Modern Military Geography Sep 28 2023 This book of contributed chapters by subject matter expertly provides an overview and analysis of salient contemporary and historical military subjects from the military geographer's perspective. Factors of geography have had a compelling influence on battles and campaigns throughout history; however, geography and military affairs have gained heightened attention during the past two decades, and military geography is the discipline best situated to explain them. Hence, the premise of this book and its contents are founded on the principle that geographical knowledge of space, place, people, and scale provide essential insights into contemporary security issues and promotes the idea that such insight is critical to understanding and managing significant military problems at local, regional, and global scales.

The Makers of Modern Geography (RLE Social & Cultural Geography) Jan 21 2023 This book examines the works of the outstanding makers of modern geography and demonstrates the consistency of idea and purpose in their work. Geography as an explicitly defined field of knowledge is more than two thousand years old, but as a university subject, geography is only 150 years old, and in this period it has developed hugely. This study traces the development of modern geography as an organized body of knowledge, in the light of the works of its foremost German and French contributors.

The Geography of Bliss Jul 15 2022 Now a new series on Peacock with Rainn Wilson, THE GEOGRAPHY OF BLISS is part travel memoir, part humor, and part twisted self-help guide that takes the viewer across the globe to investigate not what happiness is, but WHERE it is. Are people in Switzerland happier because it is the most democratic country in the world? Do citizens of Qatar, awash in petrodollars, find joy in all that cash? Is the King of Bhutan a visionary for his initiative to calculate Gross National Happiness? Why is Asheville, North Carolina so damn happy? In a unique mix of travel, psychology, science and humor, Eric Weiner answers those questions and many others, offering travelers of all moods some interesting new ideas for sunnier destinations and dispositions.

The New Geography of Jobs Oct 06 2021 Makes correlations between success and geography, explaining how such rising centers of innovation as San Francisco and Austin are likely to offer influential opportunities and shape the national and global economies in positive or detrimental ways.

American Geography Apr 11 2022 Drawing from the vast photography collection at the San Francisco Museum of Modern Art, *American Geography* charts a visual history of land use in the United States From the earliest photographic records of human habitation to the latest aerial and digital pictures, from almost uninhabited desert and isolated mountainous territories to suburban sprawl and densely populated cities, this compilation offers an increasingly nuanced perspective on the American landscape. Divided by region, these photographs address ways in which different histories and traditions of land use have given rise to different cultural transitions: from the Midwestern prairies and agricultural traditions of the South, to the riverine systems in the Northeast, and the environmental challenges and riches of the far West. *American Geography* also looks at the evidence of older habitation from the adobe dwellings and ancient cultures of the Southwest to the Midwestern mounds, many of them prehistoric.

SFMOMA's last photography exhibition to consider land use, *Crossing the Frontier* (1996), examined only the American West. At the time, this focus offered a different way to think about landscape, and a useful way to reconsider pictures of the region. *American Geography* expands upon the groundwork laid by *Crossing the Frontier*, providing a complex, thought-provoking survey. Photographers include: Carleton E. Watkins, Barbara Bosworth, Lee Friedlander, Stephen Shore, Debbie Fleming Caffery, Mitch Epstein, An-My Lê, William Eggleston, Alec Soth, Mishka Henner, Trevor Paglen, Victoria Sambunaris, Emmet Gowin, Robert Adams, Terry Evans, Dorothea Lange and Mark Ruwedel, among others.

