Evidence from Earth Observation Satellites Nov 28 2023 Evidence from Earth Observation Satellites is an edited collection analysing emerging legal issues surrounding the use of satellite data as evidence. It considers whether data from satellite technologies can be a legally reliable, effective evidential tool in contemporary legal systems.

Tax Questions and Answers 2011 Jun 04 2024 Updated annually, TAX QUESTIONS AND ANSWERS 2011 presents over 500 questions across the breadth of topics covered in undergraduate taxation. Used throughout the course of study it will assist in evaluating progress and identifying areas to focus on. As an exam revision tool, it can strengthen memory and real understanding. By providing the opportunity to reflect on the issues independently, yet with the assurance of a model answer to rely on, this text is a most effective means to advance the reader's knowledge of taxation law.

The Universal Church of the Kingdom of God in South Africa Jun 23 2023 This book shows how the UCKG utilizes rituals that are locally meaningful and are informed by local ideas about human bodies, agency and ontological balance.

Cognitive Unconscious and Human Rationality Sep 26 2023 Examining the role of implicit, unconscious thinking on reasoning, decision making, problem solving, creativity, and its neurocognitive basis, for a genuinely psychological conception of rationality. This volume contributes to a current debate within the psychology of thought that has wide implications for our ideas about creativity, decision making, and economic behavior. The essays focus on the role of implicit, unconscious thinking in creativity and problem solving, the interaction of intuition and analytic thinking, and the relationship between communicative heuristics and thought. The analyses move beyond the conventional conception of mind informed by extra-psychological theoretical models toward a genuinely psychological conception of rationality—a rationality no longer limited to conscious, explicit thought, but able to exploit the intentional implicit level. The contributors consider a new conception of human rationality that must cope with the uncertainty of the real world; the implications of abandoning the normative model of classic logic and adopting a probabilistic approach instead; the argumentative and linguistic aspects of reasoning; and the role of implicit thought in reasoning, creativity, and its neurological base. Contributors Maria Bagassi, Linden J. Ball, Jean Baratgin, Aron K. Barbey, Tilmann Betsch, Eric Billaut, Jean-François Bonnefon, Pierre Bonnier, Shira Elqayam, Keith Frankish, Gerd Gigerenzer, Ken Gilhooly, Denis Hilton, Anna Lang, Stefanie Lindow, Laura Macchi, Hugo Mercier, Giuseppe Mosconi, Ian R. Newman, Mike Oaksford, David Over, Guy Politzer, Johannes Ritter, Steven A. Sloman, Edward J. N. Stupple, Ron Sun, Nicole H. Therriault, Valerie A. Thompson, Emmanuel Trouche-Raymond, Riccardo Viale

Success with STEM Apr 21 2023 Success with STEM is an essential resource, packed with advice and ideas to support and enthuse all those involved in the planning and delivery of STEM in the secondary school. It offers guidance on current issues and priority areas to help you make informed judgements about your own practice and argue for further support for your subject in school. It explains current initiatives to enhance STEM teaching and offers a wide range of practical activities to support exciting teaching and learning in and beyond the classroom. Illustrated with examples of successful projects in real schools, this friendly, inspiring book explores: Innovative teaching ideas to make lessons buzz Activities for successful practical work Sourcing additional funding Finding and making the most of the best resources STEM outside the classroom Setting-up and enhancing your own STEM club Getting involved in STEM competitions, fairs and festivals Promoting STEM careers and tackling stereotypes Health, safety and legal issues Examples of international projects An wide-ranging list of project and activity titles Enriched by the authors' extensive experience and work with schools, Success with STEM is a rich compendium for all those who want to develop outstanding lessons and infuse a life-long interest in STEM learning in their students. The advice and guidance will be invaluable for all teachers, subject leaders, trainee teachers and NQTs.

McMaster Journal of Theology and Ministry: Volume 13, 2011-2012 Jun 11 2022 The McMaster Journal of Theology and Ministry is an electronic and print journal that seeks to provide pastors, educators, and interested lay persons with the fruits of theological, biblical, and professional studies in an accessible form. Published by McMaster Divinity College in Hamilton, Ontario, it continues the heritage of scholarly inquiry and theological dialogue represented by the College's previous print publications: the Theological Bulletin, Theodolite, and the McMaster Journal of Theology.

