This book, a complete guide to the operation and features of the Canon PowerShot S100 digital camera, is a follow-up to the author's earlier guides to advanced compact digital cameras. The new book explains all operations, features, menus, and controls of the PowerShot S100 camera in clear language, providing guidance not only about how to accomplish things with the camera, but when and why to use certain features. The book does not assume any specialized knowledge by the reader, but clearly explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, white balance, ISO, and macro photography. The book gives details about how to take advantage of the camera's varied array of "Scene" and "Creative Filters" shooting settings. The guide's more than 200 photographs, almost all in full color, provide illustrations of the camera's controls and menus, and also include examples of the various types of photographs that can be taken using the many creative settings of the camera, including the Creative Filters settings, which let the photographer alter the color processing and other aspects of images; various menu options such as i-Contrast and digital zoom; and the camera's strong set of features for continuous shooting. In addition, the book goes beyond the realm of everyday photography, providing introductions to more advanced topics such as infrared photography, street photography, and creating 3D (three-dimensional) images that can be viewed with conventional red and blue 3D glasses. The book also includes a full discussion of the video recording abilities of the PowerShot S100, which can record high-definition (HD) video with stereo sound and can take "Super Slow Motion" movies that slow down action by a factor of eight. In three appendices, the book provides information about accessories available for the camera, including cases, filter adapters, and external flash units; sets forth a list of useful web sites and other resources for further information; and includes a section with helpful "quick tips" that give particular insights into how to take advantage of the camera's features in the most efficient ways possible. The book includes a detailed Table of Contents and a full Index, so the reader can quickly find needed information about any particular feature or aspect of the camera. In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the German Army fought - from the North African desert to the Russian steppe - prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent in the period from September 1939 to May 1945.
