The Psychology of Death Nov 28 2023 In this extensively updated and revised edition, Dr. Kastenbaum continues to examine and expand upon issues of dying and the ways in which we shape and reshape our conceptions of death. New to the Third Edition are chapters on how we construct death; Death in adolescence and adulthood including discussion on suicide, physician assisted death and Regret Theory and Denial; new approaches to the role of death anxiety, Terror Management Theory, and Edge Theory, and much more. A major contribution to the literature -- this book is must reading for professionals and students of psychology, thanatology, gerontology, social work, and those working in hospice care.

The Therapist Mar 28 2021 The multimillion-copy New York Times bestselling author B.A. Paris returns to her heartland of gripping psychological suspense in *The Therapist*—a powerful tale of a house that holds a shocking secret. When Alice and Leo move into a newly renovated house in The Circle, a gated community of exclusive houses, it is everything they’ve dreamed of. But appearances can be deceptive... As Alice is getting to know her neighbours, she discovers a devastating secret about her new home, and begins to feel a strong connection with Nina, the therapist who lived there before. Alice becomes obsessed with trying to piece together what happened two years before. But no one wants to talk about it. Her neighbors are keeping secrets and things are not as perfect as they seem...

The Unquiet Dead Mar 01 2024 Argues that many psychological problems are caused by spirit possession, describes five case studies, and explains how to protect oneself from earthbound entities

What Matters Most Mar 21 2023 Why are we here? What is the meaning of existence? What truly matters the most in life? To even begin to answer these questions, we must start by exploring our own internal ideals, values, and beliefs. Presenting the unique perspective of respected analyst and author James Hollis, Ph.D., *What Matters Most* helps readers learn to appreciate (even be amazed by) events unfolding within, even as the external world creates constant struggles.

Death Anxiety Handbook: Research, Instrumentation, And Application May 30 2021 Presenting a broad coverage of this major area of studies on death and dying, this book provides a systematic presentation of the six most widely used and best validated measures of death anxiety, threat and fear. These chapters consider the available data on the psychometric properties of each instrument and summarize research using them, and also supply a copy of the instrument with scoring keys - to facilitate their use. In addition, other chapters make use of the instrumentation by pursuing questions of applied significance in various health care settings nursing homes, psychotherapy, death education, near death experiences, persons with AIDS, experiences of bereaved young adults.; An introductory chapter introduces the major philosophical and psychological theories of the causes and consequences of death anxiety in adult life, and a closing chapter gives an overview of death education and how this affects attitudes towards death and dying.

Dead Time Feb 17 2023 Psychologist Alan Gregory is struggling to deal with both a newly adopted son and a shaky, though generally improving, marriage. But then his ex-wife, Merideth, reappears, seeking help locating the missing surrogate mother of her soon-to-be-born child, and Alan is pulled into a mystery that reaches back years--with ramifications that are disturbingly current.--From publisher description.

A Psychologist Looks at Love Sep 26 2023 Theodor Reik (12 May 1888 in Wien - 31 December 1969 in New York City) was a prominent psychoanalyst who trained as one of Freud's first students in Vienna, Austria. Reik received a Ph.D. degree in psychology from the University of Vienna in 1912. Reik presents a forceful criticism of traditional Freudian theory in this book. Freud had believed that love is always based on some form of sexual desire. Reik argues, to the contrary, that love and lust are distinct motivational forces.

The Denial of Death May 23 2023 Winner of the Pulitzer prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal - to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

The Unquiet Dead Jul 05 2024 Noted psychologist Dr. Edith Fiore explains how to detect spirit possession in yourself and others, how to protect yourself from entities, how to release your home from displaced spirits, and how to perform a depossession. Filled with shocking case histories.

