ABA Consumer Guide to Asset Protection Nov 13 2022 The proliferation of lawsuits throughout society exposes business owners, physicians, and other professionals to enormous risk if they don't adequately protect their personal and business assets. In The ABA Consumer Guide to Asset Protection, leading asset protection attorney Jeffrey Matsen provides a step-by-step guide to creating a "shield of liability" around personal and business assets through a combination of business and investment entity selections; estate planning techniques; and the creation of appropriate trusts. Matsen's multi-tiered approach is designed to help virtually everyone who has significant assets and to provide a plan appropriate to their particular circumstances. Readers will gain the knowledge to choose the right advisor and actively participate in the creation and management of their own asset protection plan.

Building Trust Feb 02 2022 In business, politics, marriage, indeed in any significant relationship, trust is the essential precondition upon which all real success depends. But what, precisely, is trust? How can it be achieved and sustained? And, most importantly, how can it be regained once it has been broken? In Building Trust, Robert C. Solomon and Fernando Flores offer compelling answers to these questions.

They argue that trust is not something that simply exists from the beginning, something we can assume or take for granted; that it is not a static quality or "social glue." Instead, they assert that trust is an emotional skill, an active and dynamic part of our lives that we build and sustain with our promises and commitments, our emotions and integrity. In looking closely at the effects of mistrust, such as insidious office politics that can sabotage a company's efficiency, Solomon and Flores demonstrate how to move from na?ve trust that is easily shattered to an authentic trust that is sophisticated, reflective, and possible to renew. As the global economy makes us more and more reliant on "strangers," and as our political and personal interactions become more complex, Building Trust offers invaluable insight into a vital aspect of human relationships.

Jun 28 2021 A world without accounting means confusion and chaos. Accounting is not only used in the business world, but rather it is used by everyone in all types of situations. Tax touches every aspect of our lives. People are talking about tax on the TV, the radio, newspaper, and the Internet. Life has

grown, as a whole, toward higher levels of complexity. The language of accounting and taxation is also expanding: More and more new words are created, and new meanings are added to the old words. Do you know the meaning of these words: ad hoc, accounting bath, below-water, blackout, capex, carve-out, e-tax, postil, Sarbanes-Oxley, strata...? Each term has its unique meaning you may not be able to find a definition in an ordinary dictionary. "An International Dictionary of Accounting & Taxation" is a book with more than 12,000 entries drawn from accounting, auditing and taxation. Each entry has a clear one-sentence definition right to the point. Whether you are an accountant, CPA, tax professional or amateur, you will find this dictionary of immeasurable help.

Braintrust Nov 01 2021 What is morality? Where does it come from? And why do most of us heed its call most of the time? In Braintrust, neurophilosophy pioneer Patricia Churchland argues that morality originates in the biology of the brain. She describes the "neurobiological platform of bonding" that, modified by evolutionary pressures and cultural values, has led to human styles of moral behavior. The result is a provocative genealogy of morals that asks us to reevaluate the priority given to religion, absolute rules, and pure reason in accounting for the basis of morality. Moral values, Churchland argues, are rooted in a behavior common to all mammals--the caring for offspring. The evolved structure, processes, and chemistry of the brain incline humans to strive not only for self-preservation but for the well-being of allied selves--first offspring, then mates, kin, and so on, in wider and wider "caring" circles. Separation and exclusion cause pain, and the company of loved ones causes pleasure; responding to feelings of social pain and pleasure, brains adjust their circuitry to local customs. In this way, caring is apportioned, conscience molded, and moral intuitions instilled. A key part of the story is oxytocin, an ancient body-and-brain molecule that, by decreasing the stress response, allows humans to develop the trust in one another necessary for the development of close-knit ties, social institutions, and morality. A major new account of what really makes us moral, Braintrust challenges us to reconsider the origins of some of our most cherished values.
