

The background of the cover is a vibrant blue with a subtle, repeating pattern of molecular structures. In the foreground, several ball-and-stick molecular models are scattered. On the left, a large, complex molecule is shown with purple spheres (likely nitrogen) and grey spheres (likely carbon). In the center, a smaller molecule with grey, white, and red spheres is visible. On the right, a large, flat, hexagonal lattice structure, resembling a sheet of graphite or a portion of a carbon nanotube, is depicted with blue spheres. The overall aesthetic is scientific and modern.

**Chemistry** Nivaldo J. Tro,2022 As you begin this course I invite you to think about your reasons for enrolling in it Why are you taking general chemistry More generally why are you pursuing a college education If you are like most college students taking general chemistry part of your answer is probably that this course is required for your major and that you are pursuing a college education so you can get a good job some day Although these are good reasons I would like to suggest a better one I think the primary reason for your education is to prepare you to live a good life You should understand chemistry not for what it can get you but for what it can do to you Understanding chemistry I believe is an important source of happiness and fulfillment Let me explain Understanding chemistry helps you to live life to its fullest for two basic reasons The first is intrinsic through an understanding of chemistry you gain a powerful appreciation for just how rich and extraordinary the world really is The second reason is extrinsic understanding chemistry makes you a more informed citizen it allows you to engage with many of the issues of our day In other words understanding chemistry makes you a deeper and richer person and makes your country and the world a better place to live These reasons have been the foundation of education from the very beginnings of civilization

Introductory Chemistry Nivaldo J. Tro, 2023. This book is for you and every text feature is meant to help you learn and succeed in your chemistry course. I wrote this book with two main goals for you in mind: to see chemistry as you never have before and to develop the problem-solving skills you need to succeed in chemistry. I want you to experience chemistry in a new way. I have written each chapter to show you that chemistry is not just something that happens in a laboratory; chemistry surrounds you at every moment. Several outstanding artists have helped me to develop photographs and art that will help you visualize the molecular world. From the opening example to the closing chapter, you will see chemistry. My hope is that when you finish this course, you will think differently about your world because you understand the molecular interactions that underlie everything around you. My second goal is for you to develop problem-solving skills. No one succeeds in chemistry or in life really without the ability to solve problems. I can't give you a one-size-fits-all formula for problem solving, but I can and do give you strategies that will help you develop the chemical intuition you need to understand chemical reasoning.

**Chemistry** Bruce Averill, Patricia Eldredge, 2007. Emphasizes on contemporary applications and an intuitive problem-solving approach that helps students discover the exciting potential of chemical science. This book incorporates fresh applications from the three major areas of modern research: materials, environmental chemistry, and biological science.

*Principles of Chemistry* Nivaldo J. Tro, 2010. Great chemistry comes in small packages, and this brief new volume helps readers discover the excitement and relevance of chemistry. In this innovative book, acclaimed author Nivaldo Tro focuses exclusively on the core concepts of general chemistry without sacrificing depth or relevance. A unique integration of macroscopic, molecular, and symbolic illustrations helps readers visualize the various dimensions of chemistry, and Tro's engaging writing style captures the reader's attention with relevant applications.

MasteringChemistry walks readers through problem solving while promoting understanding of chemistry concepts in the world around us: Matter, Measurement, and Problem Solving; Atoms and Elements; Molecules, Compounds, and Chemical Equations; Chemical Quantities and Aqueous Reactions; Gases; Thermochemistry; The Quantum Mechanical Model of the Atom; Periodic Properties of the Elements; Chemical Bonding I: Lewis Theory; Chemical Bonding II: Molecular Shapes, Valence Bond Theory, and Molecular Orbital Theory; Liquids, Solids, and Intermolecular Forces; Solutions; Chemical Kinetics; Chemical Equilibrium; Acids and Bases; Aqueous Ionic Equilibrium; Free Energy and Thermodynamics; Electrochemistry; Radioactivity and Nuclear Chemistry; Organic Chemistry.
