Aging and the Macroeconomy National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population, 2013-01-10 The United States is in the midst of a major demographic shift In the coming decades people aged 65 and over will make up an increasingly large percentage of the population The ratio of people aged 65 to people aged 20 64 will rise by 80% This shift is happening for two reasons people are living longer and many couples are choosing to have fewer children and to have those

children somewhat later in life The resulting demographic shift will present the nation with economic challenges both to absorb the costs and to leverage the benefits of an aging population Aging and the Macroeconomy Long Term Implications of an Older Population presents the fundamental factors driving the aging of the U S population as well as its societal implications and likely long term macroeconomic effects in a global context The report finds that while population aging does not pose an insurmountable challenge to the nation it is imperative that sensible policies are implemented soon to allow companies and households to respond It offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape

Automotive Development Processes Julian Weber,2009-06-22 The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed Be it OEMs developing new models suppliers integrating themselves deeper into the development processes of different OEMs analysts estimating economical risks and opportunities of automotive investments or even governments creating and evaluating scenarios for financial aid for suffering automotive companies At the end of the day it is absolutely indispensable to comprehensively understand the processes of automotive development the core subject of this book Let s face it More than a century after Carl Benz Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles the overall concept of passenger cars has not changed much Even though components have been considerably optimized since then motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road s face via gearboxes transmission shafts and wheels which together with spring damper units allow driving stability and ride comfort Vehicles are still navigated by means of a steering wheel that turns the front wheels and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat

Ludwig Boltzmann Carlo Cercignani, 2006-01-12 This book presents the life and personality the scientific and philosophical work of Ludwig Boltzmann one of the great scientists who marked the passage from 19th to 20th Century physics His rich and tragic life ending by suicide at the age of 62 is described in detail A substantial part of the book is devoted to discussing his scientific and philosophical ideas and placing them in the context of the second half of the 19th century The fact that Boltzmann was the man who did most to establish that there is a microscopic atomic structure underlying macroscopic bodies is documented as is Boltzmann s influence on modern physics especially through the work of Planck on light quanta and of Einstein on Brownian motion Boltzmann was the centre of a scientific upheaval and he has been proved right on many crucial issues He anticipated Kuhn s theory of scientific revolutions and proposed a theory of knowledge based on Darwin His basic results when properly understood can also be stated as mathematical theorems Some of these have been proved others are still at the level of likely but unproven conjectures The main text of this biography is written almost entirely without equations Mathematical appendices deepen knowledge of some technical aspects of the subject

U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division, 2017-02-05 This volume presents a collection of 38 articles interviews and speeches describing many aspects of the U S Marine Corps participation in Operation Enduring Freedom from 2001 to 2009 This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available From the Preface From the outset some experts doubted that the U S Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield Naval expeditionary Task Force 58 TF 58 commanded by then Brigadier General James N Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps Navy history In late November 2001 Mattis force seized what became Forward Operating Base Rhino Afghanistan from naval shipping some 400 miles away The historic assault not only blazed a path for follow on forces it also cut off fleeing al Qaeda and Taliban elements and aided in the seizure of Kandahar While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air ground task force MAGTF deployments to Afghanistan often reflected what former Commandant General Charles C Krulak coined as

the three block war Following TF 58 s deployment during the initial take down of the Taliban regime the MAGTF made few appearances in Afghanistan until 2008 Before then subsequent Marine units often deployed as a single battalion under the command of the U S Army Combined Joint Task Force CJTF to provide security for provincial reconstruction teams The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police Aviation assets sporadically deployed to support the U S led coalition mostly to conduct a specific mission or to bridge a gap in capability such as close air support or electronic warfare to counter the improvised explosive device threat From 2003 to late 2007 the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency largely centered in the restive al Anbar Province As a result of the North Atlantic Treaty Organization NATO taking over command of Afghan operations and Marine Corps commitments in Iraq relatively few Marine units operated in Afghanistan from late 2006 to 2007 Although Marines first advocated shifting resources from al Anbar to southern Afghanistan in early 2007 the George W Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H Petraeus surge strategy in Iraq By late 2007 the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story How We Lost the War We Won In recognition of the shifting tides in both Iraq and Afghanistan the Bush administration began to transfer additional resources to Afghanistan in early 2008 The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign even proposing to take over the Afghan mission from the Army
