History of the Electric Automobile Mar 09 2022 For more than a century, people have attempted to harness electricity, the clean and versatile fuel, for personal transportation. With impressive technical clarity and historical insight, author Ernest Wakefield reviews these attempts in History of the Electric Automobile: Hybrid Electric Vehicles. He focuses exclusively on electric vehicles that harness the potential of electricity when combined with another energy source - hybrid electric vehicles (HEV). The book details the historical development of capacitors, engines, flywheels, fuel cells, inductive charging, and solar cells - and the application of each to hybrid electric vehicles.

SAAB 99 & 900 Sep 14 2022 Saab 99 and 900 is a detailed account of the cars that came from Saab, the aeroplane maker, whose first car - the 92 model - set the standard for advanced design epitomized by the 99 and 900 cars. The author delves deep into the cars' design and history, and into the core Saab values that they carried into production. Topics include: detailed design history of the 99 and 900; year-by-year developments; technically detailed engineering overviews; detailed specifications; advice on owning and buying and, finally, coverage of rallying and special models.

Ford Taurus Jul 05 2024 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 29. Chapters: Mercury Sable, Ford Taurus SHO, Ford SHO V6 engine, List of Ford Taurus models, Ford Five Hundred, Ford Taurus X, Ford SHO V8 engine. Excerpt: The Mercury Sable is a mid-size (model years 1986-2005) or full-size

(2008-2009) upscale sedan car model created by the Ford Motor Company and sold under the Mercury brand. It served as a rebadged variant of the Ford Taurus, with a few cosmetic changes. The Sable was a milestone design for both Mercury and the entire American automotive industry, as well as a very influential vehicle in the marketplace, with Mercury assembling 2,112,374 cars during its first 20 years of production through 2005. The Sable's design was so futuristic, that it was called by the press "The car that came from the moon." An important feature of the Sable's design was its front "lightbar," a low-wattage lamp between the front headlamps. This later became mainstream for Mercury's line-up, and was copied by many automakers in the early nineties. The Sable was refreshed in 1992 and received its first complete redesign in 1996. The 1996 model remained the basis for the vehicle up through the 2005 model year. A major sheet metal and interior redesign occurred in 2000, softening some of the controversial design vestiges of the 1996 model which the Taurus also endured. Minor styling changes in 2004 further refined the car. The Sable station wagon ended production in 2004 and sedan production ended on April 29, 2005. The Ford Taurus remained in production through the 2007 model year, primarily for service as a fleet vehicle. Taurus production ended on October 27, 2006. At the Chicago Auto Show on February 7, 2007, Ford CEO Alan Mulally unveiled a refreshed version of the Mercury Montego sedan and announced that the new name of the car would be "Sable," due to customer recognition and dealer demand....

The Psychology of the Car Apr 29 2021 The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low-carbon transport future. Worldwide there are now more than one billion cars, and their number grows continuously. Yet there is growing evidence that humanity needs to reach 'peak cars' as increased air pollution, noise, accidents, and climate change support a decline in car usage. While many governments agree, the car remains attractive, and endeavors to change transport systems have faced fierce resistance. Based on insights from a wide range of transport behaviors, The Psychology of the Car shows the "why of automotive cultures, providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future. The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global environment. It

looks at the adoption of the car into lifestyles, the “mobilities turn, and how the car impacts collective and personal identities. The book examines car drivers themselves; their personalities, preferences, and personality disorders relevant to driving. The book looks at the role power, control, dominance, speed, and gender play, as well as the interrelationship between personal freedom and law enforcement. The book explores risk-taking behaviors as accidental death is a central element of car driving. The book addresses how interventions can be successful as well as which interventions are unlikely to work, and concludes with how a more sustainable transport future can be created based on emerging transport trends. Features deep analyses of individual and collective psychologies of car affection, moving beyond sociology-based interpretations of automobile culture Illustrates concepts using popular culture examples that expose ideas about automobility Shows how fewer, smaller and more environmentally friendly cars, as well as low-carbon transport modes, are more socially attractive
