Phytoliths - rigid microscopic bodies that occur in most plant species - have gone a long way since that day when Darwin became curious about a fine powder deposited on the instruments of the HMS Beagle. This fascinating subject started because of curiosity, and in that respect it was a good start since curiosity is probably the most important drive behind first-rate research. Fortunately curiosity is still present in phytolith research; the articles in this book are full of curiosity and ingenuity. Phytolith research has grown since the times of Darwin and in the last three decades has bloomed. The papers in this collection span most of the application of phytolith analysis (from archaeology, palaeoenvironmental studies and botany, to name just some) and the majority of them were presented at the 4th International Meeting on Phytolith Research that was held in Cambridge (UK) in August 2002. This book constitutes the refereed proceedings of the 16th Iberoamerican Congress on Pattern Recognition, CIARP 2011, held in Pucón, Chile, in November 2011. The 81 revised full papers presented together with 3 keynotes were carefully reviewed and selected from numerous submissions. Topics of interest covered are image processing, restoration and segmentation; computer vision; clustering and artificial intelligence; pattern recognition and classification; applications of pattern recognition; and Chilean Workshop on Pattern Recognition. Contemporary research into written academic discourse has become increasingly polarised between two approaches: corpus linguistics and discourse analysis. This volume presents a selection of recent work by experts in academic written discourse, and illustrates how corpus linguistics and discourse analysis can work as complementary approaches. The overall introduction sets the

volume against the backdrop of current work in English for Academic Purposes, and introductions to the each section draw out connections between the chapters and put them into context. The contributors are experts in the field and they cover both novice and expert examples of EAP. The book ends with an afterword that provides an agenda-setting closing perspective on the future of EAP research. It will appeal to reserachers and postgrduates in applied linguistics, corpus linguistics, discourse analysis and EAP. Challenging the longstanding interpretation of the early English public sphere as polite, inclusive, and egalitarian this book re-interprets key texts by representative male authors from the period—Addison, Steele, Shaftesbury, and Richardson—as reactionary responses to the widely-consumed and surprisingly subversive work of women writers such as Mary Astell, Delarivier Manley, and Eliza Haywood, whose political and journalistic texts have up until now received little scholarly consideration. By analyzing a wide range of materials produced between the 1690s to the 1750s, Pollock exposes a literary marketplace characterized less by cool rational discourse and genial consensus than by vehement contestation and struggles for cultural authority, particularly in debates concerning the proper extent of women's participation in English public life. Utilizing innovative methods of research and analysis the book reveals that even at its moment of inception, there was an immanent critique of the early liberal public sphere being articulated by women writers who were keenly aware of the hierarchies and techniques of exclusion that contradicted their culture's oft-repeated appeals to the principles of equality and universality.

Genres across the Disciplines presents cutting edge, corpus-based research into student writing in higher education. Genres across the Disciplines is essential reading for those involved in syllabus and materials design for the development of writing in higher education, as well as for those investigating EAP. The book explores creativity and the use of metaphor as students work towards becoming experts in the genres of their discipline. Grounded in the British Academic Written English (BAWE) corpus, the text is rich with authentic examples of assignment tasks, macrostructures, concordances and keywords. Also available separately as a paperback.

Forest trees cover 30% of the earth's land surface, providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots, and are source of medicinal products in addition to benefits such as carbon sequestration, water shed protection, and habitat for 1/3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement and pragmatic utilization of trees are global priorities. This book provides comprehensive and up to date information about tree characterization, biological understanding, and improvement through biotechnological and molecular tools.

Similarities and differences between speech and writing have been the subject of innumerable studies, but until now there has been no attempt to provide a unified linguistic analysis of the whole range of spoken and written registers in English. In this widely acclaimed empirical study, Douglas Biber uses computational techniques to analyse the linguistic characteristics of twenty three spoken and written genres, enabling identification of the basic, underlying dimensions of variation in English. In *Variation Across Speech and Writing*, six dimensions of variation

are identified through a factor analysis, on the basis of linguistic co-occurrence patterns. The resulting model of variation provides for the description of the distinctive linguistic characteristics of any spoken or written text and demonstrates the ways in which the polarization of speech and writing has been misleading, and thus enables reconciliation of the contradictory conclusions reached in previous research. Articles in this volume discuss the role and effectiveness of corpora and corpus-linguistic techniques for language teaching but also deal with broader issues such as the relationship between corpora and second language teaching and how the different perspectives of foreign language teachers and applied linguists can be reconciled.
