‘Blew my mind... so magically written and most of all that it is based on true events... a hard-hitting, soul-crushing book... I loved every moment of it... immersive, heart-wrenching, I feel emotional writing this review.’ Goodreads reviewer, 5 stars
Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a foreign land. The Company will pay the cost of the lady’s dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana’s future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey – but what awaits them on the other side of the world is nothing like what they’ve been promised... Based on true history, this is a gripping and unputdownable historical novel, perfect for fans of *Girl with a Pearl Earring*, *The Miniaturist* and *The Indigo Girl*. WINNER OF THE 2021 GOLDEN CROWN LITERARY SOCIETY AWARD FOR DEBUT FICTION. FINALIST FOR THE 2021 BISEXUAL BOOK AWARDS. LONGLISTED FOR THE 2021 HWA DEBUT CROWN AWARD. What readers are saying about *The Company Daughters*: ‘Blew my mind... a book I've told so many people about purely because I'm still in disbelief that it exists, that it's so magically written and most of all that it is based on true events... a hard-hitting, soul-crushing book of a woman's struggle to survive... I loved every moment of it. Breathlessly, and in a way that took up my entire brain... immersive, heart-wrenching, and I feel emotional writing this review.’ Goodreads reviewer, 5 stars
‘From the moment I started reading *The Company Daughters*, I was captivated by this historical tale. Although it does contain a love story, it's not a romance... This was a gripping read.’ Goodreads reviewer
‘This book is so stunningly tender and beautiful, all mixed in with some seriously tragic and heart-wrenching events... Rajaram is an extremely skilled writer, and I love her writing style... The themes of sisterhood and female love were so present in this book and I found it very moving.’ Goodreads reviewer
‘I was enchanted by this book! It’s a delightful read that will have your emotions all over the place.’ Goodreads reviewer
‘I love historical fiction, and this book touched on a topic and time I knew nearly nothing about... There’s love, there’s loss, there’s surviving, there’s thriving... It was a very beautiful book.’ Goodreads reviewer
‘*The Company Daughters* is a beautifully written love story... a perfect example of the power of human will and the endurance and hope that love can give a person.’ Goodreads reviewer, 5 stars
‘This book has a beauty and grace to it. The author’s writing just flows off the page, and although there are struggles and upsets by the time you close the book over you are filled with a warm glow.’ Goodreads reviewer
‘A powerful and insightful read. I look forward to reading more historical work by Samantha Rajaram!’ Goodreads reviewer
‘Heartbreaking... a moving book... vivid, with amazing characters... This is a great read.’ Goodreads reviewer
To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I’ve ever met in my life. I know you think that you’re God’s gift to women, but I have a secret to let you in on: you’re not. You’re God’s gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn’t mean you’re the smartest man in the world. In fact, I’m not even sure if you would have gotten in if you didn’t have rich parents. Yes, I went there. Every woman doesn’t want to sleep with you and I’m sure you’re not even good in bed. And I’m someone that would know. From, Your Secret Not Admirer
Interest in brain connectivity inference has become ubiquitous and is now increasingly adopted in experimental investigations of clinical, behavioral, and experimental

