Designed by leading educators, the product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character. A distinguished group of historians

answers key questions about the past and about the present and future. What wins wars? Why do empires rise and fall? What makes a great leader? What causes nationalism? How do spiritual movements spread? These are the questions in the forefront of our minds today but they meant just as much to people in the past. How did earlier generations tackle them, and how far can historians use the lessons of the past to help find some answers? Drawing on examples from ancient Greece to Tony Blair's Britain, leading historical thinkers address twenty of the really big questions that have been asked

over the centuries: What is history? How does personality affect politics? What is the impact of technology on social change? How do intellectual movements start? How do our physical bodies and our private lives impact history? Each essay is accompanied by a journalist, discussing the views of other leading thinkers, today and in the past. The result is a stimulating ride over continents and across centuries in search of answers that are sometimes surprising, often controversial, and all of great relevance to how we live today. "From the

Hardcover edition." Over 300 questions (and Answers) are included in this study guide to help you prepare for the AP World History exam. "Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion - as well as nasty

germs and potent weapons of war -- and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history.
