*Wounding the West* David Stiller, 2000-01-01 Federal policy toward hardrock mining remains largely unchanged since the passage of the General Mining Law of 1872 That legislation was originally intended to promote settlement and economic development of the American West A century and a quarter later the region no longer requires congressional coddling yet more than half a million mines and mill sites remain abandoned throughout the western states These sites have created 180 000 acres of polluted lakes and reservoirs and 12 000 miles of contaminated streams and rivers Montana s Blackfoot River made famous by Norman Maclean s *A River Runs through It* is one such battered body of water Not only did the 1872 law essentially give the land and minerals to miners and mining companies and it continues to do so today the law also required no mine reclamation or water quality protection State mining laws likewise required little or no reclamation *Wounding the West* traces the role of hardrock mining and its relationship with the American West by following the environmental history of one Montana mine the Mike Horse from its 1898 discovery through its heyday in the 1940s subsequent abandonment and eventual cleanup under the coercion of a state law that many would consider ill suited for abandoned mines David Stiller argues that taxpayers should treat mining companies like the for profit enterprises they are and insist that the hardrock mining industry pay a fair royalty for extracted minerals and then put this funding to work correcting the industry s worst historical abuses

*Why Is Sex Fun?* Jared M Diamond, 1998-09-25 From the New York Times bestselling author of *Upheaval* a fun and wide ranging exploration of why human sexuality is so different from other animals and how it made us who we are To us humans the sex lives of animals seem weird But it s our own sex lives that are truly bizarre We are the only social species to insist on carrying out sex privately Stranger yet we have sex at any time even during periods of infertility such as pregnancy or post menopause A human female doesn t know her precise time of fertility and certainly doesn t advertise it to human males by the striking color changes smells and sounds used by other female mammals Why do we differ so radically in these and other important aspects of our sexuality from our closest ancestor the apes Why does the human female virtually alone among mammals go through menopause Why does the human male stand out as one of the few mammals to stay with the female he impregnates to help raise the children that he sired Why is the human penis so unnecessarily large There is no one better qualified than Jared Diamond to explain the evolutionary forces that operated on our ancestors to make us so different sexually With wit and a wealth of fascinating examples *Why Is Sex Fun* shows how our sexuality as much as our large brains or upright posture led to human rise in the animal kingdom