neurosciences. *Methods in Brain Connectivity Inference through Multivariate Time Series Analysis* gathers the contributions of leading international authors who discuss different time series analysis approaches, providing a thorough survey of information on how brain areas effectively interact. Incorporating multidisciplinary work in applied mathematics, statistics, and animal and human experiments at the forefront of the field, the book addresses the use of time series data in brain connectivity interference studies. Contributors present codes and data examples to back up their methodological descriptions, exploring the details of each proposed method as well as an appreciation of their merits and limitations. Supplemental material for the book, including code, data, practical examples, and color figures is supplied in the form of a CD with directories organized by chapter and instruction files that provide additional detail. The field of brain connectivity inference is growing at a fast pace with new data/signal processing proposals emerging so often as to make it difficult to be fully up to date. This consolidated panorama of data-driven methods includes theoretical bases allied to computational tools, offering readers immediate hands-on experience in this dynamic arena. This guidance manual presents the potential benefits and costs associated with Extended Producer Responsibility. The PC 97 initiative is the next-generation hardware standard for consumer computing from Microsoft. This guide offers a unique and comprehensive look at this emerging standard. The book and CD provide hardware engineers and device driver developers with the authoritative information they need. It's a summer internship. Never mind that the owners are hot. Never mind that there are three of them. Never mind that they are twice her age. Never mind that they have a secret "play" room in the basement. Never mind that she's never been more intrigued in her life. She only has three months. No matter how deeply she gets involved, she can't stay... Provides current information (last updated in 1996) on neuroanatomy, neurophysiology, and neuropharmacology for both practitioners and students. Case studies and follow-ups, as well as numerous MRIs clarify the material covered in the text. Annotation copyrighted by Book News, Inc., Portland, OR "The Mutual Fund Industry Handbook is a remarkably important work . . . I am profoundly impressed by the broad and comprehensive sweep of information and knowledge that this book makes available to industry participants, college and business school students, and anyone else with a serious interest in this industry." -- From the Foreword by John C. Bogle President, Bogle Financial Markets Research Center Founder and former chief executive, The Vanguard Group A Foreword by John C. Bogle, founder of The Vanguard Group and one of the most respected leaders in the mutual fund industry, sets the stage for this authoritative book that explains the complexities of the phenomenal industry in simple terms. Investors like the fact that mutual funds offer professional management, easy diversification, liquidity, convenience, a wide range of investment choices, and regulatory protection. Mutual Fund Industry Handbook touches on all of those features and focuses on the diverse functions performed in the day-to-day operations of the mutual fund industry. You'll learn about: Front-office functions-analysis, buying, and selling. Back-office functions, including settlement, custody, accounting, and reporting. Commission structures-front-end loads, back-end loads, or level loads. The various fund categories used by the Investment Company Institute, Morningstar, and Lipper. The roles played by fund managers, investment advisors, custodial banks, distributors, transfer agents, and other third-party service providers. If you want a definitive reference on the mutual fund industry, this is the book for you. Pancreatic Disease gives an up-to-date picture of recent advances in the field and developing areas where progress can be expected in the near future. Four main areas are covered: acute pancreatitis, chronic pancreatitis, malignant disease and basic sciences. Chapters are included on imaging, pancreatic disease in childhood and pancreatic transplantation. The distinguished contributors include internationally known names in all the specialties covered. Established specialists in pancreatic disease - whether medical, surgical or radiological - will find the book an important reference source for current thinking and practice regarding all aspects of the investigation and management of patients with inflammatory and malignant disease of the pancreas. It will also provide residents, particularly those preparing for examinations, with a clear grasp of the advancing areas of knowledge in pancreatic disease that is not available from larger texts. A comprehensive shopping guide and restaurant section covering everything from Irish Stew to the best French cuisine highlight this guide to the beautiful city on the Emerald Isle. This book explores topics in contemporary debates over environmental quality, economic growth and sustainable development. In order to really see the forest, what's the best way to count the trees? Understanding how the economy interacts with the environment has important implications for policy, regulatory, and business decisions. How should our national economic accounts recognize the increasing interest in and importance of the environment? Nature's Numbers responds to concerns about how the United States should make these measurements. The book recommends how to incorporate environmental and other non-market measures into the nation's income and product accounts. The panel explores alternative approaches to environmental accounting, including those used in other countries, and addresses thorny issues such as how to measure the stocks of natural resources and how to value non-market activities and assets. Specific applications to subsoil minerals, forests, and clean air show how the general principles can be applied. The analysis and insights provided in this book will be of interest to economists, policymakers, environmental advocates, economics faculty, businesses based on natural resources, and managers concerned with the role of the environment in our economic affairs. "Modular Java" is a pragmatic guide to developing modular applications using OSGi, the framework for dynamic modularity in Java, and Spring Dynamic Modules, an OSGi extension to the Spring Framework. That happy-go-lucky cartoon dog is back--in a bigger and better edition of an already great collector's guide. Boy's best friend Snoopy*r is collected by people around the world. From his joyous dance to his brave conflict with the Red Baron, he embodies what is best in the human spirit, and it's no wonder that collectors hold these images dear. Snoopy has appeared on thousands of items in the half-century since he was created by Charles M. Schulz in 1950. Here is Snoopy on household items, school supplies, books, clothing, sports, games, electronics, and more, all illustrated with over 710 color photographs. Concise captions and a brand new price guide make this a perfect book for all Snoopy fans. Learning that Hazel Marie is pregnant with twins and that the father, private investigator J. D. Pickens, has left town, Miss Julia summons the wayward man to solve a local theft in the hopes of reuniting the couple. By the author of Miss Julia Paints the Town. "A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational." Kirkus Review, Starred Review

American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he's as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn't have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs?

