discuss *Ewa*, what might be called the first missionary novel about Korea written by a Western missionary W. Arthur Noble. The book also considers the extent to which in writing fiction and essays Jack London gained grist for his writing from his experience in Korea as a Russo-Japanese War correspondent. In addition, the book explores how modern Korean poetry, fiction, and drama, despite differences in time and space, have actively engaged with Western counterparts. Based on *World Literature*, which has gained slow but prominent popularity all over the world, this book argues that Korean literature deserves to be part of the Commonwealth of Letters.
