what's really holding you back from closing sales and reaching your income goals. Then he pulls you in with examples, stories, and lessons that teach powerful human influence frameworks for getting past NO, even with the most challenging objections. What you won't find though is old school techniques straight out of the last century. No bait and switch schemes, no sycophantic tie downs, no cheesy scripts, and none of the contrived closing techniques that leave you feeling like a phony, destroy relationships, and only serve to increase your buyer's resistance. Instead, you'll learn a new psychology for turning around objections and proven techniques that work with today's more informed, in control, and skeptical buyers. Inside the pages of *Objections*, you'll gain deep insight into how to get past the natural human fear of NO and become rejection proof. The science of resistance and why buyers throw out objections. Human influence frameworks that turn you into a master persuader. The key to avoiding embarrassing red herrings that derail sales calls. How to leverage the Magical Quarter of a Second to instantly gain control of your emotions when you get hit with difficult objections. Proven objection turn around frameworks that give you confidence and control in virtually every sales situation. How to easily skip past reflex responses on cold calls and when prospecting. How to move past brush offs to get to the next step, increase pipeline velocity, and shorten the sales cycle. The 5 Step Process for Turning Around Buying Commitment Objections and closing the sale. Rapid Negotiation techniques that deliver better terms and higher prices. As you dive into these powerful insights and with each new chapter, you'll gain greater and greater confidence in your ability to face and effectively handle objections in any selling situation. And with this new found confidence, your success and income will soar.

Language, Music, and the Brain Michael A. Arbib, 2013-06-28 A presentation of music and language within an integrative embodied perspective of brain mechanisms for action emotion and social coordination This book explores the relationships between language music and the brain by pursuing four key themes and the crosstalk among them song and dance as a bridge between music and language multiple levels of structure from brain to behavior to culture the semantics of internal and external worlds and the role of emotion and the evolution and development of language The book offers specially commissioned expositions of current research accessible both to experts across disciplines and to non experts These chapters provide the background for reports by groups of specialists that chart current controversies and future directions of research on each theme The book looks beyond mere auditory experience probing the embodiment that links speech to gesture and music to dance The study of the brains of monkeys and songbirds illuminates hypotheses on the evolution of brain mechanisms that support music and language while the study of infants calibrates the developmental timetable of their capacities The result is a unique book that will interest any reader seeking to learn more about language or music and will appeal especially to readers intrigued by the relationships of language and music with each other and with the brain
