certain issues She herself represents a slowly changing society However the people whose beliefs have been forged and impressed into their very soul by generations of tumultuous historical events are resistant to change Eventually Marianna learns to appreciate the island's cultural richness and its paradox A sense of history and mythology superstition and religion in fact often exist alongside one another and are portrayed in the novel The novel touches also on both the First and Second World Wars because two members of Marianna's family her grandfather and father fought in each war respectively It depicts every human emotion by means of adopting humor and tragedy throughout One might say that in the novel The Island of the Elyms there is a book within the book as the lives of Marianna's great grandparents and grandparents emerge The former being read by Nonna from her mother's memoirs and the latter narrated by Nonna herself When finally Marianna is comfortable with who she is different from the rest of her family she is torn away from her birthplace for the great unknown which happens to be Australia The story ends with the uprooting of the girl by the family who in turn has to forfeit and abandon every dream and thus becoming the innocent victim of the tragedy of emigration

The Numinous Legacy Adair Butchins, 2002 Where is God in the universe if anywhere Why did God make germs Why should we be so special Could the universe have been different This is a book that brings home in no uncertain fashion the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology where the possibility of divine intervention looks less and less likely Butchins demonstrates with clarity how the scientific method may be used despite certain drawbacks in an attempt to verify objective truth It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day Judaism Christianity and Islam especially with respect to their eschatological concepts The Eastern religions being less anthropomorphic are less affected The theistic argument from design is shown to be powerful enough to have caused disagreement among present day scientists in spite of the strictures of Professor Dawkins In general the book attempts to make some sense of the structure of the universe in terms of our own consciousness it behoves the reader to consider that