Tales from the Valley of Death Aug 14 2022 The dread of death is a problem nearly as old as time itself. Our awareness of our own mortality has been famously referred to by William James as ‘the worm at the core’ of human existence, lingering in the shadows of our daily lives. ? It is something we must all grapple with. Yet, increasing scientific evidence suggests that ‘death anxiety’ may lie at the heart of a multitude of mental health conditions, driving numerous clinically-relevant behaviours. What can we learn about confronting mortality from the tales of individuals who have been gripped by mental illness and the dread of death? *Tales from the Valley of Death* explores the complex lives of individuals who have been crippled by death-related fears and related existential issues as revealed by candid interviews with their psychotherapist, internationally renowned clinical psychologist Professor Ross Menzies. Vivid first-hand accounts reveal their private histories, core thoughts, beliefs and attitudes that drove their mental health dilemmas. For some, the struggle has gone on for years as they tried different therapies and therapists. A platform for the wealth of mental and behavioural processes brought to life through these 10 fascinating tales is provided by Rachel Menzies, a leading researcher in death anxiety and daughter of Ross. Her engaging introduction on the history and psychological underpinnings of death anxiety bookends neatly with a comprehensive concluding examination of what these stories reveal about its causes and effects. As we listen in on the interviews, it is hard not to be struck by how fascinating these individuals are, how compelling their histories have been, and how hard they have fought to overcome their difficulties, bravely wading their way through the murky territory of the same existential dilemmas we all must face. Their fears range from sudden death by fire to assassins in the shadows, from anaphylactic shock to a multitude of diseases, from being attacked by dinosaurs lurking in kitchen cupboards to being pushed off cliffs and in front of trains. For many, the ultimate fear is the wrath of God while for others, a lack of meaning and a pervasive sense of pointlessness drove their mental difficulties. *Tales from the Valley of Death* shows us the many ways that the dread of death and fear of impermanence can strike at the heart of the human experience and the power of effective therapy to improve the lives of others.

The Psychological Autopsy Jul 13 2022

The Walking Dead Psychology Dec 30 2023 *The Walking Dead* depicts a postapocalyptic world filled with relentless violence and death. How would such trauma affect the psyche? Nineteen fascinating essays explore the deep psychological forces that drive the show's action, from the costs of killing and survivor guilt to the consequences of nonstop stress and the struggle to find meaning in tragedy. *The Walking Dead Psychology* helps fans better grasp this compelling fictional universe.

Schizophrenia Apr 09 2022

Marilyn Monroe Feb 05 2022 Dr. Jack Hattem first became interested in Marilyn Monroe's death at the Suicide Prevention Center in Los Angeles in 1962. After three decades as a Clinical Psychologist he decided to write a factual account of the real circumstances in which she died. This book is a unique view of Marilyn Monroe, despite the millions of words written about her. It is the result of a research study into toxic relationships exactly like Marilyn's, where one person tries to drive another to kill themselves. It is about Marilyn's psychiatric condition and how her psychiatric mistreatment led to her death. The author, for the first time, offers a psychological view of Marilyn Monroe's life which explains most of her troubled relationships and her addictions. This book is about the author's need to understand why people choose to kill themselves. It ends with a conspiracy hidden over forty five years. This book is about why Marilyn died, how she died, and who was directly responsible for her death! Even the Cuban missile crisis played a role in her death.

Doctor Death Feb 25 2021 People are voluntarily dying before their time in California. Some call it assisted suicide, others, murder. The man at the centre of the row, nicknamed Doctor Death, continues to work, but Detective Milo Sturgis comes to Delaware with the suspicion that some patients are not willing collaborators.

Induced After Death Communication Jan 19 2023 Induced After Death Communication (IADC) is a therapy for grief and trauma that has helped thousands of people come to terms with their loss by allowing them the experience of private communication with their departed loved ones. This is the definitive book on the subject. Botkin, a clinical psychologist, created the therapy while counseling Vietnam veterans in his work at a Chicago area VA hospital. Botkin recounts his initial—accidental—discovery of IADC during therapy sessions with Sam, a Vietnam vet haunted by the memory of a Vietnamese girl he couldn't save. During the session, quite unexpectedly, Sam saw a vision of the girl's spirit, who told him everything was okay; she was at peace now. This single moment

surpassed months—years—of therapy, and allowed Sam to reconnect with his family. Since that 1995 discovery, Botkin has used IADC to successfully treat countless patients—the book includes dozens of case examples—and has taught the procedure to therapists around the country.

The Moral Psychology of Sadness Apr 29 2021 This book offers both an introduction to the methods and language of moral psychology as a philosophical field, and to sadness as an emotion.

