**The classic introduction to the fundamentals of calculus Richard Courant's classic text**

**Differential and Integral Calculus is an essential text for those preparing for a career in physics or applied math. Volume 1 introduces the foundational concepts of "function" and "limit", and offers detailed explanations that illustrate the "why" as well as the "how". Comprehensive coverage of the basics of integrals and differentials includes their applications as well as clearly-defined techniques and essential theorems. Multiple appendices provide supplementary explanation and author notes, as well as solutions and hints for all in-text problems.**

**Globalization, Deglobalization, and New Paradigms**

***in Business Jan 20 2022 This book analyzes the changing dynamics of competition and the emergence of deglobalization trends and processes. The authors begin by explaining the role of technology on globalization and its impact on competitive strategy. Then, they present a theoretical framework that outlines the connection between globalization and modern society. The book also delves into the shift toward deglobalization and addresses how the onset of the COVID-10 pandemic has accelerated the process. Concluding with a discussion of how the 4th Industrial Revolution has resulted in new paradigms for business, this book will fill a gap through its investigation of an emerging concept for scholars in international business.***

***The Sharing Economy in Europe May 12 2021 This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital***

***platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.***
