Origin and Significance of the Great Pyramid Nov 01 2021 THE association of the name of the god Seth with the Great Pyramid--a structure which appears to embody or to bear a relation to the chief scientific truths recognised by the ancient world, throws light on certain ideas entertained as to the nature of that deity. The god of intelligence of the Egyptians was Thoth, the Hermes of the Sabaeans. Hermes was, however, called the son of Seth, and this deity is in some sense to be identified with Thoth. In a passage of the Book of the Dead, the former has the name Tet which, according to Bunsen, intimates that Thoth inherited many of the attributes of Seth.

*The Great Pyramid* Sep 23 2023 Anyone who wants to solve a mystery of the building of the Egyptian pyramids would say this with prejudice: How can I find out the truth if I've never seen the pyramids? I have to see them first. The paradox is born! The Pyramids of Giza plateau have a magical attribute: When you look at them, when you touch them, you become a hopeless loser instead of an optimistic searcher. The size of the stones, uneven rows with break-off edges bring mess in your mind. The pyramids become even more incomprehensible than before. Meanwhile, the pyramids, same as the stars or planets, can be solved without being up there. You just have to turn on your imagination, calculation, and logic. You do not have to see them at all. Moreover, you should not see them, if you really want to solve them! Strangely, but there is a paradox! We authors of this book were lucky! We've seen pyramids only on TV and books. And that fact brought bunch of questions which we wanted answers. Free of passion, we started to work with this problem with huge desire and full of optimism. The result exceeded the expectations: The right hypothesis from the beginning, healthy logic, and mathematical calculations gave birth to discoveries one after another. The more we were working with this mystery, the more it became clearer, understandable, and explainable. Dear Reader, When you finish reading this book, you might say this: One of the greatest mysteries of the world does not exist anymore!

*The Invisible Pyramid* Feb 27 2024 This important and urgent environmentalist text examines the origins and possible futures of humankind within the context of the Space Age To read Loren Eiseley is to renew a sense of wonder at the miracles and paradoxes of evolution and the ever-changing diversity of life. In this brilliant collection, he considers the cosmological significance and ultimate meanings of our evolutionary history, offering a series of profound, lyrical meditations on the origins and possible futures of humankind against the backdrop of the Apollo landings. As Western civilization attains new heights of scientific awareness and

technological skill, he asks, is it also blind to its own limits and destructive capacities? Always a fond observer of the natural world, Eiseley makes a newly urgent, environmentalist plea in *The Invisible Pyramid*: we must protect the fragile "world island" against our unchecked power to pollute and consume it.

Alcorn State University and the National Alumni Association Feb 02 2022 In 1871 Mississippi Governor James L. Alcorn recommended that the state legislature support the formation of Alcorn University. The campus of Oakland College, a school founded by the Presbyterian Church in 1830, had been abandoned after the Civil War and was purchased for forty thousand dollars and designated for the education of black youth. The school became Alcorn Agricultural and Mechanical College in 1878, and Alcorn State University in 1974. In this unique pictorial retrospective, over one hundred years of growth and change at Alcorn are explored and celebrated. Included within these pages are vintage photographs of the students and faculty that have shaped the school's history. From early classes and sporting events to distinguished alumni and prominent leaders, the images depict a university continually striving to educate, train, and inspire young African Americans. Alcorn's picturesque campus, with moss-draped trees and scenic lakes, provides a setting where, for over a century, students have been given a multitude of opportunities to grow. The first land-grant institution for blacks in the United States, Alcorn is a public university committed to academic excellence. The challenges faced by its students and faculty in its earliest days brought forth an unyielding determination to succeed, which is still evident today among its diverse student body.

Pyramid Quest Mar 30 2024 The Egyptologist acclaimed for re-dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity: the Great Pyramid of Giza. What is the Great Pyramid of Giza? Ask that basic question of a traditional Egyptologist, and you get the basic, traditional answer: a fancy tombstone for a self-important pharaoh of the Old Kingdom. This, Egyptologists argue, is the sole finding based on the data, and the only deduction supported by science. By implication, anyone who dissents from this point of view is unscientific and woolly-minded—a believer in magic and ghosts. Indeed, some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them. Yet from beneath the obvious terms of this controversy, a deeper, more significant question arises: how is it that the Great Pyramid exercises such a gripping hold on the human psyche—adding cryptic grace to the back of the one-dollar bill and framing myriad claims of New Age "pyramid power"? In Pyramid Quest, Robert M. Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid, and develop a stunning hypothesis: This ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought, extending far back into a little-known time. In tracing that story, we come to understand not only the Great Pyramid but also our own origins as civilized beings.

