Film and video have grown to be as significant in our time as books, newspapers and magazines. Documentary film-making is fast becoming as important and useful a skill as the ability to write well. Like writing, it can be learned by anyone. Film and video have grown to be as significant in our time as books, newspapers and magazines. Documentary film-making is fast becoming as important and useful a skill as the ability to write well. Like writing, it can be learned by anyone. Documentary for the small screen is both for those who are new to documentary film-making but want to know how to create productions of a professional standard, as well as for those already working in the medium who wish to improve their skills by taking a closer look at the way they carry out their tasks. It is written in a logical, straightforward way, the first half taking the reader through an analysis of what documentary actually is, to constructing it through developing the story and assembling the appropriate building-blocks. In the second part, the pre-production stages of preparing proposals, costings and outlines, and researching the subject are all carefully examined, as are production planning and

the shoot, followed by the post-production stages involved in editing and reviewing the completed film. Paul Kriwaczek is an award winning documentary maker who has a wealth of experience to pass on, having worked for many years at BBC Television where he wrote, directed and produced documentary, drama, music and science programmes. This book describes the latest findings related to fuzzy techniques, discussing applications in control, economics, education, humor studies, industrial engineering, linguistics, management, marketing, medicine and public health, military engineering, robotics, ship design, sports, transportation, and many other areas. It also presents recent fuzzy-related algorithms and theoretical results that can be used in other application areas. Featuring selected papers from the Joint World Congress of the International Fuzzy Systems Association (IFSA) and the Annual Conference of the North American Fuzzy Information Processing Society (NAFIPS) IFSA-NAFIPS'2019, held in Lafayette, Louisiana, USA, on June 18 – 21, 2019, the book is of interest to practitioners wanting to use fuzzy techniques to process imprecise expert knowledge. It is also a valuable resource for researchers wishing to extend the ideas from these papers to new application areas, for graduate students and for anyone else interested in problems involving fuzziness and uncertainty. The act of creating the treasures you use to adorn your home takes the space to a deeper level; it goes beyond collecting, beyond decorating. The Maker is a gorgeously illustrated love letter to creating an intimate, well-designed, and handmade home. With sections on wall art, textiles, ceramics, lighting, and furniture, designer Tamara Maynes presents beautiful homes that showcase the personality and warmth that a cozy, quilted wall hanging or an organically shaped piece of stoneware can add to a room. Each chapter closes with a simple DIY project, plus an interview with a high-profile maker. Projects like a metalwork wall hanging, a woven table runner, and a no-fire clay bowl expose readers to the fundamentals of making—and will inspire them to create exciting works of their own. Many new or young designers dream of having their own label, but most may not know how to make their dreams a reality and

become successful in a competitive marketplace. In her practical guidebook, an experienced fashion designer and entrepreneur provides insight on how to break into the fashion industry, overcome obstacles, create a business, market a brand, and launch a fashion show. Nila Palacios, owner of Nila Palacios Latin Fashion, begins with introspective questions directed at aspiring fashion designers to help identify strengths, weaknesses, a motto, and specific goals. While encouraging designers to stay true to their individuality, passions, and objectives, Palacios provides step-by-step guidance that teaches specifically how to:

- Find inspiration and bring it to life through designs;
- Look for trends and colors and incorporate them into a collection;
- Design sketches, make a pattern, and select and cut fabrics;
- Match fabrics with specific styles;
- Conduct market research, identify a target market, and find a niche; and
- Compile a collection, market a product, choose models, and organize a show.

Fashion with Passion provides clear, focused guidance for anyone interested in breaking into the fashion industry and achieving their dreams. This book constitutes the proceedings of the Third International Conference on Internet Science held in Florence, Italy, in September 2016. This volume constitutes the proceedings of the 10th International Conference on Simulated Evolution and Learning, SEAL 2012, held in Dunedin, New Zealand, in December 2014. The 42 full papers and 29 short papers presented were carefully reviewed and selected from 109 submissions. The papers are organized in topical sections on evolutionary optimization; evolutionary multi-objective optimization; evolutionary machine learning; theoretical developments; evolutionary feature reduction; evolutionary scheduling and combinatorial

optimization; real world applications and evolutionary image analysis. The present economic and social environment has given rise to new situations within which companies must operate. As a first example, the globalization of the economy and the need for performance has led companies to outsource and then to operate inside networks of enterprises such as supply chains or virtual enterprises. A second instance is related to environmental issues. The statement about the impact of industrial activities on the environment has led companies to revise processes, to save energy, to optimize transportation.... A last example relates to knowledge. Knowledge is considered today to be one of the main assets of a company. How to capitalize, to manage, to reuse it for the benefit of the company is an important current issue. The three examples above have no direct links. However, each of them constitutes a challenge that companies have to face today. This book brings together the opinions of several leading researchers from all around the world. Together they try to develop new approaches and find answers to those challenges. Through the individual chapters of this book, the authors present their understanding of the different challenges, the concepts on which they are working, the approaches they are developing and the tools they propose. The book is composed of six parts; each one focuses on a specific theme and is subdivided into subtopics. Since its publication in 1985, the "MLA Style Manual" has been the standard guide for graduate students, teachers, and scholars in the humanities and for professional writers in many fields. Extensively reorganized and revised, the new edition contains several added sections and updated guidelines on citing electronic works--including materials found on the World Wide Web.