Each book in the Patterson's Bluff series is STANDALONE: * The Aussie Next Door * Her Aussie Holiday

Twenty-five years ago, the Cuyahoga River in Ohio was so contaminated that it caught fire, air pollution in some cities was thick enough to taste, and environmental laws focused on the obvious enemy: large American factories with belching smokestacks and pipes gushing wastes. Federal legislation has succeeded in providing cleaner air and water, but we now confront a different set of environmental problems--less visible and more subtle. This important book offers thought-provoking ideas on how America can respond to changing public health and ecological risks and create sound environmental policy for the future. The innovative thinkers of the Next Generation Project of the Yale Center for Environmental Law and Policy--experts from business, government, nongovernmental organizations, and academia--propose reforms that balance environmental efforts with other public needs and issues. They call for new foundations for environmental law and policy, adoption of a more diverse set of policy tools and strategies (economic incentives, ecolabels), and new connections between critical sectors (agriculture, energy, transportation, service providers) and environmental policy. Future progress must involve not only officials from the U.S. Environmental Protection Agency and state environmental protection departments, say the authors, but also decision-makers as diverse as mayors, farmers, energy company executives, and delivery route planners. To be effective, next-generation policy-making will view environmental challenges comprehensively, connect academic theory with practical policy, and bridge the gaps that have caused recent policy debates to break down in rancor. This book begins the process of accomplishing these challenging goals. Updated throughout and extensively illustrated, the Fifth Edition of *Neuroradiology Companion* is an ideal one-volume resource covering the fundamentals of neuroradiology for residents, fellows, and practitioners. More than 1,400 high-quality images depict key disorders of the brain, spine, and head and neck. Each disorder is presented in a concise, consistent manner, with bulleted Key Facts, six to eight images that show the most common findings, and suggested readings. This concise volume can be read cover-to-cover during neuroradiology rotations and also used for daily consultation in the reading room. It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Want to learn to program in Windows but don't know where to start? Look no further! This book is designed to teach you how to develop Windows applications using Microsoft Visual Basic 2008 Express. To help make learning fun and interesting, you will learn how to program through the development of computer games, and you will develop a new game that reinforces a newly learned concept in each chapter. It's the easiest way to learn! By the time you have finished the book, not only will you have access to a collection of working sample scripts, you also will have laid a foundation upon which you can begin to tackle real-world challenges and new languages. Whether you are an experienced programmer looking for a jumpstart on learning Visual Basic 2008 Express, or a first-timer looking for a friendly programming language and a book that will help you to begin your programming career, you will be happy with what this book has in store for you! This instructive book takes you step by step through ways to track, merge, and manage both open source and commercial software projects with Mercurial, using Windows, Mac OS X, Linux, Solaris, and other systems. Mercurial is the easiest system to learn when it comes to distributed revision control. And it's a very flexible tool that's ideal whether you're a lone programmer working on a small project, or part of a huge team dealing with thousands of files. Mercurial permits a countless variety of development and collaboration methods, and this book offers several concrete suggestions to get you started. This guide will help you: Learn the basics of working with a repository, changesets, and revisions Merge changes from separate repositories Set up Mercurial to work with files on a daily basis, including which ones to track Get examples and tools for setting up various workflow models Manage a project that's making progress on multiple fronts at once Find and fix mistakes by isolating problem sources Use hooks to perform actions automatically in response to repository events Customize the output of Mercurial

Mercurial: The Definitive Guide maintains a strong focus on simplicity to help you learn Mercurial quickly and thoroughly. Which types of regulatory reinvention work and which don't? This book identifies innovative regulatory best practice internationally in a number of specific contexts,

providing policy prescriptions which would better enable agencies to fulfil their regulatory missions. Advances in technology and research have brought new installation products and tools to the market. Design elements have also seen a dramatic shift with the emergence of glass and stone, launching a new era of creativity. DIY handymen will welcome this completely revised and updated edition, which combines easy-to-follow installation techniques and the latest design ideas. The proposed Directive on waste electrical and electronic equipment envisages a producer responsibility. This means that producers and importers will be made responsible for the collection and recycling of these products once they have reached the end of their life. Similar legislation in the Netherlands has resulted in a collective producer responsibility organisation funded by a disposal fee. The establishment of such collective organisations is encouraged by environmental legislation. However, competition law is critical of such co-operation particularly with regard to the disposal fee that is to be passed on to consumers. This study examines the environmental and competition law applicable to producer responsibility organisations. In this regard, the experiences in the Netherlands and a number of other European countries have been studied. It comes to the conclusion that competition law and environmental law may not pull in the same direction. The study suggests a number of possible solutions for the conflict between environmental and competition law in this field.

About the author: Hans Vedder (1974) graduated from the University of Groningen in 1997. From 1998 to 2001 he worked as a researcher with the Centre for Environmental Law of the University of Amsterdam. Since 2001 he is lecturer in European law with the University of Groningen. He has published several articles and chapters in books on various aspects of competition and environmental law. A requisite countertop companion for all home chefs, *Keys to Good Cooking* distils the modern scientific understanding of cooking and translates it into immediately useful information. The book provides simple statements of fact and advice, along with brief explanations that help cooks understand why, and apply that understanding to other situations. Not a cookbook, *Keys to Good Cooking* is, simply put, a book about how to cook well. A work of astounding scholarship and originality, this is a concise and authoritative guide designed to help home cooks navigate the ever-expanding universe of recipes and ingredients and appliances, and arrive at the promised land of a satisfying dish.

