Banks,2006-08-15 In this book Adam Banks uses the concept of the Digital Divide as a metonym for America's larger racial divide in an attempt to figure out what meaningful access for African Americans to technologies and the larger American society can or should mean He argues that African American rhetorical traditions the traditions of struggle for justice and equitable participation in American society exhibit complex and nuanced ways of understanding the difficulties inherent in the attempt to navigate through the seemingly impossible contradictions of gaining meaningful access to technological systems with the good they seem to make possible and at the same time resisting the exploitative impulses that such systems always seem to present Banks examines moments in these rhetorical traditions of appeals warnings demands and debates to make explicit the connections between technological issues and African Americans equal and just participation in American society He shows that the big questions we must ask of our technologies are exactly the same questions leaders and lay people from Martin Luther King to Malcolm X to slave quilters to Critical Race Theorists to pseudonymous chatters across cyberspace have been asking all along According to Banks the central ethical questions for the field of rhetoric and composition are technology access and the ability to address questions of race and racism He uses this book to imagine what writing instruction technology theory literacy instruction and rhetorical education can look like for

all of us in a new century Just as Race Rhetoric and Technology Searching for Higher Ground is a call for a new orientation among those who study and profess African American rhetoric it is also a call for those in the fields that make up mainstream English Studies to change their perspectives as well This volume is intended for researchers professionals and students in Rhetoric and Composition Technical Communication the History of Science and Society and African American Studies

Partners in Literacy Allen Brizee, Jaclyn M. Wells, 2016-07-18 Partners in Literacy describes the process research relationships and theories that guided a three year partnership between the Purdue University Writing Lab and two community organizations in Lafayette Indiana the Lafayette Adult Resource Academy and WorkOne Express This partnership resulted in a new section of the globally known Purdue Online Writing Lab OWL and the Community Writing and Education Station CWest which featured adult literacy resources in the areas of GED preparation English as a Second Language and workplace and job search literacy Using an empirical and iterative design process the authors worked closely with their community partners to develop test revise and launch these resources In Partners in Literacy the authors argue that writing centers can be effective spaces from which to work with the community and that writing centers missions of sustainability outreach and research driven practice can offer valuable philosophies for civic engagement To support this argument the book discusses the research methods and findings the process behind developing and sustaining the three year engagement project and the personal relationships that ultimately held the project together

Methuselah's Zoo Steven N. Austad, 2022-08-16 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don't make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110 Is there anything humans can learn from the exceptional longevity of some animals in the wild In Methuselah's Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we're more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them
