Marking the Gospel Nov 27 2023 Join Jody Seymour as he leads us on a journey through the Gospel of Mark. A Senior Minister in the United Methodist Church for many years, Jody has drawn from his learning and his lively imagination to introduce-or reintroduce-you to the hero of this Gospel. This devotional commentary will, when read alongside the Gospel itself, give you the opportunity to immerse yourself in the story of Jesus' life and come closer to the heartbeat of God. Let the words of this first and oldest Gospel make a mark on you, as you discover in a fresh way its power to transform. Includes a guide for personal reflection or group discussion.

The Fruit of Stone Oct 27 2023 Mark Spragg's first novel is the story of the lifelong friendship between two Wyoming ranchers, McEban and Bennett, and their love for the same woman—Gretchen Simpson, Bennett's wife. When she leaves them both for a new life, the two men follow her on a journey across the American West, testing the limits of their friendship and love.

Engineering Mechanics Statics And Dynami May 22 2023

Explains the fundamental concepts and principles underlying the subject, illustrates the application of numerical methods to solve engineering problems with mathematical models, and introduces students to the use of computer applications to solve problems. A continuous step-by-step build up of the subject makes the book very

student-friendly. All topics and sequentially coherent subtopics are carefully organized and explained distinctly within each chapter. An abundance of solved examples is provided to illustrate all phases of the topic under consideration. All chapters include several spreadsheet problems for modeling of physical phenomena, which enable the student to obtain graphical representations of physical quantities and perform numerical analysis of problems without recourse to a high-level computer language. Adequately equipped with numerous solved problems and exercises, this book provides sufficient material for a two-semester course. The book is essentially designed for all engineering students. It would also serve as a ready reference for practicing engineers and for those preparing for competitive examinations. It includes previous years' question papers and their solutions.

Bone Fire _____ Apr 01 2024 At eighty, Einar Gilkyson has lost his share of loved ones, but still finds his house full. His granddaughter, Griff, has dropped out of college to look after him, and his long-absent sister has returned home from Chicago. But Ishawooa, Wyoming is far from bucolic, and troubles begin to boil when the sheriff finds a man murdered in a meth lab. In this gripping story from the author of An Unfinished Life,

harsh truths and difficult consolation come alongside moments of hilarity, surprise and beauty.

An Unfinished Life May 02 2024 In an extraordinary tale of love and forgiveness, Mark Spragg brings us this novel of a complex, prodigal homecoming. Jean Gilkyson has a history of choosing the wrong men. After yet another night of argument turned to violence with her boyfriend, Roy, Jean knows it's time to leave—if not for herself, then for her ten-year-old daughter, Griff. But the only place they can afford to go is Ishawooa, Wyoming, where Jean's family is dead and her deceased husband's father Einar wishes Jean was too. Of course, Griff knows none of this—only that here in Wyoming, with a grandfather she has never known and his crippled friend Mitch, she may finally be able to find a home.

The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood Nov 03 2021 Over the last decade, the field of socio-emotional development and aging has rapidly expanded, with many new theories and empirical findings emerging. This trend is consistent with the broader movement in psychology to consider social, motivational, and emotional influences on cognition and behavior. The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood

provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socioemotional development, social cognition, emotion, coping, and everyday problem solving. This field roundly rejects a universal deficit model of aging, highlighting instead the dynamic nature of socio-emotional development and the differentiation of individual trajectories of development as a function of variation in contextual and experiential influences. It emphasizes the need for a cross-level examination (from biology and neuroscience to cognitive and social psychology) of the determinants of emotional and socio-emotional behavior. This volume also serves as a tribute to the late Fredda Blanchard-Fields, whose thinking and empirical research contributed extensively to a life-span developmental view of emotion, problem solving, and social cognition. Its chapters cover multiple aspects of adulthood and aging, presenting developmental perspectives on emotion; antecedents and consequences of emotion in context; everyday problem solving; social cognition; goals and goal-related behaviors; and wisdom. The landmark volume in this new field, *The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood* is an important resource for cognitive, developmental, and social psychologists, as well as researchers and graduate students in the field of aging, emotion studies, and social psychology.
