

Chapter 34: The Biosphere: An Introduction to Earth's Diverse Environments

Guided Reading Activities

Big Idea: The biosphere

Answer the following questions as you read modules 34.1–34.5:

1. A scientist that is studying the habitat of mountain gorillas is most accurately called a(n) ecologist.
2. Which of the following includes all of the others?
 - a. Community
 - b. Organism
 - c. Ecosystem
 - d. Population
3. What is the relationship between a landscape and an ecosystem?
A landscape includes multiple ecosystems with the absence of clearly defined borders.
4. What effect does DDT have on the eggshells of birds?
It caused them to become thin and prone to breaking when sat on by the mother.
5. Rachel Carson published a book called *Silent Spring* in 1962 that called attention to the dangers of DDT.
6. At the bottom of page 681 of your textbook, the authors ask a thought-provoking question, “Why can’t ecologists alone solve environmental problems?” The answer provided indicates that solving these types of problems involves a blend of ethical, economic, and political considerations. A perfect example is the decision on whether or not to build the Keystone pipeline from the Alberta tar sands to the American Gulf Coast. Identify a total of three considerations (you may choose from which side to assign the extra argument) that are critical to this debate.
A consideration would be the creation of jobs through construction on the pipeline. Another consideration would be the possible ecological consequences, such as damage to watersheds and aquifers. Another consideration is the political desire to balance the objectives of different constituencies such as big labor, business, and environmental groups.