Into the Void Jan 07 2022 Death is a pervasive reality that impacts the life of every living person, often leading to denial, avoidance, and attempts to overcome it. In the end, we all must face death, as Dr. Tom Greening does in his new book of poems, *Into the Void*. This powerful collection of poems written by the eminent existential psychologist, Dr. Tom Greening. With his usual wit, humor, and honesty, Greening birthed these poems from his experience as he ages and faces his own declining health and mortality. Each poem reveals another layer of the experience of facing death. The honesty of Greening's poems is a gift to all who read them. They are sure to bring laughter, sadness, and tears. But most importantly, they bring with them poignant wisdom that may help others in their own journey with their mortality.

Senescence, the Last Half of Life Jun 11 2022 *Senescence The Last Half of Life* G. Stanley Hall, Ph.D., LL.D.

Jung on Death and Immortality Oct 04 2021 "As a doctor, I make every effort to strengthen the belief in immortality, especially with older patients when such questions come threateningly close. For, seen in correct psychological perspective, death is not an end but a goal, and life's inclination towards death begins as soon as the meridian is past."--C.G. Jung, commentary on *The Secret of the Golden Flower* ? Here collected for the first time are Jung's views on death and immortality, his writings often coinciding with the death of the most significant people in his life. The book shows many of the major themes running throughout the writings, including the relativity of space and time surrounding death, the link between transference and death, and the archetypes shared among the world's religions at the depths of the Self. The book includes selections from "On Resurrection," "The Soul and Death," "Concerning Rebirth," "Psychological Commentary on *The Tibetan Book of the Dead*" from the *Collected Works*, "Letter to Pastor Pfafflin" from *Letters*, and "On Life after Death."

Death Work Jul 25 2023 In this fascinating new book, Vincent Henry (a 21-year veteran of the NYPD who recently retired to become a university professor) explores the psychological transformations and adaptations that result from police officers' encounters with death. Police can encounter death frequently in the course of their duties, and these encounters may range from casual contacts with the deaths of others to the most profound and personally consequential confrontations with their own mortality. Using the 'survivor psychology' model as its theoretical base, this insightful and provocative research ventures into a previously unexplored area of police psychology to illuminate and explore the new modes of adaptation, thought, and feeling that result from various types of death encounters in police work. The psychology of survival asserts that the psychological world of the survivor--one who has come in close physical or psychic contact with death but nevertheless managed to live--is characterized by five themes: psychic numbing, death guilt, the death imprint, suspicion of counterfeit nurturance, and the struggle to make meaning. These themes become manifest in the survivor's behavior, permeating his or her lifestyle and worldview. Drawing on extensive interviews with police officers in five nominal categories--rookie officers, patrol sergeants, crime scene technicians, homicide detectives, and officers who survived a mortal combat situation in which an assailant or another officer died--Henry identifies the impact such death encounters have upon the individual, the police organization, and the occupational culture of policing. He has produced a comprehensive and highly textured interpretation of police psychology and police behavior, bolstered by the unique insights that come from his personal experience as an officer, his intimate familiarity with the subtleties and nuances of the police culture's value and belief systems, and his meticulous research and rigorous method. *Death Work* provides a unique prism through which to view the individual, organizational, and social dynamics of contemporary urban policing. With a foreword by Robert Jay Lifton and a chapter devoted to the local police response to the World Trade Center attacks, *Death Work* will be of interest to psychologists and criminal justice experts, as well as police officers eager to gain insight into their unique relationship to death.

Thirty Years Among The Dead May 11 2022 *Thirty Years Among the Dead*, first published in 1924, details Swedish-American GP and psychiatrist Carl Wickland's experiences as a psychical researcher. After moving to California in 1918, Wickland began to turn away from conventional medical psychology and moved toward the belief that psychiatric illnesses were the result of influence by spirits of the dead. He came to believe that a large number of his patients had become possessed by what he called "obsessing spirits", and that low-voltage electric shocks could dislodge them. His wife Anna acted as a medium to guide them to "progress in the spirit world". Spiritualists considered him an authority on "destructive spirits", prompting Wickland to write this book.