World History and Geography Jun 01 2021 This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the

sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

The Geography of Genius Mar 30 2021 Tag along on this New York Times bestselling “witty, entertaining romp” (The New York Times Book Review) as Eric Weiner travels the world, from Athens to Silicon Valley—and back through history, too—to show how creative genius flourishes in specific places at specific times. In this “intellectual odyssey, traveler’s diary, and comic novel all rolled into one” (Daniel Gilbert, author of *Stumbling on Happiness*), acclaimed travel writer Weiner sets out to examine the connection between our surroundings and our most innovative ideas. A “superb travel guide: funny, knowledgeable, and self-deprecating” (The Washington Post), he explores the history of places like Vienna of 1900, Renaissance Florence, ancient Athens, Song Dynasty Hangzhou, and Silicon Valley to show how certain urban settings are conducive to ingenuity. With his trademark insightful humor, this “big-hearted humanist” (The Wall Street Journal) walks the same paths as the geniuses who flourished in these settings to see if the spirit of what inspired figures like Socrates, Michelangelo, and Leonardo remains. In these places, Weiner asks, “What was in the air, and can we bottle it?” “Fun and thought provoking” (Miami Herald), *The Geography of Genius* reevaluates the importance of culture in nurturing creativity and “offers a practical map for how we can all become a bit more inventive” (Adam Grant, author of *Originals*).

United States May 05 2024

Why Place Matters Aug 28 2023 Contemporary American society, with its emphasis on mobility and economic progress, all too often loses sight of the importance of a sense of “place” and community. Appreciating place is essential for building the strong local communities that cultivate civic engagement, public leadership, and many of the other goods that contribute to a flourishing human life. Do we, in losing our places, lose the crucial basis for healthy and resilient individual identity, and for the cultivation of public virtues? For one can't be a citizen without being a citizen of some place in particular; one isn't a citizen of a motel. And if these dangers are real and present ones, are there ways that intelligent public policy can begin to address them constructively, by means of reasonable and democratic innovations that are likely to attract wide public support? Why Place Matters takes these concerns seriously, and its contributors seek to discover how, given the American people as they are, and

American economic and social life as it now exists—and not as those things can be imagined to be in some utopian scheme—we can find means of fostering a richer and more sustaining way of life. The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society. The book includes contributions from distinguished scholars and writers such as poet Dana Gioia (former chairman of the National Endowment for the Arts), geographer Yi-Fu Tuan, urbanist Witold Rybczynski, architect Philip Bess, essayists Christine Rosen and Ari Schulman, philosopher Roger Scruton, transportation planner Gary Toth, and historians Russell Jacoby and Joseph Amato.

Women and Geography on the Early Modern English Stage

Dec 08 2021 In a late 1590s atlas proof from cartographer John Speed, Queen Elizabeth appears, crowned and brandishing a ruler as the map's scale-of-miles. Not just a map key, the queen's depiction here presents her as a powerful arbiter of measurement in her kingdom. For Speed, the queen was a formidable female presence, authoritative, ready to measure any place or person. The atlas, finished during James' reign, later omitted her picture. But this disappearance did not mean Elizabeth vanished entirely; her image and her connection to geography appear in multiple plays and maps. Elizabeth becomes, like the ruler she holds, an

instrument applied and adapted. *Women and Geography on the Early Modern English Stage* explores the ways in which mapmakers, playwrights, and audiences in early modern England could, following their queen's example, use the ideas of geography, or 'world-writing', to reshape the symbolic import of the female body and territory to create new identities. The book demonstrates how early modern mapmakers and dramatists -- men and women -- conceived of and constructed identities within a discourse of fluid ideas about space and gender.

Spatial Modernities May 01 2021 This collection of essays offers a series of reflections on the specific literary and cultural forms that can be seen as the product of modernity's spatial transformations, which have taken on new urgency in today's world of ever increasing mobility and global networks. The book offers a broad perspective on the narrative and poetic dimensions of the modern discourses and imaginaries that have shaped our current geographical sensibilities. In the early twenty-first century, we are still grappling with the spatial effects of 'early' and 'high' modern developments, and the contemporary crises revolving around political boundaries and geopolitical orders in many parts of the world have intensified spatial anxieties. They call for a sustained analysis of individual perceptions, cultural constructions and political implications of spatial processes, movements and relations. The contributors of this book focus both on the spatial orders of modernity and on the various dynamic processes that have shaped our engagement with modern space.