On the End of Privacy Sep 02 2021 In preparation for this book, and to better understand our screen-based, digital world, Miller only accessed information online for seven years. On the End of Privacy explores how literacy is transformed by online technology that lets us instantly publish anything that we can see or hear. Miller examines the 2010 suicide of Tyler Clementi, a young college student who jumped off the George Washington Bridge after he discovered that his roommate spied on him via webcam. With access to the text messages, tweets, and chatroom posts of those directly involved in this tragedy, Miller asks: why did no one intervene to stop the spying? Searching for an answer to that question leads Miller to online porn sites, the invention of Facebook, the court-martial of Chelsea Manning, the contents of Hillary Clinton's email server, Anthony Weiner's sexted images, Chatroulette, and more as he maps out the changing norms governing privacy in the digital age.

ADHD Aug 02 2021 Rates of diagnosis of attention-deficit/hyperactivity disorder (ADHD) are skyrocketing, throughout America and the rest of the world. U.S. rates of youth diagnosis have increased 40% from just a decade ago. Adults with ADHD are now the fastest-growing segment of the population receiving diagnosis and medication. The disorder is painful and sometimes disabling for individuals and tremendously costly for society; yet, widespread misinformation, skepticism, and unanswered questions have jeopardized effective diagnosis and treatment. Researched and written by Stephen Hinshaw, an international expert on ADHD, and Katherine Ellison, a Pulitzer-Prize winning journalist and author, ADHD: What Everyone Needs to Know? is the go-to book for authoritative, current, accurate, and compelling information about the global ADHD epidemic. This book addresses questions such as: ? Is ADHD a genuine medical condition or a means of pathologizing active and exploratory behavior? ? Do medications for ADHD serve as needed treatments, or are

they attempts at social control, designed to bolster profits of pharmaceutical firms? ? Has the ADHD label become a ruse by which parents can game the educational system for accommodations? ? How do symptoms and impairments related to ADHD differ between girls and women and boys and men? ? Why are ADHD medications often used as performance enhancers by college and high-school students? ADHD: What Everyone Needs to Know? clears the air of the most polarizing and misleading information that abounds, providing straight talk and sound guidelines for educators, policymakers, health professionals, parents, and the general public. It shows the reality of ADHD but does not ignore the forces that have pushed up rates of diagnosis to alarmingly high levels.

United States Court of International Trade Reports Jul 01 2021

International Heritage and Historic Building Conservation May 30 2021 The majority of books in English on historic building conservation and heritage preservation training are often restricted to Western architecture and its origins. Consequently, the history of building conservation, the study of contemporary paradigms and case studies in most universities and within wider interest circles, predominantly in the UK, Europe, and USA focus mainly on Europe and sometimes the USA, although the latter is often excluded from European publications. With an increasingly multicultural student body in Euro-American universities and with a rising global interest in heritage preservation, there is an urgent need for publications to cover a larger geographical and social area including not only Asia, Australia, Africa and South America but also previously neglected countries in Europe like the new members of the European Community and the northern neighbour of the USA, Canada. The inclusion of the 'other' in built environment education in general and in building conservation in particular is a pre-requisite of cultural interaction and widening participation. International Heritage and Historic Building Conservation assesses successful contemporary conservation paradigms from around the world. The book evaluates conservation case studies from previously excluded areas of the world to create an integrated account of Historic Building Conservation that crosses the boundaries of language and culture and sets an example for further inclusive research. Analyzing the influence of financial constraints, regional conflicts, and cultural differences on the heritage of disadvantaged countries, this leading-edge volume is essential for researchers and students of heritage studies interested in understanding their topics in a wider framework.