The Patient Who Thought He Was Dead: and Other Psychological Stories Nov 16 2022 The stories that are contained in this book are all real stories that have occurred over my 35 years of working as a Psychologist in a variety of settings from pre-school programs to psychiatric hospitals. Some of the stories are humorous, some are tragic. All names and any identifying information, to protect the confidentiality of the aforementioned, has been changed but the stories are as accurate as I can recall them. The purpose of this book is not to stigmatize or stereotype those with cognitive, behavioral or mental disorders but to realize that their stories are very often not atypical after all. We can all empathize that our life no matter how difficult may pale in comparison to what many others in our earthly world have to contend with on a daily basis. As I often tell my college students: "I hope the worst day of your life has already been played out in your life. I hope the worst thing that can ever happen to you has already happened. But please try to remember that the worst day of your life, no matter how horrific it may have been, might be someone else best day of their life. For even though you have dealt with difficulty and tragedy in your life, you still have a warm bed to sleep in, a roof over your head and people who love and care for you. That's not a guarantee for everyone. For some of those living today, each day is a struggle to survive. Where to sleep, food to eat, avoiding being victimized by society." I like to dedicate this book to all of the survivors past and present who despite the struggles, made it through the storm and came out the other side stronger and wiser.

The Death of Psychotherapy Dec 18 2022 Annotation Puts psychotherapy on trial by critically examining its effectiveness through the lens of the scientific method.

Doctor Death (Alex Delaware series, Book 14) Apr 21 2023 *Euthanasia... or murder?* In *Doctor Death*, New York Times No. 1 bestselling author Jonathan Kellerman demonstrates once again his unique insights into the darkest corners of the human psyche. Perfect for fans of Michael Connelly and Harlan Coben. 'Kellerman is the acknowledged king of the psychological thriller' - *Dallas Morning News* People are voluntarily dying before their time in California. Some call it assisted suicide when cancer, heart disease or painful old age make the quality of life unbearable. Others say it is murder, that no-one has the right to help others take their own life. As the debate rages over whether euthanasia should be legalised or not, the man at the centre of the row, nicknamed Doctor Death, continues his work. Dr Alex Delaware joins in the argument, but when Detective Milo Sturgis comes to him with the suspicion that some of Doctor Death's patients are not willing collaborators, Delaware finds himself on the frontline of the affair, and increasingly believes that euthanasia is not the prime motivation. So what is driving Doctor Death to kill so many? What readers are saying about *Doctor Death*: 'A book that keeps you fascinated from beginning to the end' 'I could not put it down' 'Five stars'

Pot Psychology's How to Be Oct 16 2022 Do you love stylish, sexy advice? Do you love marijuana? Get the best of both worlds with *Pot Psychology's How to Be*, the hot, new, easy-to-use book from the creators of the Jezebel.com video advice sensation, *Pot Psychology*. We also have 101 pictures of animals acting like people.

The Unquiet Dead Jun 04 2024 Noted psychologist Dr. Edith Fiore explains how to detect spirit possession in yourself and others, how to protect yourself from entities, how to release your home from displaced spirits, and how to perform a deposal. Filled with shocking case histories.

Curing the Dread of Death Jun 23 2023 The dread of death has appeared throughout recorded human history in art, literature, song, myth, and ritual. In both ancient and modern societies, the spectre of death has always been with us, stalking the terrified living who seek to avoid its inevitable arrival. Our attempts to respond to the finitude of life range from ancient burial customs such as mummification to computerised chatbots which imitate the personality of those who have departed. Such efforts speak to the uniqueness of humans in their awareness of their own mortality. Yet death is not to be feared. Indeed, it may hold the key to living a vital, authentic life. The many authors of this volume argue persuasively that we cannot live fully without complete acceptance of the fragility and finiteness of life. This unique book explores the dread of death and its management from a wide range of perspectives with researchers and writers from a variety of cultures, academic traditions and disciplines across the globe. The fields covered are broad — including palliative care and grief, psychodynamic theory, social, developmental and clinical psychology, sociology and anthropology, counselling practice as well as history, art, and philosophy. Not only is this book a fascinating journey into the very core of the human psyche, it is also a guide to our psychological health. The challenge we all face is to discover pathways to an acceptance of death that enables a life of significance and meaning. Read, learn, and explore what an examination of the dread of death can bring to one's life.

