Moving toward Universal Coverage of Social Health Insurance in Vietnam Feb 04 2021 Over the past two decades Vietnam has made enormous progress towards achieving universal coverage (UC) for its population. Significant challenges remain, however, in terms of improving equity with continuing low rates of enrollment. Ensuring financial protection also remains an elusive goal. The Master Plan for Universal Coverage approved in 2012 by the Prime Minister directly addresses both these deficiencies in coverage. The objective of this report is to assess the implementation of Vietnam SHI and provide options for moving towards UC. This is a joint assessment with development partners, World Health Organization, United Nations Children's Fund (Unicef) and Rockefeller Foundation.

Expanding breadth of coverage, particularly for those hard to reach groups such as the near-poor and informal sector would require substantially increasing general revenue subsidies and fully subsidizing the premiums for the near-poor. High enrollment rates would, however, have little impact on financial protection and equity if OOP costs remain high. Achieving UC will require sustained efforts to improve efficiency in the system, and gain better value for money from available budgetary resources; without these efforts, any further progress towards UC would be financially unsustainable. There is considerable scope for improving efficiency in Vietnam. Fragmentation in the pooling of funds gives rise to unnecessary costs. Inefficiencies in resource allocation and purchasing arrangements include: (i) an overly generous benefits package; (ii) provider payment mechanisms and the mix of incentives facing providers which result in an oversupply of services; (iii) high prices, overconsumption and inappropriate use of pharmaceuticals; and (iv) the structure and incentives embedded within the delivery system. The organization, management and governance of SHI are fragmented and often dysfunctional. The present institutional setting for SHI needs to be assessed and changed.

Museum Innovation and Social Entrepreneurship Apr 08 2021 Museum Innovation and Social Entrepreneurship makes a contribution towards building a museum perspective of innovation that takes into consideration the unique role of museums in society. Beginning and ending with the idea of museum innovation in a wider sense, the book takes digital innovation as a particular focus. Drawing on innovation theories from business studies and case studies from national museums in the US and the UK, as well as numerous examples of innovative museum projects around the globe, the author unpacks, in practical terms, what it means for museums to be innovative and socially enterprising. As a result, Eid presents a research-based model of innovation in museums, which is flexible enough to be fully or partially adopted by any museum, regardless of size, location, mission or nature of the collections it houses. As such, this model makes innovation in museums scalable, replicable and feasible to start and operate. Supplying the museum studies field with essential terminologies and conceptual frameworks related to innovation, Museum Innovation and Social Entrepreneurship helps to forge new ideas and create common ground with other disciplines. Therefore, the book should be essential reading for academics, researchers and graduate students working in the fields of museum and heritage studies, digital humanities and business studies. It should also be of great interest to practitioners working in museums around the globe.

A Practical Introduction to Homeland Security Jul 12 2021 This text provides students with a practical introduction to the concepts, structure, politics, law, hazards, threats, and practices of homeland security everywhere, focusing on US "homeland security," Canadian "public safety," and European "domestic security." It is a conceptual and practical textbook, not a theoretical work. It is focused on the knowledge and skills that will allow the reader to understand how homeland security is and should be practiced. Globalization, population growth, migration, technology, aging infrastructure, and the simple trend to higher expectations are making homeland security more challenging. Yes, homeland security really is a global problem. The hyperconnectivity of today's world has reduced the capacity of the United States to act unilaterally or to solve homeland risks from within the borders alone. Newsome and Jarmon explain the relevant concepts, the structural authorities and responsibilities that policymakers struggle with and within which practitioners must work, the processes that practitioners and professionals choose between or are obliged to use, the actual activities, and the end-states and outputs of these activities. Moreover, this book presents the concept of homeland security as an evolving experience rather than an artifact of life since 2001. It is a profession that requires some forming from the ground up as well as the top down.

*Recent Innovative Trends in Interdisciplinary Research Areas Vol. 2* Nov 27 2022 An edited book (2nd Volume) is a compilation of academic chapters produced by several authors to share their perspectives and experiences on a certain subject. The chapters of the edited book, which are written by many writers, go through a peer-reviewing procedure to confirm their quality. The volume editor next manages the uniformity of style and material flow. The chapters in the edited book should be the author's own unpublished original works. If they are carefully planned and edited well, edited volumes can be excellent books. A successful edited book is more than just a longer version of a journal issue with a similar theme; it is also a complete intellectual undertaking that should be treated as such from the outset.