[Disrupting structural constraints. The influence of sustainable entrepreneurship on the transition towards a more sustainable economy](#) Mar 09 2022 Master's Thesis from the year 2012 in the subject Business economics - Business Ethics, Corporate Ethics, grade: 8,0, Radboud Universiteit Nijmegen (Nijmegen School of Management), course: International Management, language: English, abstract: For the last five decades, one important goal has driven the world economy: The pursuit of growth. As the economy expands, the resource implications associated with it cannot be ignored any longer. In less than a decade, we may face significant scarcity in key resources, such as oil. Out of scholarly discussion it emerged that a transition towards a new form of capitalist development is needed, a transition towards an economy which is in line with the objectives of a sustainable society. Sustainable entrepreneurship, a form of entrepreneurship that combines ecologic, social and economic sustainability, has been generally declared as suited to advance this so-called 'sustainability transition'. However, scholars have neglected to investigate the 'how' and 'why' of such an assumption. This Master Thesis aims at filling this research gap by answering the following research question: In what way can sustainable entrepreneurship influence a transition towards a more sustainable economy? In doing so, the thesis is structured into three different research papers, each using a different research method to reach the following goals: 1. Providing a concise definition of the term "sustainable entrepreneurship" and analysis of important key concepts 2. Developing a framework for the analysis of a bottom-up sector transition led by sustainable entrepreneurs using an institutional theory perspective 3. Applying the framework to the revealing case of the Fairtrade Movement to analyse a sector transition led by sustainable entrepreneurs This research was performed not only to gain an in-depth understanding of the process of economical transitions but also to define methods that can be used by actual entrepreneurs in real life. It's goal is to not only to close a current research gap but to serve as a practical guide for changemakers of all kinds. The research findings have therefore been used to define five key insights that should be taken into account in order to influence economies towards more sustainability. The section "insights for entrepreneurs and decision makers" at the end of this thesis gives practical cues based on examples from the Fairtrade Movement but also a warning to time their actions wisely - because at a certain stage each transition gains a momentum which is very hard to influence by any of the actors involved.

Perspectives on Ignorance from Moral and Social Philosophy Nov 04 2021 This edited collection focuses on the moral and social dimensions of ignorance—an undertheorized category in analytic philosophy.

Contributors address such issues as the relation between ignorance and deception, ignorance as a moral excuse, ignorance as a legal excuse, and the relation between ignorance and moral character. In the moral realm, ignorance is sometimes considered as an excuse; some specific kind of ignorance seems to be implied by a moral character; and ignorance is closely related to moral risk. Ignorance has certain social dimensions as well: it has been claimed to be the engine of science; it seems to be entailed by privacy and secrecy; and it is widely thought to constitute a legal excuse in certain circumstances. Together, these contributions provide a sustained inquiry into the nature of ignorance and the pivotal role it plays in the moral and social domains.

Ensuring the Integrity of Electronic Health Records Feb 05 2022 Data integrity is a critical aspect to the design, implementation, and usage of any system which stores, processes, or retrieves data. The overall intent of any data integrity technique is the same: ensure data is recorded exactly as intended and, upon later retrieval, ensure the data is the same as it was when originally recorded. Any alternation to the data is then traced to the person who made the modification. The integrity of data in a patient's electronic health record is critical to ensuring the safety of the patient. This book is relevant to production systems and quality control systems associated with the manufacture of pharmaceuticals and medical device products and updates the practical information to enable better understanding of the controls applicable to e-records. The book highlights the e-records suitability implementation and associated risk-assessed controls, and e-records handling. The book also provides updated regulatory standards from global regulatory organizations such as MHRA, Medicines and Healthcare Products Regulatory Agency (UK); FDA, Food and Drug Administration (US); National Medical Products Association (China); TGA, Therapeutic Goods Administration (Australia); SIMGP, Russia State Institute of Medicines and Good Practices; and the World Health Organization, to name a few.