Happiness Sep 14 2022 Utilizing sophisticated methodology and three decades of research by the world's leading expert on happiness, *Happiness* challenges the present thinking of the causes and consequences of happiness and redefines our modern notions of happiness. shares the results of three decades of research on our notions of happiness covers the most important advances in our understanding of happiness offers readers unparalleled access to the world's leading experts on happiness provides "real world" examples that will resonate with general readers as well as scholars Winner of the 2008 PSP Prose Award for Excellence in Psychology, Professional and Scholarly Publishing Division of the Association of American Publishers

Batman and Psychology Nov 04 2021 A journey behind the mask and into the mind of Gotham City's Caped Crusader, timed for the summer 2012 release of *The Dark Knight Rises* Batman is one of the most compelling and enduring characters to come from the Golden Age of Comics, and interest in his story has only increased through countless incarnations since his first appearance in *Detective Comics #27* in 1939. Why does this superhero without superpowers fascinate us? What does that fascination say about us? *Batman and Psychology* explores these and other intriguing questions about the masked vigilante, including: Does Batman have PTSD? Why does he fight crime? Why as a vigilante? Why the mask, the bat, and the underage partner? Why are his most intimate relationships with "bad girls" he ought to lock up? And why won't he kill that homicidal, green-haired clown? Gives you fresh insights into the complex inner world of Batman and Bruce Wayne and the life and characters of Gotham City Explains psychological theory and concepts through the lens of one of the world's most popular comic book characters Written by a psychology professor and "Superherologist" (scholar of superheroes)

Cut You Dead Dec 06 2021 A criminal psychologist puts her life on the line to stop a serial killer in this crime thriller by the international bestselling author. In London, a young woman falls to her death from a balcony while trying to take a daredevil selfie. Or that's

how it appears at first. Psychologist Samantha Willerby isn't so sure. Called in by the Metropolitan Police to examine a series of cold cases, Sam uncovers a chilling link between this victim and two others: they each had their hair hacked off exactly seven days before they died. Then Sam discovers another shocking connection—to herself. When she recognizes one of the victims, she's determined to crack the case no matter how many rules she breaks. But when her own hair is slashed, one thing becomes fatally certain: Sam has only seven days to catch a calculating serial killer before she becomes the next victim.

The Choice Aug 02 2021 A New York Times Bestseller "I'll be forever changed by Dr. Eger's story... The Choice is a reminder of what courage looks like in the worst of times and that we all have the ability to pay attention to what we've lost, or to pay attention to what we still have."—Oprah "Dr. Eger's life reveals our capacity to transcend even the greatest of horrors and to use that suffering for the benefit of others. She has found true freedom and forgiveness and shows us how we can as well." —Desmond Tutu, Nobel Peace Prize Laureate "Dr. Edith Eva Eger is my kind of hero. She survived unspeakable horrors and brutality; but rather than let her painful past destroy her, she chose to transform it into a powerful gift—one she uses to help others heal." —Jeannette Walls, New York Times bestselling author of *The Glass Castle* Winner of the National Jewish Book Award and Christopher Award At the age of sixteen, Edith Eger was sent to Auschwitz. Hours after her parents were killed, Nazi officer Dr. Josef Mengele, forced Edie to dance for his amusement and her survival. Edie was pulled from a pile of corpses when the American troops liberated the camps in 1945. Edie spent decades struggling with flashbacks and survivor's guilt, determined to stay silent and hide from the past. Thirty-five years after the war ended, she returned to Auschwitz and was finally able to fully heal and forgive the one person she'd been unable to forgive—herself. Edie weaves her remarkable personal journey with the moving stories of those she has helped heal. She explores how we can be imprisoned in our own minds and shows us how to find the key to freedom. *The Choice* is a life-changing book that will provide hope and comfort to generations of readers.

