Collateral Knowledge Annelise Riles,2011-05 Who are the agents of financial regulation Is good or bad financial governance merely the work of legislators and regulators Here Annelise Riles argues that financial governance is made not just through top down laws and

policies but also through the daily use of mundane legal techniques such as collateral by a variety of secondary agents from legal technicians and retail investors to financiers and academics and even computerized trading programs Drawing upon her ten years of ethnographic fieldwork in the Japanese derivatives market Riles explores the uses of collateral in the financial markets as a regulatory device for stabilizing market transactions How collateral operates Riles suggests is paradigmatic of a class of low profile mundane but indispensable activities and practices that are all too often ignored as we think about how markets should work and be governed Riles seeks to democratize our understanding of legal techniques and demonstrate how these day to day private actions can be reformed to produce more effective forms of market regulation

Social Innovations in the Urban Context Taco Brandsen,Sandro Cattacin,Adalbert Evers,Annette Zimmer,2016-04-05 This book addresses the practice of social innovation which is currently very much in the public eye New ideas and approaches are needed to tackle the severe and wicked problems with which contemporary societies are struggling Especially in times of economic crisis social innovation is regarded as one of the crucial elements needed to move forward Our knowledge of its dynamics has significantly progressed thanks to an abundance of studies on social innovation both general and sector specific However despite the valuable research conducted over the past years the systematic analysis of social innovation is still contested and incomplete The questions asked in the book will be the following 1 What is the nature of social innovations 2 What patterns can be identified in social innovations emerging at the local level 3 How is the emergence and spread of social innovations related to urban governance More precisely which conditions and arrangements facilitate and hinders social innovation We explore these questions using different types of data and methods and studying different contexts In particular we focus on innovations that aim at solving problems of the young unemployed single parents and migrants This analysis is based on original research carried out in the period 2010 2013 in the framework of a European project with a specific empirical research strategy Research was carried out in 20 cities in 10 different European countries Managing Public Expenditure A Reference Book for Transition Countries OECD,2001-03-20 Managing Public Expenditure presents a comprehensive and in depth analysis of all aspects of public expenditure management from the preparation of the budget to the execution control and audit stages Corporate Finance Stephen Ross,2009-10-09 Corporate Finance by Ross Westerfield and Jaffe emphasizes the modern fundamentals of the theory of finance while providing contemporary examples to make the theory come to life The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions rather than a collection of unrelated topics They develop the central concepts of modern finance arbitrage net present value efficient markets agency theory options and the trade off between risk and return and use them to explain corporate finance with a balance of theory and application The well respected author team is known for their clear accessible presentation of material that makes this text an excellent teaching tool The ninth edition has been fully updated to reflect the recent financial crisis and is now accompanied by Connect an exciting new homework management system

Capital Budgeting Under Conditions of Uncertainty R.L. Crum, F.G.J. Derkinderen, 2012-12-06 The business environment particularly after the continuing oil crises of the seventies can be characterized as evolving rapidly in complex and often unpredictable ways Such things as high interest and inflation rates fluctuating exchange rates volatile commodity markets and increasing political turmoil have led to a situation in which explicit consideration of environmental dynamics is becoming much more important for successful business planning than was true in the past Companies are finding that it is no longer possible to conduct business as usual under these changing circumstances Rather decision makers are having to be more cognizant of the many sources of uncertainty that could have serious impacts on the continued prosperity of the firm as well as of actions that can be taken so that the company can thrive in spite of these greater uncertainties Businesses have responded to these challenges by giving more thorough consideration to strategic issues Whereas in the past the steady progression of markets and technology was taken for granted the uncertainties associated with increased worldwide competition as well as with other exogenous factors have

vii viii INTRODUCTION forced companies to think more about flexibility This involves not only how best to exploit

profitable current options but also how to position themselves at present to be able to respond appropriately to threats and opportunities as they arise in the future Unfortunately in this redirection of outlook the finance profession has not kept pace

Confronting Climate Uncertainty in Water Resources Planning and Project Design Patrick A. Ray, Casey M.

Brown, 2015-08-20 Confronting Climate Uncertainty in Water Resources Planning and Project Design describes an approach to facing two fundamental and unavoidable issues brought about by climate change uncertainty in water resources planning and project design The first is a risk assessment problem The second relates to risk management This book provides background on the risks relevant in water systems planning the different approaches to scenario definition in water system planning and an introduction to the decision scaling methodology upon which the decision tree is based The decision tree is described as a scientifically defensible repeatable direct and clear method for demonstrating the robustness of a project to climate change While applicable to all water resources projects it allocates effort to projects in a way that is consistent with their potential sensitivity to climate risk The process was designed to be hierarchical with different stages or phases of analysis triggered based on the findings of the previous phase An application example is provided followed by a descriptions of some of the tools available for decision making under uncertainty and methods available for climate risk management The tool was designed for the World Bank but can be applicable in other scenarios where similar challenges arise
