Evolution or revolution ... this was the dilemma Honda faced in creating the new fifth generation Gold Wing. Consumers were happy with the near-perfect GL1500 Gold Wing, but sales were declining and owners ageing. In 1996 Honda's designers and engineers decided the only way forward for the Gold Wing was a revolutionary approach. Given a brief by management to incorporate more 'Fun Factor' and make a large luxury touring motorcycle perform like a sports orientated machine, their target market was the younger rider. The GL1800 Gold

Wing launched as a 2001 model and was updated in 2006 with the world's first and only motorcycle airbag system. Surviving a production return to Japan it had a second face-lift for 2012 and from that, two other variants emerged, a 'Bagger' and 'Power Cruiser', the F6B and Valkyrie/F6C. The GL1800 was destined to become the longest running Gold Wing series, but over its 17 years of production Honda faced stiff competition. Peter Rakestrow examines the GL1800's history from 1996 to the end of production in 2017, looking at model improvements through the years of this legendary marque, creating a point of reference for owners, buyers and restorers alike. Tim Kingham looks at the iconic Vincent Black Shadow. Whether the reader has simple maintenance or a complete engine rebuild in mind, he or she can rest assured that there's a Haynes manual for just above every popular domestic and import car, truck, and motorcycle. By conducting complete tear-downs and rebuilds, the staff at Haynes Publishing has discovered all the problems owners will find when repairing or rebuilding their vehicles. By documenting each process with hundreds of illustrations and step-by-step instructions that show the exact order of assembly, Haynes manuals make every step easy to follow. "This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't. Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the motorcycle. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and plenty of photographs that show each step. Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable.
