Traces a father and son journey around South America in a tiny boat they built together In 1996, the author and her husband sailed from Phuket, Thailand to Cyprus as part of a multi-year circumnavigation of the globe. While traveling through the Red Sea, they were arrested and detained for questioning by Eritrean soldiers for 23 days. She offers a memoir of the entire trip, with a day- The Atlantic Crossing Guide is a complete reference for anyone planning an Atlantic passage in their own boat. It is described by Yachting World magazine as 'An invaluable mixture of planning manual and pilot book, and an essential investment if you're planning to cross the Pond.' From ideal timing, suitable boats, routes, methods of communication and provisioning to sources of regional weather information, hurricane tracks, currents and tides, departure and arrival ports, facilities on arrival and documentation required, the comprehensiveness of this new edition will both inspire dreamers and instill confidence in those about to depart. This is the definitive reference on the subject, relied upon by many thousands of cruisers crossing the Atlantic in both directions and packed with all the information they need. 'I cannot imagine setting sail without it' - SAIL magazine (US) In 2020, Christiaan De Beukelaer spent 150 days covering 14,000 nautical miles aboard the schooner Avontuur, a hundred-year-old sailing vessel that transports cargo across the Atlantic Ocean. Embarking in Santa Cruz de Tenerife, he wanted to understand the realities of a little-known alternative to the shipping industry on which our global economy relies, and which contributes more carbon emissions than aviation. What started as a three-week stint of fieldwork aboard the ship turned into a five-month journey, as the COVID-19 pandemic forced all borders shut while crossing the ocean, preventing the crew from stepping ashore for months on end. Trade winds engagingly recounts De Beukelaer's life-changing personal odyssey and the complex journey the shipping industry is on to cut its carbon emissions. The Avontuur's mission remains crucial as ever: the shipping industry urgently needs to stop using fossil fuels, starting today. If we can't swiftly decarbonise shipping, we can't solve the climate crisis. Alan Bond was a child of London, shaped by the horrors of World War II. He survived the worst of the London Blitz era before being sent to live in Devon. Even though he was sent away for his own safety, life with his elderly relatives compared rather unfavourably with life among the falling bombs. As a young man, he decided upon a career in medicine. After earning his degree at university, he followed another dream of life abroad. He settled in Tasmania to work as an anaesthetist. This new existence proved too challenging for his marriage to survive, so he started over again as a single man. But life had other plans in store for this adventurer. He met the Blonde, and his life changed forever. Now retired, he and his Australian lady shared a time of adventure on the high seas, during the often challenging waters of the Tasman Sea and the Bass Strait. On board their boat, a wooden cutter, they explored the beautiful coasts of Tasmania and uncovered some of the ghosts of the state's colonial past. Alan Bond's story is one of adventure, loss, and newfound love, of second chances, surprises, and dreams pursued and achieved. The chain of islands from the Virgins to the southern Lesser Antilles is one of the most desirable tropical cruising grounds as well as the most accessible for North American and European sailors. The Caribbean Sea is usually benign but the conditions are very different from your home waters—you must learn to sail with the grain of wind, weather, current, and climate, or these forgiving waters will turn into a punishingly rough old sea. This updated third edition of Caribbean Passagemaking is an entertaining mine of information for the sun-soaked passage planner as well as the dreamer back home. Here is the full, vital background to help skipper and crew enjoy sailing the Caribbean islands. 'I cannot imagine setting sail without it' SAIL 'A must for all aspiring ocean crossers' Yachting World We call it 'The Pond', yet the Atlantic Ocean covers one fifth of the surface of our planet and one third of its surface area of water. It is still a mighty big pond to cross! Realising the dream of an Atlantic crossing remains a challenge but the rewards are many and lifelong. The Atlantic Crossing Guide is well established as the standard reference for anyone planning an Atlantic voyage, whether via the trade wind route to the Caribbean or to Europe from the United States. The better prepared you are the greater your chances of success. Packed full of the collective wisdom of cruising sailors over four decades, this new edition has been updated to include advice on: PREPARATIONS · suitable boats, including considerations of hull integrity · equipment and maintenance · advances in navigation and communications systems · access to weather and routing information · the balance of power input and usage · planning for hurricane season · risk management · crew harmony and health · provisioning PASSAGE PLANNING · Atlantic weather systems, including tropical waves and hurricanes · common routes and timings across the Atlantic · seasonal cruising along bordering coasts and within Atlantic island groups · fog and ice in the higher latitudes · key landfalls 'A fantastic amount of information' Yachting Monthly The Complete Book addresses anchoring systems, techniques, and permanent moorings for boats from 12 to 80 feet in length. It covers monohulls, multihulls, light displacement sailboats, cruisers, sportfishers, passagemakers, and workboats. In short, it is for all recreational and working boats in this size range. The book deals not only with anchor behavior, but also with the rode assembly, riding stoppers, and the human factors. What formerly was thought of as strength through size (heavy anchors and large rodes) has been refined to decrease weight, lighten loads on the boat, and reduce difficulty in handling. Utilizing a systems approach with respect to equipment and techniques and analytical methods for loads, Earl R. Hinz has made a number of contributions to the state of the art. Among them are bow anchor roller design, chain locker and navel pipe design, elastic anchoring techniques, tandem anchor systems design, and designs for permanent moorings. Sections on ground tackle selection, tandem anchoring techniques, anchoring in coral, and improving hurricane moorings have been revised. Most of these designs and techniques are clearly illustrated in the schematic drawings by Richard R. Rhodes. The latest information on electric windlass troubleshooting, new anchor designs, anchor test data, use of screw anchors for more secure moorings, design of moorings for coral seabeds, and anchoring jurisdictional conflicts makes this second edition a state-of-the-art source book for the boating world. A story of adventure on a small boat, for fathers, for sons, and for those who love them. On this voyage the father relinquishes control, the son becomes the captain, and before long they are utterly alone, with only the huge waves of Cape Horn, a compass, a sextant, a pet cat, and the tiny boat they've built together. "The account of the passage, related in alternating sections by father and son, will be read with delight 100 years from now."--William F. Buckley, The New York Times Book Review, front page; "A must read for sailors of the sea and of the heart."--Eco Traveler. Over three months as a New York Times Bestseller.
