to use particular arithmetic concepts in subsequent material courses and nonclassroom situations to give the students the ability to correctly interpret arithmetically obtained results We have tried to meet these objects by presenting material dynamically much the way an instructor might present the material visually in a classroom See the development of the concept of addition and subtraction of fractions in section 5.3 for examples Intuition and understanding are some of the keys to creative thinking we believe that the material presented in this text will help students realize that mathematics is a creative subject
