[Repairs on TV - VCR](#) Chris Samai, 1987. *Beat the Crisis: 33 Quick Solutions for Your Company* Hermann Simon, 2010-03-11. Newspaper columns blare the news daily. There is no doubt that we are struggling through a worldwide economic and financial crisis of a magnitude not witnessed since the Great Depression. In this environment fraught with danger, no company can afford to take a wait-and-see attitude. One hesitation or misstep can result in the rapid demise of a once stalwart enterprise. Even small miscalculations can topple mighty empires. Consider the U.S. auto industry, for example. The severity of the crisis demands that your company understand its causes, diagnose carefully, implement decisively, and monitor constantly. However, the crisis also creates chances for companies that learn to assess risk, recognize opportunity, and take action quickly. This book is an antidote to the chorus of doom and gloom—a manual for business leaders and employees who are ready to fight. In *Beat the Crisis*, international strategy guru Hermann Simon offers 33 practical actions that any company can take immediately. Organized into broad categories: Changing Customer Needs, Sales, and the Sales Force; Managing Offers and Prices; and Services. Simon shows companies how to focus on the areas where emphatic action can have quick and maximum impact on corporate performance. Drawing from dozens of successful cases around the world, Simon helps readers learn to read the market signals, develop quick solutions, and stay a step ahead of their competitors while avoiding the pitfalls looming in the crisis. A concluding chapter looks beyond the crisis and considers the longer-term socio-political and business consequences in which Simon foresees a new era of restraint.

*The Big Fix* Hal Harvey, Justin Gillis, 2023-06-06. A smart, honest, and down-to-earth Elizabeth Kolbert citizen's guide to the seven urgent changes that will really make a difference for our climate. If you think the only thing you can do to combat climate change is to install a smart thermostat or cook plant-based meat, you're thinking too small. In *The Big Fix*, energy policy advisor Hal Harvey and longtime New York Times reporter Justin Gillis offer a new, hopeful way to engage with one of the greatest problems of our age. Writing in a lively, accessible style, the pair illuminate how the really big decisions that affect

our climate get made whether by the most obscure public utilities commissions or in the lofty halls of state capitols and reveal how each of us can influence these decisions to deliver change The pair focus on the seven areas of our political economy where ambitious but practical changes will have the greatest effect from what kind of power plants to build to how much insulation new houses require to how efficient cars must be before they're allowed on the road Equal parts pragmatic and inspiring and full of illustrative stories and compelling evidence Al Gore The Big Fix provides an action plan for anyone serious about holding our governments accountable and saving our threatened planet [Innovative Solutions](#) Apala Lahiri Chavan, Girish V. **Upstream** Dan Heath, 2020-03-03 Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen drawing on insights from hundreds of interviews with unconventional problem solvers So often in life we get stuck in a cycle of response We put out fires We deal with emergencies We stay downstream handling one problem after another but we never make our way upstream to fix the systems that caused the problems Cops chase robbers doctors treat patients with chronic illnesses and call center reps address customer complaints But many crimes chronic illnesses and customer complaints are preventable So why do our efforts skew so heavily toward reaction rather than prevention Upstream probes the psychological forces that push us downstream including problem blindness which can leave us oblivious to serious problems in our midst And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out as early as the ninth grade A European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation's culture And one EMS system accelerated the emergency response time of its ambulances by using data to predict where 911 calls would emerge and forward deploying its ambulances to stand by in those areas Upstream delivers practical solutions for preventing problems rather than reacting to them How many problems in our lives and in society are we tolerating simply because we've forgotten that we can fix them [Cognitive-Behavioral Therapy for Anger and Aggression in Children](#) Denis G.
