Hay has spent her life teaching people that their thoughts create their lives, and she has written numerous books for adults that have helped them discover their own self-worth. Similarly, Louise has always believed that if children could learn the power of their thoughts early on, their journey through life would be happier and more rewarding, with fewer struggles along the way. In this new book, Louise teaches boys and girls about the importance of affirmations—the thoughts and words we use in our daily lives that express what we believe to be true. Within these pages, there are wonderful examples of kids turning "negative" thoughts such as worry, anger, and fear into positive words and actions that express joy, happiness, and love. There are also tips that show children how they can apply affirmations to their daily lives. Vibrant illustrations and simple text make these concepts easy to understand for even the youngest child. Wright Mills Award, given by the Society for the Study of Social Problems Riveting stories of how affluent, white children learn about race American kids are living in a world of ongoing public debates about race, daily displays of racial injustice, and for some, an increased awareness surrounding diversity and inclusion. In this heated context, sociologist Margaret A. Hagerman zeroes in on affluent, white kids to observe how they make sense of privilege, unequal educational opportunities, and police violence. In fascinating detail, Hagerman considers the role that they and their families play in the reproduction of racism and racial inequality in America. *White Kids*, based on two years of research involving in-depth interviews with white kids and their families, is a clear-eyed and sometimes shocking account of how white kids learn about race. In doing so, this book explores questions such as, "How do white kids learn about race when they grow up in families that do not talk openly about race or acknowledge its impact?" and "What about children growing up in families with parents who consider themselves to be 'anti-racist'?" Featuring the actual voices of young, affluent white kids and what they think about race, racism, inequality, and privilege, *White Kids* illuminates how white racial socialization is much more dynamic, complex, and varied than previously recognized. It is a process that stretches beyond white parents' explicit conversations with their white children and includes not only the choices parents make about neighborhoods, schools, peer groups, extracurricular activities, and media, but also the choices made by the kids themselves. By interviewing kids who are growing up in different racial contexts—from racially segregated to meaningfully integrated and from politically progressive to conservative—this important book documents key differences in the outcomes of white racial socialization across families. And by observing families in their everyday lives, this book explores the extent to which white families, even those with anti-racist intentions, reproduce and

reinforce the forms of inequality they say they reject. Can a pirate and a prince learn to share? In the fort in the woods, a prince is preparing his castle for a lively feast for the royal kingdom. Soon, a battle over the fort between the adversaries ensues, leading to a humorous showdown. When they make amends, their amazing imaginations come up with a new adventure...together. And asking is important—parents know the value of having meaningful conversations with their kids, especially as family time is under continuous assault from gadgets and devices. Now the book that solves those needs is back—announcing a fresh new edition of *The Kids' Book of Questions*. Including subjects like the Internet, school violence, and climate change, the book remains a timeless treasure. Here is a collection of questions designed to challenge, entertain, provoke, and expand young minds. These are the questions that let kids discover how they feel; let people know what they think; raise issues that everyone loves to discuss. Gregory Stock, author of the original #1 bestselling *Book of Questions*, took his question-asking ways into schools and came back with over 200 questions, including Thorny dilemmas: Would you rather have a job you didn't like that paid a lot or a job you loved that paid just enough to get by? Embarrassing challenges: Would you kiss someone in front of your whole class for \$250? Provocative ideas: What things do you think your parents do just to set an example for you? Intriguing fantasies: If you could text any famous person and be sure they'd read and answer your text, who would you write to and what would you say? Gabe must have gone to Ethan's little sister's room! She has been climbing out of bed every night to play, and obviously needs a monster to help her get to sleep—but not HIS monster! Ethan tries to help his sister find her own monster, but none are the perfect blend of cute and creepy. Just when it seems that Ethan will lose his monster forever, an uninvited, tutu-toting little monster full of frightening fun appears. It has never been so difficult to raise a healthy eater in America. Along with the picky eating and public tantrums that have forever tested the limits of parental patience, today's parents also fend off sophisticated assaults from outside their kitchens: unhealthy food-

marketing campaigns aimed at kids; misleading product labels aimed at parents; and a school-food program so starved for cash that it sells name-brand junk food to grade school students. In *Kid Food*, nationally recognized food writer Bettina Elias Siegel (New York Times, The Lunch Tray) explores the cultural delusions and industry deceptions that have made it all but impossible to raise a healthy eater in America. Combining first-person reporting with the hard-won understanding of a food advocate and parent, it presents a startling portrayal of the current food landscape for children - and the role of parents in navigating it. Siegel also lifts the curtain on shadowy food industry front-groups, including clever marketing techniques that intentionally confuse parents about a product's nutritional value. (Did you know that "made with real fruit" may mean a product is less healthy?) What emerges is the industry's divide-and-conquer strategy, one that stokes kids' desire for junk food while breaking down parents' ability to act as responsible gatekeepers. For anyone who frets over what their child is eating, *Kid Food* offers both essential reading and a deeper understanding of the factors at play in their child's food environment. Written in the same engaging and relatable voice that has made *The Lunch Tray* a trusted resource for parents for almost a decade, *Kid Food* offers a well of compassion - and expertise - for those fighting the good fight at home. Diversity is what makes the world such a beautiful and interesting place. When you open your life to it, you learn to respect and celebrate those differences that make everyone special - including your own.