Our Inheritance in the Great Pyramid Feb 22 2021 Charles Piazzzi Smyth (1819–1900), Astronomer Royal for Scotland and Regius Professor of Astronomy at Edinburgh University, was highly respected for his practical work on astronomy. His book *Teneriffe, an Astronomer's Experiment* from 1858 is considered a classic. His interest in 'pyramidology', which is detailed in *Our Inheritance in the Great Pyramid* (1864), has damaged his reputation in scientific circles, but the fact remains that he did detailed, in depth measurements of the Great Pyramid with the most advanced instruments of his day, the first time that the structure had been so thoroughly studied. From the information gathered he theorized that the Pyramid was built using a standardized measure, the "Pyramid Inch", and that the Pyramids had been built by the descendants of Noah using this system of measurement that had been handed down from the time of Adam in the Garden of Eden. Although many may disagree with his interpretation of the data gathered, no one can fault his methodology and the accuracy of his measurements. In this, the 1874 edition of this book, you can see what he discovered in his exploration of Giza and decide for yourself the validity of his conclusions.

Decoding the Great Pyramid Jun 28 2021 For over forty centuries, the Great Pyramid of Giza has tantalized and baffled mankind. Is it a royal tomb, a treasure house, an astronomical observatory, or an incredible, sophisticated public works project? Or is it a landmark of an earlier civilization, perhaps immeasurably older than Egypt itself? Here in *Decoding the Great Pyramid*, renowned Egyptologist and bestselling author Peter Lemesurier explains the extraordinary facts of the pyramid's siting and construction. This fascinating and highly original work draws on recent research to suggest that the entire design of the pyramid derives from a simple number code. When the pyramid is "decoded" an amazing message starts to unfold -- a message that appears to be nothing less than an evolutionary blueprint for mankind that stretches from the beginning of time well into the fourth millennium AD. Lemesurier compares the pyramid's message for mankind with prophecies for the future made in more recent times by St. Malachy, Nostradamus, Edgar Cayce and others. He also uncovers interesting links between the pyramid's picture of mankind's place in the universe and the religious traditions of Egypt, Palestine, India and Central America. Central to his discoveries is the belief in a Messianic world plan -- common to many ancient traditions and at the very root of the design of the Great Pyramid -- that sheds new light on our interpretation of the biblical message. Illustrated in full-color throughout using specially commissioned photographs and original artwork, *Decoding the Great Pyramid* is an indispensable guide for all who seek to understand the mysteries of the past and the nature of the human quest.

Parallel Universes Jul 10 2022 Among the unsolved mysteries on Earth, there

is the building of the Great Pyramid. Decoding its role and context has always been a big debate among scholars of different disciplines. Such an elaborate monument, according to tradition, was built by simple people. Nonetheless, with no other means but copper chisels and hammers, these simple people were able to quarry millions of blocks of rock, up to 70 tons in weight, and transport them for hundred of kilometers to be lifted for the desired design, with a maximum degree of accuracy. That's where the debate starts. The method of building the pyramid of Khufu remained unrecorded. Similarly, many other ancient cultures left behind works which prove to have been realized by making use of advanced technology. What happened to that technology is a big question. The author develops a deep analysis based upon measurements and mathematics, giving us the possibility to recollect modern data, comparing current knowledge to something that seems to be very accurate and more scientific than official archaeology has lead us to believe. "This work, however, is not about my beliefs. Nor is it just a metaphorical narrative about the existence of an entity with knowledge infinitely more sophisticated than human endeavour. The evidence presented proves to be the work of a very developed culture. In other words, this work is not about what is perceived or described in modern times as belief, but rather concrete evidence of subtle knowledge mastered by beings who, as it turns out, visited us." Nicolae Sirius was born in 1950 in Lupşanu, Romania. He has been a published poet since 1968, but in 1986 he wanted his career to grow and defected from Romania, moving to Australia. After leaving Australia he has lived in Germany and Austria before settling in Japan in 1997. He has published in Romanian and English and his works have been performed in English. Some of his plays are "The Last Dictator, Abel, and God" and "Gregor's nightmare".

*Gods of the Dawn* Apr 26 2021 The Pyramids of Giza are one of the great wonders of the world--but what if they were built not by the Ancient Egyptians, nor even by the legendary Atlanteans, but by a still more ancient civilization from outside our solar system? This book presents the theory that the Egyptian Pyramids are part of an ancient star map--a message in stone from a vastly superior intelligence, designed to guide us through the present, steer us towards the future and finally summon us to the stars.