Measuring Technology and Mechatronics Automation in Electrical Engineering includes select presentations on measuring technology and mechatronics automation related to electrical engineering, originally presented during the International Conference on Measuring Technology and Mechatronics Automation (ICMTMA2012). This Fourth ICMTMA, held at Sanya, China, offered a prestigious, international forum for scientists, engineers, and educators to present the state of the art of measuring technology and mechatronics automation research. Proceedings of SPIE present the original research papers presented at SPIE conferences and other high-quality conferences in the broad-ranging fields of optics and photonics. These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature. "This book provides an opportunity for readers to clearly understand the notion of ontology engineering and the practical aspects of this approach in the domains of two interest areas: Knowledge Management Systems and Enterprise Systems"-- Concise, fast-paced, intensive introduction to clinical research design for students and clinical research professionals Readers will gain sufficient knowledge to pass the United States Medical Licensing Examination part I section in Epidemiology The results of a workshop held following the second biannual conference of the International Society for Ecological Economics, *Investing in Natural Capital* emphasizes the essential connections between natural ecosystems and human socioeconomic systems, and the importance of ensuring that both remain resilient. Praise for *Learning in 3D* "Learning is the key to our future and powerful learning will result from immersive, interactive, and creative 3D designs. Tony O'Driscoll and Karl Kapp have written a disruptive book about a disruptive technology that we all need to explore. This is a must read!" Elliott Masie, chair, The Learning CONSORTIUM "Karl Kapp and Tony O'Driscoll are, amazingly, both the best theorists and practitioners in using virtual worlds in every type of educational venue. Many will love their vision, but I am more hooked on their practicality and hand-holding." Clark Aldrich, author, *Learning Online with Games, Simulations, and Virtual Worlds: Strategies for Online Instruction* "Kapp and O'Driscoll nailed it. The right balance of case studies, theories and practical advice for any organization pursuing the use of virtual worlds for learning. If you are interested in virtual worlds for learning and collaboration, this book is for you." David A. Manning, managing partner, Performance Development Group "The big contribution of *Learning in 3D* is that it provides research informed guidance and practical tips and techniques for using 3D virtual environments to achieve real business results...the case studies are outstanding." Lisa Clune, president, Kaplan EduNeering "As the world makes its way through a period of significant change, *Learning in 3D* couldn't come at a better time. Today, organizations and individuals are being challenged to make the most of learning collaboratively. This book stimulates our thinking on how to maximize the impact of technology, while providing a practical blueprint with 'revolutionary' examples of how to bring a new dimension to learning." John Malitoris, regional managing director, Duke Corporate Education "Tony O'Driscoll and Karl Kapp remind us that learning is the fourth dimension and the one that really counts in collaboration. A must-read for the future of learning in environments virtual and otherwise." Cathy Davidson, Ruth F. DeVarney Professor of English at Duke University and co-director HASTAC/MacArthur Foundation Digital Media and Learning Competition. The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle

of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color. We are working with Cambridge Assessment International Education to gain endorsement for this title. Develop theoretical and practical IT skills with this comprehensive Student's Book written by experienced authors and examiners specially for the updated Cambridge International Education A Level Information Technology syllabus (9626). - Improve understanding of concepts and terminology with clear explanations, labelled illustrations, photographs, diagrams, plus a glossary of key terms - Develop theoretical and practical skills with a range of exercises (multi choice through to discussion type questions), exam-style questions, step-by-step instructions and example answers that all ensure skills are developed alongside knowledge - Follow a structured route through the course with in-depth coverage of the full syllabus Also available in the series: Cambridge International AS Level Information Technology Student's Book 9781510483057 Cambridge International AS Level Information Technology Student eTextbook 9781510484429 Cambridge International AS Level Information Technology Whiteboard eTextbook 9781510484436 Cambridge International AS Level Information Technology Skills Workbook 9781510483064 Cambridge International A Level Information Technology Student eTextbook 9781398307018 Cambridge International A Level Information Technology Whiteboard eTextbook 9781398307025 Cambridge International A Level Information Technology Skills Workbook 9781398309029 Cambridge International AS & A Level Information Technology Online Teacher's guide - coming soon Once hailed as a radical breakthrough in documentary and ethnographic filmmaking, observational cinema has been criticized for a supposedly detached camera that objectifies and dehumanizes the subjects of its gaze. The author's provide a critical history and in-depth appraisal of this movement. Presents a collection of barbecue recipes intended for outdoor cooking that feature such traditional Asian flavors as lemongrass, sriracha, turmeric, cumin, tamarind, coconut, and pineapple.
