Distance, Displacement, Speed, Velocity Practice Test

After 4 laps, the runner ended up in the same spot.
 $\Delta x = 0$
 $d > \Delta x$

For questions 1 and 2: A school bus takes the route shown on the diagram below.

1) What is the displacement of the school bus from A to B?

$$\Delta x = 400\text{m East}$$

2) What is the distance the school bus traveled from A to B?

$$d = 1,400\text{m}$$

3) An object traveled 240 m in 6 seconds. Find the average speed of this object.

$$s = \frac{d}{t} = \frac{240\text{m}}{6\text{s}} = 40\text{m/s}$$

4) What is the distance traveled by an object that moves with an average speed of 3 meters per second for 3 seconds?

$$s = \frac{d}{t} \rightarrow d = s \cdot t = (3\text{m/s})(3\text{s})$$

$$d = 9\text{m}$$

5) A person is driving with an average speed of 60 miles/hr. How long will it take this person to get to her destination if it is 30 miles from her origin?

$$s = \frac{d}{t} \rightarrow t = \frac{d}{s} = \frac{30\text{miles}}{60\text{miles/hr}} = 0.5\text{hr}$$

6) What is the average speed of an object that travels 12 m north in 6 seconds and then travels back 6 m south in 3 seconds?

$$\text{Total distance} = 18\text{m}$$

$$\text{Total time} = 9\text{s}$$

$$s = \frac{d}{t} = \frac{18\text{m}}{9\text{s}} = 2\text{m/s}$$

7) A runner completes 4 track laps (the track is 400 meters in length with an oval shape and the start and finish line are in the same location). The magnitude of the runner's total distance traveled by the runner is _____ the total displacement from the start/finish line.
 a) smaller than **b) larger than** c) the same as

For questions 8-10. The following motion diagram displays the position of an object (dot) at time intervals of 1 second.

8) What type of motion is displayed on the previous diagram?

- a) constant speed **b) decreasing speed**
 c) increasing speed d) at rest

9) How long did it take this object to move from position A to position B?

4 seconds

10) What is the time interval (Δt) from A to B? Recall that $\Delta t = t_f - t_i$. Let's say A is on 0s and B is on 4s.

$$\Delta t = 4\text{s} - 0\text{s}$$

$$\Delta t = 4\text{s}$$

For questions 11-13. The following motion diagram displays the position of an object (dot) at time intervals of 1 second.

11) What type of motion is displayed on the previous diagram?

- a) constant speed **b) decreasing speed**
c) increasing speed d) at rest

12) How long did it take this object to move from position A to position B?

2 seconds

13) What is the time interval (Δt) from A to B? Recall that $\Delta t = t_f - t_i$. Let's say A is on 2s and B is on 4s.

$$\Delta t = 4\text{s} - 2\text{s}$$

$$\Delta t = 2\text{s}$$

STEM Teachers and Teaching in the Digital Era Yifat Ben-David Kolikant, Dragana Martinovic, Marina Milner-Bolotin, 2020-02-20 This book brings together researchers from Israel and Canada to discuss the challenges today's teachers and teacher educators face in their practice There is a growing expectation that the 21st century STEM teachers re-examine their teaching philosophies and adjust their practices to reflect the increasing role of digital technologies This expectation presents a significant challenge to teachers who are often asked to implement novel technology rich pedagogies they did not have a chance to experience as students or become comfortable with To exacerbate this challenge the 21st century teachers function not only in a frequently changing educational reality manifested by continuous reforms but are also bombarded by often contradictory and competing demands from the legislators administrators parents and students How do we break the vicious circle of reforms and support STEM teachers in making a real change in student learning This book is unique for at least three reasons First it showcases research situated in Israel and Canada that examines the challenges today's teachers and teacher educators face in their practice While the governments of both countries emphasize STEM education their approaches are different and thus provide for interesting comparisons Second in addition to including research based chapters prominent scholars discuss the contributions in each of the book sections problematizing the issues from a global perspective Third technology has a potential to empower teachers in this era of change and this book provides the unique insights from each country while allowing for comparisons discussing solutions and asking new questions This book will be of interest to all involved in STEM teacher education programs or graduate programs in education as well as to educational administrators interested in implementing technology in their schools

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i.e. extending the implementation and knowledge of co-design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams

conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