Germany's Role in the Euro Crisis Jun 22 2022 This book analyses Germany's role in the euro crisis. Based on the perception of Berlin as the emerging capital of the European Union, the author investigates three interrelated issues: Did the German policy approach of imposing austerity programs on countries in the middle of a deep recession contribute to the successful management of the euro crisis? Does Germany extend its sway over its European partners by forcing them to surrender to the German diktat of fiscal Discipline and economic efficiency? Is the stubborn insistence on rigid fiscal adjustment another ominous sign of the Berlin Republic moving away from the country's traditional European vocation toward an imperial leadership role? The book's main argument is that Germany's role in and responses to the euro crisis can best be explained by different concepts of self, historical memory, and institutional practices.

**AMERICA'S SHRINKING MIDDLE CLASS** Sep 06 2023 What does a middle class nation do without a middle class? An abundance of evidence suggests that we here in the United States are about to find out. America's Shrinking Middle Class documents trends that have been building not just since the Great Recession, but for over four decades. In 1970, the share of U.S. income that went to the middle class was 62 percent. By 2010 that figure had fallen to 45 percent. In that same year, the median income for middle class Americans had gone from \$72,956 to \$69,487 a decline of nearly 5 percent in just one year. A shrinking middle class would mean a shrinking economy and an America dominated by a growing lower class. Life would be less comfortable, less prosperous, and less secure. With less money coming in to government and businesses alike, tax burdens would become onerous. One example: Obamacare. It could cost the average taxpayer nearly \$6,000 in extra taxes and create a total of 20 new taxes or tax hikes. For a weakened and shrinking middle class, it could be a fatal blow.

**Catholic Theology of Marriage in the Era of HIV and AIDS** Feb 28 2023 Marriage for Life begins by listening to the lived experiences of Catholic, married, HIV-positive women, in order to better understand their struggles. The eight women interviewed in Chicago, Illinois, USA, shared their stories of marriage, of family life, of church involvement, and of living with HIV. Their candid reflections offer a fresh and grounded perspective on the challenges of living with HIV in a US context. After listening to and learning from these women's experiences, Reimer-Barry constructs a theology of Christian marriage that is life-giving in a world with AIDS. While

Catholic teachings have developed and now affirm the equal dignity of women and men, troubling legacies of women's subordination remain embedded in liturgical practices and theological texts. Arguing that self-care is an indispensable component of a healthy marriage, Reimer-Barry constructs a life-affirming theology of marriage that is sensitive to the struggles of her collaborators. She argues that marriage for life must promote the full flourishing of both partners, respect wives as equal partners with their husbands, and offer a coherent and empowering sexual ethic. Building on the wisdom of her collaborators' lived experiences, Reimer-Barry examines the need for a more adequate Catholic response to HIV and AIDS, arguing that church communities should promote comprehensive sexual education, affirm both abstinence and condom use for HIV prevention, and actively work to reduce stigmatizing behaviors within church communities. She also unpacks the implications of marriage for life for Catholic liturgical practice, marriage preparation programs, sexual education programs, and family ministries. Modeling her method on what Pope Francis calls the "art of accompaniment," Reimer-Barry argues that Catholic theology of marriage must be renewed and updated so that all can plainly understand that marriage is for life.

**Admissions by Design** Mar 08 2021 The race to matriculate into the most-prestigious-university-possible is killing America's students. There is a better way! Admissions by Design is a poignant, unorthodox, and thorough guide that upends the traditional paradigm of college admissions. Incorporating the latest research in brain science and human development and using stories from her nearly 20 years of work with students, Lisa Fisher offers students practical tools to reframe the college admissions process to one of an inspired and authentic journey toward self-discovery. Building from the root of the word "admission," meaning "toward purpose," and tying the college admissions process to the development of self and to emerging trends in economic development, the author argues that the admissions process shouldn't be about getting into a prestigious "name" school, but about a journey to knowing one's self, heeding one's callings, and identifying the "right fit" school that will serve as the catalyst to embracing a purpose-led life. Presenting facts and details about the ways in which the current system of college admissions negatively impacts students, the author challenges prevailing methods and offers new ideas and solutions to reinvent the approach to college admissions to be more humanistic and student-centered. This practical guide challenges students to define and pursue their unique paths and offers hands-on tools to help students in their process of self-discovery and in identifying and applying to the "right fit" college.

