Russo, 2013 The learning experiences of young children cannot be conveniently separated into the areas of cognitive social emotional and physical development They are integrated and interdependent This balance can be achieved through creative interactive play that supports and scaffolds all developmental and content areas of the curriculum Despite the strength of supportive theory and research we are experiencing the gradual elimination of play and creative experiences from early childhood classrooms in the USA The 2001 No Child Left Behind legislation in the USA emphasizes an academic orientation and focuses early childhood curricula upon academic skills such as reading writing and numeracy However the problem is not simply pedagogical strategy or philosophical stance The way in which a curriculum is implemented is also influenced by teachers perceptions of play and creativity In 2009 I began a longitudinal study that follows the pilot class of a new Independent elementary school in New York City as it adds a grade level each year and whose curricular framework is based upon play and creativity This paper identifies the values mission and model of the school It also explores and documents how the curriculum is being developed to support and scaffold increased academic expectations the role of teachers and children in the implementation of the curriculum and the changing perspectives perceptions and expectations of parents and teachers

Early Childhood Curriculum for All Learners Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12 *Early Childhood Curriculum for All Learners: Integrating Play and Literacy Activities* is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills. The authors link solid play-based research to specific developmentally appropriate practices. By combining these two areas, the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play. In addition, the text focuses on socio-dramatic play, a recently acknowledged essential aspect of child-initiated play interactions. It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades. Implementation of the information presented in this book will enable children to experience a richer transition into primary education classrooms.