The Psychological Autopsy Jan 31 2024 The best way to grasp the essence of death scene investigation (DSI) is to witness its application, called the psychological autopsy, by an expert forensic scientist/clinician. This remarkable book affords the opportunity to delve into the challenges that the forensic mental health specialist and public safety professional confront in DSI. Suicides, and often death, are complex, multidetermined events. People, whether police investigators or mental health professionals, are generally perplexed, and even confused, when they are confronted by the equivocal case. Was it a suicide? Homicide? Accident? These are critical questions. Dr. Leenaars shows that DSI is, however, not mysterious; the reader can learn the generally accepted, evidence-based protocols of the psychological autopsy. Illuminated by individual (idiographic) case studies and general (nomothetic) research, this definitive guide allows the investigator to uncover the bare bones of a suicide or death.

A Matter of Death and Life Sep 02 2021 A year-long journey by the renowned psychiatrist and his writer wife after her terminal diagnosis, as they reflect on how to love and live without regret. Internationally acclaimed psychiatrist and author Irvin Yalom devoted his career to counseling those suffering from anxiety and grief. But never had he faced the need to counsel himself until his wife, esteemed feminist author Marilyn Yalom, was diagnosed with cancer. In *A Matter of Death and Life*, Marilyn and Irv share how they took on profound new struggles: Marilyn to die a good death, Irv to live on without her. In alternating accounts of their last months together and Irv's first months alone, they offer us a rare window into facing mortality and coping with the loss of one's beloved. The Yaloms had numerous blessings—a loving family, a Palo Alto home under a magnificent valley oak, a large circle of friends, avid readers around the world, and a long, fulfilling marriage—but they faced death as we all do. With the wisdom of those who have thought deeply, and the familiar warmth of teenage sweethearts who've grown up together, they investigate universal questions of intimacy, love, and grief. Informed by two lifetimes of experience, *A Matter of Death and Life* is an openhearted offering to anyone seeking support, solace, and a meaningful life.

Dr. Death May 03 2024 Who killed the killer? In this brilliant and startling psychological thriller, Jonathan Kellerman, perennial bestselling author, gives a sharp and timely twist to homicide's central question. Someone has murdered euthanasia champion Dr. Eldon Mate—a self-styled Dr. Death responsible for scores of assisted suicides. In a burst of bloody irony, the killer chooses to dispatch the doctor in the back of Mate's own suicide van, hooking him up to the killing apparatus dubbed "the Humanitron"—and adding some butchering touches of his own. The case is assigned to veteran LAPD homicide detective Milo Sturgis, who turns, once again, to his friend Dr. Alex Delaware. But working this case raises a conflict of interest for Alex so profound that he can't even discuss it with Milo. The tension that develops between cop and psychologist further complicates an already baffling and complex murder investigation—one whose suspects include the families of Dr. Mate's "travelers," Mate's own son, and a psychopathic killer who relishes the geometry of death. *Dr. Death* is a rich brew of unforgettable characters, labyrinthine plotting, page-turning prose, and the unique insights into the darkest corners of the human mind that have earned Jonathan Kellerman international accolades as the master of psychological suspense.

The Psychology of Death Investigations Aug 26 2023 *The Psychology of Death Investigations* outlines definitively how behavioral evidence can often provide the necessary components and "missing pieces" to complement physical evidence as an essential tool for incident reconstruction. In order to determine the direction of an investigation and to prioritize leads, if necessary, death investigators must establish the manner of a death: natural, accident, homicide or suicide. The most overlooked aspect of death investigation is the psychological dimension, which can provide unique leads, correct false assumptions, enhance investigative awareness, and solve cases in surprising ways. In an estimated 10–20% of cases, the manner of death cannot be determined, or worse, has been erroneously categorized. Since many jurisdictions can't afford behavioral consultants, this book has been written to provide practical information for a basic psychological analysis. If the circumstances surrounding a death are equivocal, psychological consultants can compile information retrospectively about a deceased person's mental state and possible motive to assist with unravelling ambiguity about the manner of death. This is the primary function of a psychological autopsy, and, as such, this is the first book of its kind dedicated solely to the topic. In the event that the manner of death is determined to be a homicide, behavioral profiling can help to focus the potential pool of suspects. Professionals and students alike will benefit from the exercise of cognitive awareness and the application of psychological logic presented. Psychologists, medical examiners, coroners, attorneys, fraud examiners, law enforcement personnel, death and homicide investigators, and students enrolled in criminal profiling, forensic psychology, and criminal justice programs will find this text to be a compelling and insightful reference to add to their professional toolkit.

