*How to Be a Conscious Eater* Sophie Egan, 2020-03-17 A radically practical guide to making food choices that are good for you, others, and the planet. Is organic really worth it? Are eggs OK to eat? If so, which ones are best for you and for the chicken? Cage Free, Free Range, Pasture Raised. What about farmed salmon, soy milk, sugar, gluten, fermented foods, coconut oil, almonds? Thumbs up, thumbs down, or somewhere in between. Using three criteria: Is it good for me? Is it good for others? Is it good for the planet? Sophie Egan helps us navigate the bewildering world of food so that we can all become conscious eaters. To eat consciously is not about diets, fads, or hard and fast rules. It's about having straightforward, accurate information to make smart, thoughtful choices amid the chaos of conflicting news and marketing hype. An expert on food's impact on human and environmental health, Egan organizes the book into four categories: stuff that comes from the ground, stuff that comes from animals, stuff that comes from factories, and stuff that's made in restaurant kitchens. This practical guide offers bottom-line answers to your most top-of-mind questions about what to eat. The clearest, most useful food book I own. A.J. Jacobs, New York Times bestselling author.

*The Vanishing Coin* Kate Egan, Mike Lane, 2014-04-22 Magic tricks with instructions inside. Cover.

**Permutation City** Greg Egan, 1994-04-26 Paul Durham keeps making copies of himself: software simulations of his own brain and body which can be run in virtual reality, albeit seventeen times more slowly than real time. He wants them to be his guinea pigs for a set of experiments about the nature of artificial intelligence, time, and causality, but they keep changing their mind and bailing out on him, shutting themselves down. Maria Deluca is an Autoverse addict; she's unemployed and running out of money, but she can't stop wasting her time playing around with the cellular automaton known as the Autoverse, a virtual world that follows a simple set of mathematical rules as its laws of physics. Paul makes Maria a very strange offer: he asks her to design a seed for an entire virtual biosphere, able to exist inside the Autoverse, modelled right down to the molecular level. The job will pay well and will allow her to indulge her obsession. There has to be a catch, though, because such a seed would be useless without a simulation of the Autoverse large enough to allow the resulting biosphere to grow and flourish, a feat far beyond the capacity of all the computers in the world.

*Diaspora* Greg Egan, 1997-09-03 In 2975, the orphan Yatima is grown from a randomly mutated digital mind seed in the conceptory of Konishi-polis. Yatima explores the Coalition of Polises, the network of computers where most life in the solar system now resides, and joins a friend, Inoshiro, to borrow an abandoned robot body and meet a thriving community of fleshers in the enclave of Atlanta. Twenty-one years later, news arrives from a lunar observatory: gravitational waves from Lac G 1, a nearby pair of neutron stars, show that the Earth is about to be bathed in a gamma-ray flash created by the stars' collision, an event that was not expected to take place for seven million years. Yatima and Inoshiro return to Atlanta to try to warn the fleshers, but meet suspicion and disbelief. Some lives are saved, but the Earth is ravaged. In the aftermath of the disaster, the survivors resolve to discover the cause of the neutron stars' premature collision, and they launch a thousand polises into interstellar space in search of answers. This diaspora eventually reaches a planet subtly transformed to encode a message from an older group of travellers; a greater danger than Lac G 1 is imminent, and the only escape route leads beyond the visible universe.

**The World Book Encyclopedia**, 2002 An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Quarantine Greg Egan,1992-09-29 In 2034 the stars went out An unknown agency surrounded the solar system with an impenetrable barrier concealing the universe from humanity s gaze In 2067 Nick Stavrianos is hired to investigate the disappearance of a mentally disabled woman Laura Andrews from the institution where she was being cared for Aided by a skull full of neural modifications he follows her trail to the Republic of New Hong Kong where an organisation known as the Ensemble has uncovered Laura s extraordinary secret an ability that could transform the world

The Clockwork Rocket Greg Egan,2011-07-01 In Yalda s universe light has no universal speed and its creation generates energy On Yalda s world plants make food by emitting their own light into the dark night sky As a child Yalda witnesses one of a series of strange meteors the Hurlers that are entering the planetary system at an immense unprecedented speed It becomes apparent that her world is in imminent danger and the task of dealing with the Hurlers will require knowledge and technology far beyond anything her civilization has yet achieved Only one solution seems tenable if a spacecraft can be sent on a journey at sufficiently high speed its trip will last many generations for those on board but it will return after just a few years have passed at home The travelers will have a chance to discover the science their planet urgently needs and bring it back in time to avert disaster
