This publication is a reproduction of the August 1969 BMW factory workshop manual part number 01 51 9 099 051. This manual is applicable to all 1969 through 1973 BMW R50/5 R60/5 and R75/5 motorcycles. At the time of Floyd's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication. This BMW motorcycle manual is one of those previously unpublished, Floyd Clymer publications. Dated August 1969, this manual was obviously intended to be a 'follow up' from his previous 1967 BMW R50 & R26 series manual. The original 1969 'proof' copy that was included in the Floyd Clymer archives was likely finalized in early 1970. However, as the BMW /5 series of motorcycles remained in production through 1973, we are pleased to present a newly prepared edition of Floyd's work as a service to all BMW motorcycle enthusiasts worldwide. Unfortunately, owners of the 1969-1973 BMW /5 series models are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various manuals that have recently flooded the marketplace. We encourage you to exercise caution when purchasing a manual for your motorcycle or automobile as many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality, comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned', 'used' or even 'refurbished'. In addition, they are often advertised for the incorrect series and/or model years. Originally published by Floyd Clymer this is a faithful reproduction of the 1969 publication of that manual. By far the most comprehensive manual ever published for the 912 Porsche it includes complete technical data, service and maintenance information and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic automobiles. There are separate sections that deal with the repair and overhaul procedures for the engine, ignition system, fuel system, clutch, transmission, rear suspension, steering, front suspension, brakes, heater, exhaust and emission control system plus a detailed electrical system section including wiring diagrams. There is a comprehensive chapter on routine service, maintenance and tune ups plus detailed technical specifications and maintenance charts. In addition, there is a separate section that includes a copy of the Factory Owner's Manual originally supplied with the car when it was new. This is a - must have - reference for any Porsche 912 enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior purchasing of one of these classic automobiles. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Porsche enthusiasts worldwide. A unique Haynes Manual, providing fascinating technical insight into the development and use of rocket planes, focusing on the iconic X-15, which carried out much of the development work for the Apollo and Space Shuttle space programmes. As of July 2015, the X-15 still holds the world record for the highest speed ever attained by a manned aircraft, at 4,520mph (Mach 6.72)! The X-15 was flown by a band of elite test pilots, including the first man to walk on the Moon, Neil Armstrong. The X-15 made 199 flights between 1959 and 1968, several of which were above the line considered to be the arbitrary altitude where space begins. The engaging text, extensively illustrated with period photographs and technical illustrations, explains how the vehicle worked, what it pioneered for future applications in more conventional aircraft and manned spacecraft developed by NASA from 1958, and what it was like to fly. Rover 75 & MG ZT Saloon & Estate (Tourer / ZT-T). Does NOT cover 4.6 litre V8 rear-wheel-drive models. Petrol: 1.8 litre (1796cc) 4-cyl, inc. turbo, and 2.0 litre (1997cc) & 2.5 litre (2497cc) V6.
