Harvesting and Managing Knowledge in Construction 2023 A successful construction business is a knowledge business. And knowledge must be managed effectively to be used efficiently, especially in a complex project-oriented business like construction, where skills acquired and lessons learned on one project need to be passed to the next. A holistic approach to knowledge management (KM) is taken in this book to incorporate all of the relevant themes, tackling technological, socio-cultural and organizational issues, with the creation of value as a focus throughout. Information is drawn from a broad range of sources to explain core theories and provide guidance for practical application. Topics covered include: changing business relationships in a knowledge economy knowledge creation processes and theories data, text and knowledge mining techniques the learning construction organization future technology for knowledge management. Written by the authors of the first EU-funded KM research project in the field of construction, this textbook is uniquely well-researched, an excellent perfect introduction to KM for students across the built environment. It is also a guide to the topic for practitioners.

Co-Creation Sep 10 2023 Across several industries, we are observing a paradigm shift from traditional, firm-centric and top-down value creation to more open and collaborative approaches, also referred to as bottom-up economics. The boundaries of firms dissolve and external actors (customers, users, suppliers etc.) enter the domain.

value creation by means of advanced information and communication technologies. These new and evolving patterns require a renewed and interdisciplinary understanding of how co-creation enables organizations to reshape business and society. With contributions from industrial and academic experts, this book provides deep insights into the theory and practice of bottom-up economics, and addresses the major opportunities and challenges that have emerged in the era of co-creation. A must read for decision makers looking to innovate their companies' business models—from ideation to realization. Dr.-Ing. Michaela Colla, K-GXI Leader – Industry 4.0 at Volkswagen Simply put, co-creation is the future of work. With technology morphing the way we work and people wanting to tackle problems that matter, co-creation is the sandbox where the world can come together to solve big challenges. Plus, co-creation rapidly delivers products with built-in market fit. Megan Brewster, Vice President of Advanced Manufacturing at Launch Forth Successful leaders will co-create the future. This is an excellent starting point. Jürgen Bilo, Managing Director co-pace GmbH, The Standard Organisation of Continental AG

The book examines issues affecting potential providers and users, application and networking solutions, and current efforts to build a National Information Infrastructure.

Enabling Knowledge Creation Oct 19 2021 When *The Knowledge-Creating Company* (nearly 40,000 copies sold) appeared, it was hailed as a landmark work in the field of knowledge management. Now, *Enabling Knowledge Creation* ventures even further into this all-important territory, showing how firms can generate and nurture ideas based on the concepts introduced in the first book. Weaving together lessons from such international leaders as Siemens, Unilever, Skandia, and Sony, along with their own hands-on consulting experiences, the authors introduce knowledge enabling--the overall set of organizational activities that promote knowledge creation--and demonstrate how to transform an organization's knowledge into value-creating actions. They describe five key "knowledge enablers" and outline what it takes to instill a knowledge vision: manage conversations, mobilize knowledge activists, create the right context for knowledge creation, and globalize local knowledge. The authors stress that knowledge creation must be more than the exclusive purview of one individual--or designated "knowledge" officer. Indeed, it demands new roles and responsibilities for everyone in the organization--from the elite in the executive suite to the frontline workers on the floor. Whether an activist, a caring expert, or a corporate epistemologist who focuses on the theory of knowledge itself, everyone in an organization has a vital role to play in making "care" an integral part of the everyday experience; in supporting, nurturing, and encouraging microcommunities of innovation and fun; and in creating a shared space where knowledge is created, exchanged, and used for sustained, competitive advantage. This much-anticipated sequel puts practical tools into the hands of managers and executives who are struggling to unleash the power of knowledge in their organization.

Network World Jul 28 2022 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems that their companies use to support everything from business critical applications to

collaboration and electronic commerce.
