Paraxial Light Beams with Angular Momentum A. Bekshaev, Marat Samuilovich Soskin, M. Vasnetsov, 2008 Fundamental and applied concepts concerning the ability of light beams to carry a certain mechanical angular momentum AM with respect to the propagation axis are reviewed and discussed in this book In paraxial beams the total beam AM can be represented as a sum of the spin SAM and orbital OAM angular momentums SAM is an attribute of beams with elliptic circular polarisation and is related to the spin of photons OAM is conditioned by the macroscopic transverse energy circulation and does not depend on the beam polarisation state In turn the OAM can be divided in two components which reflect different forms of this energy circulation Important class of beams with OAM are vortex beams with helical geometric structure They constitute a full set of azimuthal harmonics characterised by integer index l each possessing AM l per photon Arbitrary paraxial beam can be represented as a superposition of helical beams with different l Models of helical beams and methods of their practical generation are discussed Transverse energy flows in light beams can be described on the basis of a mechanical model assimilating them to fluid bodies remarkably in a helical beam the transverse flow distribution exactly corresponds to the laws of the vortex behaviour in other fields of physics fluid dynamics electricity Experiments on transmission of the beam AM to other bodies optical elements and to suspended microparticles are discussed Research prospects and ways of practical utilisation of optical beams with AM are discussed

Graphic Design Concepts Jacobs, Marvin,2004 [Textbooks on Israel-Palestine](#) Seyed Hadi Borhani,2022-01-27 How is the Israel Palestine question narrated in Western academia What ideas dominate the key textbooks on the subject and what is presented as truth This book answers these critical questions It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine But academic support of Israel in the West has been a neglected issue with Western academic knowledge being regarded as impartial and objective This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel Palestine question Rather knowledge has been biased misleading and dogmatic and Western college students are subscribing to factual histories based on theories at best if not fiction The book is the first empirical investigation able to document this partial reporting of history Seyed Hadi Borhani examines the most popular college level textbooks used to teach the history of the Israel Palestine in Western universities combining textbook analysis to determine how the dominant academic texts report the question and a context analysis to identify who manufactures the dominant knowledge The book provides a historical map of how the Israel Palestine conflict is understood in the West The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much needed intervention into the state of affairs in Western academia
