Large-Scale Victimisation as a Potential Source of Terrorist Activities U. Ewald,K. Turković,2006-12-19 This publication presents a subject that is unfortunately as significant today as it was two years ago Sadly this continuing relevance seems to confirm the views of the German radical pacifist Kurt Tucholsky who stated in response to the atrocities and sufferings of WWI But men never ever learnt from history and they will not do so in the future Hic Rhodus Recent events in Iraq the Middle East East Timor or the Democratic Republic of Congo and possible links regarding issues of terrorism raise the question what criminological and victimological research offers in assisting to break vicious spirals of ignorance of gross human rights violations and the immense human sufferings in the context of armed conflicts and terrorism The answer to this question still remains open Yet this publication confirms the substantial willingness to learn from the past by critically reviewing large scale victimisation arising out of protracted conflicts in order to better understanding the necessary prerequisites for enduring peace making in post conflict societies and to anticipate and suggest approaches to healing victimising effects *Seize the Daylight* David Prerau,2009-04-28 Benjamin Franklin conceived of it Sir Arthur Conan Doyle endorsed it Winston Churchill campaigned for it Kaiser Wilhelm first employed it Woodrow Wilson and Franklin Roosevelt went to war with it and more recently the United States fought an energy crisis with it For several months every year for better or worse daylight savings time affects vast numbers of people throughout the world And from Ben Franklin s era to today its story has been an intriguing and sometimes bizarre amalgam of colorful personalities and serious technical issues purported costs and perceived benefits conflicts between interest groups and government policymakers It impacts diverse and unexpected areas including agricultural practices street crime the reporting of sports scores traffic accidents the inheritance rights of twins and voter turnout Illustrated with a popular look at science and history *Seize the Daylight* presents an intriguing and surprisingly entertaining story of our attempt to regulate the sunlight hours [A Study of the Evolution of Concentration in the Electrical Appliances Industry for the United Kingdom](#) MLH Consultants Ltd,Commission of the European Communities. historical political and technical aspects of the fascinating story behind the movement for DST with many light and offbeat anecdotes

Spring Forward Michael Downing, 2009-02-17 Michael Downing is obsessed with Daylight Saving the loopy idea that became the most persistent political controversy in American history Almost one hundred years after Congressmen and lawmakers in every state first debated ridiculed and then passionately embraced the possibility of saving an hour of daylight no one can say for sure why we are required by law to change our clocks twice a year Who first proposed the scheme The most authoritative sources agree it was a Pittsburgh industrialist Woodrow Wilson a man on a horse in London a Manhattan socialite Benjamin Franklin one of the Caesars or the anonymous makers of ancient Chinese and Japanese water clocks Spring Forward is a portrait of public policy in the 20th century a perennially boiling cauldron of unsubstantiated science profiteering masked as piety and mysteriously shifting time zone boundaries It is a true to life social comedy with Congress in the leading role surrounded by a supporting cast of opportunistic ministers movie moguls stockbrokers labor leaders sports fanatics and railroad execs

[The Blood-Brain and Other Neural Barriers](#) Sukriti Nag, 2010-11-19. Evolving technologies starting with tracer studies and more recently with genomics and proteomics have provided novel information about the molecular properties of cerebral endothelium and astrocytes; however, further studies must be done in animal models of neurological diseases and in humans to get a clearer understanding of the pathogenesis of blood brain barrier (BBB) breakdown in nervous system diseases. In *The Blood Brain and Other Neural Barriers: Reviews and Protocols*, experts in the field present a series of cutting edge protocols which can be used to study the barriers. Opening with detailed information on components of the neurovascular unit as well as the blood, cerebrospinal, blood, retinal and blood nerve barriers, the book continues with meticulous techniques to image the barriers in humans and experimental animals, followed by cutting edge molecular techniques to study the BBB and novel models to study the barriers, and it concludes with techniques for the delivery of therapeutic agents across the BBB. Written in the highly successful *Methods in Molecular Biology*™ series format, protocol chapters include introductions to their respective topics, lists of the necessary materials, step by step, readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls. Authoritative and up to date, *The Blood Brain and Other Neural Barriers: Reviews and Protocols* will aid the research efforts of not only graduate students but also more experienced investigators and support future studies of these vital systems.