**Regulating Telecommunications in South Africa** Sep 25 2022 This book provides the first full account of the 20-year story of universal access and service in South Africa's ICT sector. From 1994 the country's first democratic government set out to redress the deep digital divide afflicting the overwhelming majority of its citizens, already poor and disenfranchised, but likewise marginalised in access to telephone infrastructure and services. By this time, an incipient global policy regime was driving reforms in the telecomms sector, and also developing good practice models for universal service. Policy diffusion thus led South Africa to adopt, adapt and implement a slew of these interventions. In particular, roll-out obligations were imposed on licensees, and a universal service fund was established. But an agency with a universal service mandate was also created; and licences in under-serviced areas were awarded. The book goes on to identify and analyse the policy success and failure of each of these interventions, and suggests some lessons to be learned.

*A Chronicle of Echoes* Mar 12 2024 "Corporate reform" is not reform at all. Instead, it is the systematic destruction of the foundational American institution of public education. The primary motivation behind this destruction is greed. Public education in America is worth almost a trillion dollars a year. This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school.

*Working through Surveillance and Technical Communication* Nov 08 2023 What is surveillance, and why should we care? Why are those who use technology susceptible to being both agents and targets of contemporary surveillance practices? Working Through Surveillance and Technical Communication addresses these questions, discussing what it means to engage in surveillance, examining why this participation may be problematic, and offering entry points into assessing one's ethical and socially just involvement with surveillance. Further, the book suggests ways to resist both individually and collectively, and it offers pedagogical entry points for those looking to talk about surveillance with others. Led by the central questions, "How are technical communicators also surveillance workers?" and "Why does this matter for technical communication and surveillance scholarship?" the text uses the example of Edward Snowden to illustrate how technical communicators and surveillance workers exist on an often-overlapping range. Sarah Young highlights the potentially discriminatory nature of surveillance and argues that recognizing and evaluating surveillance is increasingly important in a data-driven world. **Sustainable Brownfield Development** May 14 2024 While industrial and chemical innovations have contributed extensively to human advancement, the darker part of their legacy has been the hundreds of thousands of polluted sites left behind. Governments at all levels have rallied to support the remediation and reuse of these land resources and put many of the nation's brownfields back into productive use. This book presents two dozen brownfield projects in the United States that have incorporated sustainability, highlighting project features, best management practices, and lessons from the field regarding the underlying policies and practices that enabled these projects to be completed or, in some cases, stalled, altered or abandoned. The case studies represent an array of brownfield projects that aimed to go beyond conventional practice and include a range and variety of end uses (e.g., corner gas stations, industrial, office, residential, brightfields, green space, mixed-use, and transit-oriented developments). The cases investigate site histories, planning and development and examine sustainability characteristics to understand how projects overcame the barriers to brownfield reuse and the implementation of sustainability features and derive a series of lessons learned, including innovative policies, programs, and/or funding mechanisms that helped make these projects work. Sustainable Brownfield Development will be of interest to developers, planners, consultants and community representatives interested in environmental policy, urban planning, community development, ecological restoration, economic development, and parks planning by providing direction and inspiration for those eager

to erase the blight of the past and build a more sustainable future.

**Uganda** Apr 13 2024 Uganda has benefited from international reserve accumulation. The fiscal stance is tighter mainly owing to delays in execution of a large hydropower project. A suspension of budget support owing to theft of donor funds has curtailed spending plans and hurt growth prospects. The authorities have acknowledged the damage from corruption and responded to the concerns of development partners. Tight policies have led to the achievement of program targets. Sound macroeconomic policies need to be accompanied by reinforced efforts to fight corruption.