Immunosuppression Jul 25 2023 A need for a book on immunology which primarily focuses on the needs of medical and clinical research students was recognized. This book, "Immunosuppression - Role in Health and Diseases" is relatively short and contains topics relevant to the understanding of human immune system and its role in health and diseases. Immunosuppression involves an act that reduces the activation or efficacy of the immune system. Therapeutic immunosuppression has applications in clinical medicine, ranging from prevention and treatment of organ/bone marrow transplant rejection, management of autoimmune and inflammatory disorders. It brings important developments both in the field of molecular mechanisms involved and active therapeutic approaches employed for immunosuppression in various human disease conditions. There was a need to bring this information together in a single volume, as much of the recent developments are dispersed throughout biomedical literature, largely in specialized journals. This book will serve well the practicing physicians, surgeons and biomedical scientists as it provides an insight into various approaches to immunosuppression and reviews current developments in each area.

Interactions of Degree and Quantification Oct 16 2022 Interactions of Degree and Quantification examines connections and semantic parallels between individual and degree quantifiers in the expression of quantity and measurement in human language.

The Legislative Assembly Debates (official Report) Nov 16 2022

Theory Music Exam Model Answers 2011 Gr8 Oct 04 2021 A helpful and practical resource for students and teachers preparing for Theory exams, coinciding with the release of Theory of Music papers 2011, Grades 1-8.

Principles of Parenteral Solution Validation Mar 28 2021 Principles of Parenteral Solution Validation: A Practical Lifecycle Approach covers all aspects involved in the development and process validation of a parenteral product. By using a lifecycle approach, this book discusses the latest technology, compliance developments, and regulatory considerations and trends, from process design, to divesting. As part of the Expertise in Pharmaceutical Process Technology series edited by Michael Levin, this book incorporates numerous case studies and real-world examples that address timely problems and offer solutions to the daily challenges facing practitioners in this area. Discusses international and domestic regulatory considerations in every section Features callout boxes that contain points-of-interest for each segment of the audience so readers can quickly find their interests and needs Contains important topics, including risk management, the preparation and execution of properly designed studies, scale-up and technology transfer activities, problem-solving, and more

Harris V. One Hope United, Inc Mar 01 2024

Copyright Questions and Answers for Information Professionals Aug 26 2023 Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a complex area, with many shades of gray. Librarians continually need to seek answers to questions ranging from the reproduction of copyrighted works for library users, through the performance of audiovisual works, to the digitization and display of protected works on library websites. This book presents updated versions of the author's copyright columns published in *Against the Grain*, the leading journal in acquisitions librarianship since the late 1990s. It is the first volume in the series *Charleston Insights in Library, Archival, and Information Sciences*. The aim of the *Charleston Insights* series is to focus on important topics in library and information science, presenting the issues in a relatively jargon-free way that is accessible to all types of information professionals, including librarians, publishers, and vendors, and this goal shapes the pragmatic and accessible tone of the book. The volume is presented in question-and-answer format. The questions are real, submitted by librarians, educators, and other information professionals who have attended the author's copyright law workshops and presentations or submitted them to her by e-mail or telephone. The author has selected the questions and answers that have general applicability. She has then arranged them into logical chapters, each prefaced by a short introduction to the topic. Because it is written in an accessible and clear style, readers may want to review the entire work or they can just access particular chapters or even specific questions as they need them. The volume includes an index to facilitate reference use.

Coffee Shop Conversations Aug 14 2022 There are numerous issues in the public square confronting the Western church. While there are any number of books available on each of the topics engaged in this collection of essays--just war, family planning, rest, immigration, politics, economic recession, fair trade, and health care--there is no compact guide that approaches each of these issues from an evangelical perspective. *Coffee Shop Conversations* does just that. The book does not aim to address each issue exhaustively; instead, it offers an evangelical approach to these topics, with the hopes that the door will be opened for further conversation. This book brings together the expertise of several evangelical scholars who are committed to serving the church through scholarship. The volume is therefore ideal for student ministry, Sunday school classes, small groups, and individuals interested in engaging the wider culture from a stance that is well reasoned and committed to biblical faith and practice.

