Laboratory Manual for General Chemistry Aug 28 2023 By Stephanie Dillon with contributions from Sandra Chimon Peszek, DePaul University Laboratory Manual for General Chemistry: Atoms First, Second Edition is organized using the atoms first approach and is written to correspond with the Second Edition of General Chemistry: Atoms First by McMurry/Fay. This manual contains twenty-four experiments with a focus on real world applications, following an intuitive logic progressing from the simplest building blocks to successively more complex concepts. Each experiment covers one or more topics discussed within a chapter of the textbook to help students understand the underlying concepts covered in the lecture course. Additionally, each experiment contains a set of pre-laboratory questions (also assignable in MasteringChemistry), an introduction, a background section explaining concepts that each student is expected to master for a full understanding of the experimental results, a step-by-step procedure (including safety information), and a report section featuring post-laboratory questions. Note: This is the standalone book (Laboratory Manual for General Chemistry: Atoms First, Second Edition) if you want the book/access card order the ISBN below: You must have the Instructor ID to access MasteringChemistry. 0321913329 / 9780321913326 General Chemistry: Atoms First Plus MasteringChemistry with eText -- Access Card Package & Laboratory Manual for General Chemistry: Atoms First Package\* Package consists of: 032180483X / 9780321804839 General Chemistry: Atoms First Plus MasteringChemistry with eText -- Access Card Package 0321813375 / 9780321813374 Laboratory Manual for General Chemistry: Atoms First