Therapy Jul 01 2021 In Kellerman's provocative and suspenseful new novel, psychologist Alex Delaware's investigation into a sadistic double slaying leads to a corrupt multimillion-dollar scheme made up of equal parts madness and menace.

Lament of the Dead: Psychology After Jung's Red Book Oct 28 2023 With Jung's *Red Book* as their point of departure, two leading scholars explore issues relevant to our thinking today. In this book of dialogues, James Hillman and Sonu Shamdasani reassess psychology, history, and creativity through the lens of Carl Jung's *Red Book*. Hillman, the founder of Archetypal Psychology, was one of the most prominent psychologists in America and is widely acknowledged as the most original figure to emerge from Jung's school. Shamdasani, editor and cotranslator of Jung's *Red Book*, is regarded as the leading Jung historian. Hillman and Shamdasani explore a number of the issues in the *Red Book*—such as our relation with the dead, the figures of our dreams and fantasies, the nature of creative expression, the relation of psychology to art, narrative and storytelling, the significance of depth psychology as a cultural form, the legacy of Christianity, and our relation to the past—and examine the implications these have for our thinking today.

Beyond Death Anxiety Mar 09 2022 "This book fruitfully serves those looking to apply Ernest Becker's ideas psychotherapeutically, in individual counseling or in group therapy. A capstone to Robert Firestone's 50 years of work in psychotherapy, psychoanalysis and psychiatry and to the numerous books written by these authors, Firestone and Catlett show how to apply the themes and implications of the ideas of Ernest Becker in everyday life. Their basic premise is that accepting death is part of developing an affirming and meaningful experience of life. Contributing to the credibility of their presentation is the wealth of clinical evidence and personal experience Firestone and Catlett incorporate." --The Ernest Becker Foundation "[F]ascinating and an enjoyable read....steeped in well researched and relevant psychological and sociological perspectives applicable to all social studies areas..." --Carol Lloyd University of Chichester "Firestone and Catlett's work is a marvelous achievement....This volume is both innovative and intrepid. Firestone and Catlett challenge prevailing psychoanalytic views on death and they demolish many of the accepted canons of thanatology and existential psychology. ...This is required reading for anyone who purports to talk about death." -- Jerry Piven, PhD Author of *Death and Delusion: A Freudian Analysis of Mortal Terror* "[A] towering synthesis of personal and clinical wisdom about death....with a superb overview of the psychology of death and death anxiety....Dr. Firestone draws on the best of the existential-humanistic as well as the psychoanalytic thinkers to address a flourishing path toward self-realization." -Kirk J. Schneider, PhD Author, *Existential-Integrative Psychotherapy and Awakening to Awe* (From the Foreword) Firestone and Catlett's groundbreaking volume assists mental health practitioners in helping their clients learn to accept and face their mortality. They describe the many defenses of death anxiety that keep individuals from achieving personal fulfillment, and also suggest methods to cope directly with fears of death; an approach that, ironically, can lead to more satisfaction, more freedom, and a greater appreciation for the gift of life. This book examines the many destructive consequences of death anxiety, including introversion, depression, and withdrawal from life. Throughout the book, the authors demonstrate the importance of achieving what they call life-affirming death awareness. Key topics include: The dawning awareness of death and its impact on the developing child Literal and symbolic defenses against death anxiety Separation theory and "the fantasy bond" Challenging the defenses that interfere with living fully Microsuicide: the death of the spirit Breaking with limiting religious dogma and cultural worldviews With this book, mental health practitioners and their clients will be able to better understand death awareness, overcome the defenses against death anxiety, and ultimately lead richer, more fulfilling lives.

Manner of Death Apr 02 2024 The past resurfaces in ways that are as intimate as they are frightening when Dr. Alan Gregory and Dr. Sawyer Sackett—a woman he once loved—are plunged into the private nightmare of a killer who knows about the terrifying power of mind games.