Kenya National Bibliography Dec 18 2022

Energy and Transport in Green Transition Jan 24 2021 This book breaks new ground in the studies of green transition. It frames the ongoing transformation in terms of a "battle of modernities" with the emerging vision of ecomodernity as the final destination. It also offers a systematic exploration of the potential for extensive transformation of carbon-intensive sectors - with a focus on energy and transport - towards a low or post-carbon economy. The book does so in a comparative perspective, by pointing to a diversity of techno-economic and institutional solutions in the mature Western economies, and in the rapidly growing East and developing South. The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved. They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation. The book advocates a new, overarching vision and agenda of ecomodernity - based on a synergistic paradigm-shift in industry, politics and culture - to trigger and sustain the ecological innovation necessary to tip development in a green direction. This vision cannot be monolithic; rather, it should reflect the diverse interests and conditions of the global population. This book is aimed at researchers and postgraduate students of energy, transport, environmental and climate policies, as well as development, environment, innovation and sustainability.

The Euro Experiment Dec 06 2021 A clear, analytical and balanced guide to the euro experiment and subsequent crisis that will appeal to a wide readership.

New Beginning in US-Muslim Relations May 11 2022 This book carries out a comparative study of the US response to popular uprisings in the Middle East as an evaluation of President Barack Obama's foreign policy commitments. In 2009, Obama publicly pledged "a new beginning in US-Muslim relations," causing eager expectation of a clear shift in US foreign policy after the election of the 44th president of the United States. However, the achievement of such a shift was made particularly difficult by the existence of multiple, and sometimes conflicting, US interests in the region which influenced the Obama administration's response to the popular uprisings in five Muslim-majority countries: Egypt, Bahrain, Yemen, Libya, and Syria. After providing a detailed analysis of the traditional features of both US foreign policy rhetoric and practice, this book turns its focus to the Obama administration's response to the 2011 Arab Awakening to determine whether Obama's foreign policy has indeed brought about a new beginning in US-Muslim relations.

Enacting Globalization Jan 19 2023 Enacting Globalization consists of a rich set of papers with a variety of disciplinary perspectives, focusing on Globalization and its portrayal through International Integration as manifested by its myriad flows such as people, trade, capital and knowledge flows.

Developing a Road Map for Engaging Diasporas in Development Feb 25 2021 State governments recognize the value diaspora populations bring to development efforts worldwide. Since 2007, the Global Forum on Migration and Development has examined ways to highlight policies and programs that can magnify the resources, both human and financial, that emigrants and their descendants contribute to development. This handbook continues that effort on the basis of earlier investigations by the book's collaborating institutions, the academic and policy literature, consultations and in-depth interviews with government officials and nongovernmental actors, and input by 62 national governments. The handbook is divided into three major parts. Each part gives concrete examples of policies and programs that have been effective, and pulls out both useful lessons and common challenges associated with the topics at hand. The pivotal question now facing many policymakers is not so much if diasporas can benefit their countries of origin but how they do so and what kinds of government policies and programs can foster these relationships.

Ethics in Rehabilitation Apr 09 2022 Ethical decision-making is a critical component in the broad spectrum of rehabilitation and health care professions today. *Ethics in Rehabilitation: A Clinical Perspective, Second Edition* was developed to give health and rehabilitation professionals the knowledge and tools they need to approach and solve the ethical dilemmas that challenge them in everyday practice. Following an introduction to ethical theories and principles, Drs. Kornblau and Burkhardt furnish readers with a brief overview of legal principles that may impact ethical decision making, then examine the relationship between ethical and legal principles that clinicians may encounter. The second section provides readers with an opportunity to apply what they have learned and includes more than 100 ethical dilemmas covering a wide variety of practice-related topics. Further reinforcing the concepts, the final sections consist of ethical dilemma worksheets and a set of additional learning resources to assist in the examination and resolution of ethical dilemmas.

Features: • More than 100 sample ethical dilemmas extracted from actual practice experiences • Ethical dilemma worksheets to guide learning and illustrate course of action • Extensive set of appendices including sample laws and regulations • Online access to internet resources of state licensure and related laws *Ethics in Rehabilitation: A Clinical Perspective, Second Edition* offers readers a practical approach to ethics within a clinical context to allow practitioners, educators, and researchers to raise questions, attempt to answer them, and promote and improve ethical practice in rehabilitation.
